

PEPFAR

U.S. President's Emergency Plan for AIDS Relief

ANGOLA

Partnering to Achieve HIV/AIDS Epidemic Control

2018

Total PEPFAR Investment (FY 2004-2017): \$151,588,000

The U.S. government, through PEPFAR, is proud to partner with the people and Government of Angola in accelerating Angola's progress toward achieving HIV/AIDS epidemic control. In Fiscal Year 2018, with a focus on nine high-burden sites in Angola to maximize impact, the partnership will include the following specific priorities:

- Improving quality and coverage of testing and antiretroviral treatment (ART) services through support of high quality models, tools, and institutional capacity building
- Supporting high quality key and priority (military) populations programming to achieve 80 percent ART coverage in priority locations
- Accelerating the implementation of the national Test and Start policy, including developing policies and standard operational procedures
- Supporting centers of excellence as clinic sites that the Government of Angola can scale and roll out nationally
- Building capacity of local civil society organizations in order to strengthen their involvement at the national level in the development of HIV policies and guidelines
- Ensuring support to civil society organizations to monitor and mitigate stigma and discrimination against key populations
- Improving laboratory testing and diagnostics to increase viral load monitoring and the capacity for early infant diagnosis

PEPFAR Results in Angola¹ (through September 2017)

Antiretroviral treatment for 27,246 people

HIV testing services for 122,963 people
