

PEPFAR

U.S. President's Emergency Plan for AIDS Relief

NIGERIA

Partnering to Achieve HIV/AIDS Epidemic Control

2018

Total PEPFAR Investment (FY 2004-2017): \$5,008,644,000

The U.S. government, through PEPFAR, is proud to partner with the people and Government of Nigeria in accelerating Nigeria's progress toward achieving HIV/AIDS epidemic control. In Fiscal Year 2018, with a focus on 32 high-burden districts in Nigeria to maximize impact, the partnership will include the following specific priorities:

- Accelerating case finding through self-testing, partner notification services, same-day treatment initiation, and gender-sensitive approaches as part of a national Test and Start implementation
- Mobilizing resources from low-volume, low-yield sites to higher-yield sites located in geographic areas with both high unmet need for services and high HIV prevalence
- Scaling up approaches targeting services based on age and sex disaggregated data, highlighting those most in need of prevention and treatment services
- Reducing discrimination of people living with HIV in health care settings, particularly for key populations
- Increasing targeted HIV testing and linkage to treatment for men who have sex with men
- Increasing HIV testing in high-prevalence, antenatal care settings in order to prevent mother-to-child transmission, eliminating treatment access fees that preclude receipt of antiretroviral treatment (ART) for low-income patients
- Supporting an HIV surveillance study to estimate HIV incidence, prevalence, and viral load suppression rates, which will increase confidence in monitoring and evaluation of progress toward country targets

PEPFAR Results in Nigeria¹ (through September 2017)

	Antiretroviral treatment for 772,510 people
	HIV testing services for 7,766,623 people
	Care and support for 1,284,042 orphans, vulnerable children, and their caregivers
