The U.S. government, through the President’s Emergency Plan for AIDS Relief (PEPFAR), is partnering with the people and the Government of Ethiopia to accelerate progress toward achieving HIV/AIDS epidemic control, with a focus on the following priorities:

- Supporting the Government of Ethiopia in reaching epidemic control by focusing its case detection, treatment, retention, and viral load suppression interventions toward the populations and geographic areas with the highest HIV burden and greatest gap in accessing HIV services

- Strengthening the capacity of the Ministry of Health and community structures to ensure the sustainability of the HIV program

- Targeting resources to improve testing and case identification of the remaining undiagnosed people living with HIV and getting them linked to and retained on lifesaving antiretroviral therapy

- Providing direct government-to-government funding in order to support the national response to the HIV/AIDS epidemic through coordination, oversight, monitoring, and evaluation

- Establishing and strengthening case-based surveillance systems and activities, such as HIV recency testing, that are necessary to track, identify, monitor, and respond in real time to changes in the epidemic

- Scaling up differentiated models of HIV service delivery with a strong focus on case finding, improving linkage, increasing viral load coverage, and ensuring adherence and retention

---

### Cumulative PEPFAR Results in Ethiopia (through June 2018)

- **Antiretroviral treatment** for 907,914 people
- **Voluntary medical male circumcision** for 907,914 men
- **HIV testing services** for 8,643,725 people*
- **Care and support** for 538,686 orphans, vulnerable children, and their caregivers

*In Fiscal Year 2017 alone

---

### Cumulative PEPFAR Investment (FY2004-2018): $2,941,637,590

### Progress to UNAIDS 90–90–90 Targets in Adults

- **73%** Diagnosed
- **95%** On Treatment
- **45%** Virally Suppressed

---

### Total FY18 Funding for Ethiopia: $101,805,777

- **54%** Care and treatment
- **16%** Prevention
- **14%** Orphans and vulnerable children
- **13%** Health systems strengthening
- **3%** Management and operations
