

PEPFAR

U.S. President's Emergency Plan for AIDS Relief

CENTRAL ASIA REGION

Partnering to Achieve HIV/AIDS Epidemic Control

2018

U.S. Embassy Tajikistan

Total PEPFAR Investment (FY 2009-2017): \$104,065,000

The U.S. government, through PEPFAR, is proud to partner with the people and governments of the Central Asia Region in accelerating their progress toward achieving HIV/AIDS epidemic control. In Fiscal Year 2018, with a focus on Kazakhstan, Kyrgyz Republic, and Tajikistan, the partnership will include the following specific priorities to maximize impact:

- Advancing national programs toward achievement of the UNAIDS 90-90-90 targets
- Supporting the use of real-time surveillance and program monitoring data to ensure that program activities reflect the changing epidemics and match the needs of those at risk of or impacted by HIV
- Working with indigenous and local partners to develop and implement effective and scaleable prevention, case finding, and treatment programs for people who inject drugs and their sexual partners
- Expanding harm reduction and targeted case finding among key populations in priority provinces (first 90)
- Increasing HIV treatment uptake (second 90) among people living with HIV and supporting efforts to ensure those on treatment achieve viral suppression (third 90)
- Strengthening the local capacity of partner governments as well as community and civil society organizations to monitor, manage, and finance national HIV responses
- Supporting the development of national guidelines, adoption of more efficient HIV service delivery models, and site-level investment to ensure that national policies, guidelines, and catalytic models achieve their expected impact

PEPFAR Results in the Central Asia Region¹ (through September 2017)

-  **Antiretroviral treatment for 6,173 people**
-  **Reached 32,541 members of key populations with HIV interventions**
-  **HIV testing services for 584,296 people**

¹These results from data.pepfar.net represent cumulative totals from Kazakhstan, Kyrgyz Republic, and Tajikistan.

HIV/AIDS Epidemic in the Central Asia Region² (end of 2016)

Number of people living with HIV	48,500
Number of new HIV infections in 2016	<5,200
Number of AIDS-related deaths in 2016	<2,500

²These data from aidsinfo.unaids.org represent cumulative totals in Kazakhstan, Kyrgyz Republic, and Tajikistan.
