

Eswatini

The U.S. government, through the President's Emergency Plan for AIDS Relief (PEPFAR), is partnering with the people and the Government of Eswatini to accelerate progress toward achieving HIV/AIDS epidemic control, with a focus on the following priorities:

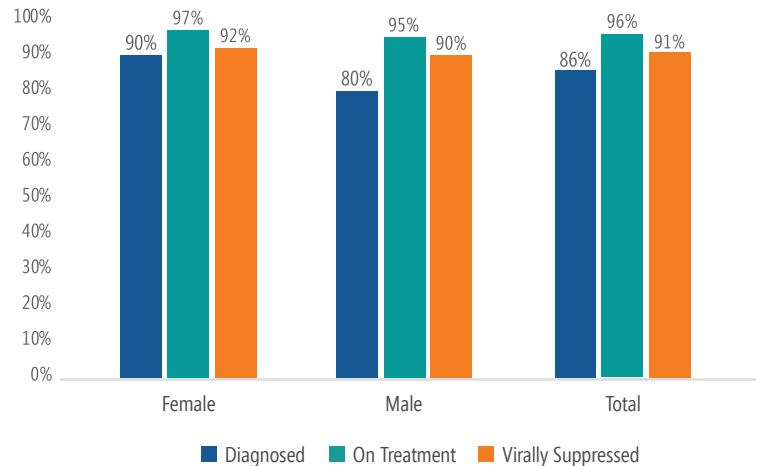

- Increasing partner performance and identifying and leveraging efficiency gains through more granular data disaggregated by age, sex, and site level
- Expanding antiretroviral treatment (ART) services through implementation of Test and Start guidelines, including same-day ART initiation, differentiated care models, six-month clinical visits, and national viral load testing to monitor ART adherence
- Implementing CommLink services – whereby newly identified people living with HIV are connected rapidly to clinical services and ART – to improve linkages for early enrollment in ART, especially for men
- Scaling up and monitoring new and targeted approaches to HIV testing services, including index testing and piloting of HIV self-testing
- Focusing combination prevention interventions on adolescent girls and young women ages 15-29 with the layered Determined, Resilient, Empowered, AIDS-free, Mentored, and Safe Women (DREAMS) core package of services, adult males ages 20-39, and orphans and vulnerable children
- Increasing provision of condoms, lubricants, and voluntary medical male circumcision
- Expanding chiefdom-led coordination and scale up of community action plans to rapidly increase HIV service uptake among men, decrease stigma, and reduce sexual and gender-based violence
- Ensuring priority and key populations have access to and increase their use of comprehensive health and social services

Progress Toward Reaching Epidemic Control

Population-Based HIV Impact Assessment

Progress to UNAIDS 90-90-90 Targets (15+ years of age)

Source: 2017 Population-Based HIV Impact Assessment

Cumulative PEPFAR Investment (FY2004-2018): \$480,917,969

Cumulative PEPFAR Results in Eswatini (through June 2018)

- Antiretroviral treatment for **347,430** people
- Voluntary medical male circumcision for **46,005** men
- HIV testing services for **630,301** people*
- Care and support for **212,075** orphans, vulnerable children, and their caregivers

*In Fiscal Year 2017 alone

Total FY18 Funding for Eswatini: \$66,791,784
