

Carlos del Rio, MD
Chair, PEPFAR Scientific Advisory Board

Carlos del Rio, MD is the Hubert Professor and Chair of the Hubert Department of Global Health and Professor of Epidemiology at the Rollins School of Public Health of Emory University. He is also Professor of Medicine in the Division of Infectious Diseases at Emory University School of Medicine. He is the Co-Director of the Emory Center for AIDS Research (CFAR) and Director of the Emory AIDS International Training and Research Program.

Dr. del Rio is a native of Mexico where he was Executive Director of the National AIDS Council of Mexico (CONASIDA, the Federal agency of the Mexican Government responsible for AIDS Policy throughout Mexico), from 1992 through 1996.

Dr. del Rio's research focuses on the early diagnosis, access to care, compliance with antiretrovirals and the prevention of HIV infection. He has worked for over a decade in hospitals and clinics with hard-to-reach populations including substance abuse users to improve outcomes of those infected with HIV and to prevent infection with those at risk. He is also interested in the translation of research findings into practice and policy.

Dr. del Rio is a Member of the Board of Directors of the International Antiviral Society-USA (IAS-USA) and is the Chair of HIVMA of the Infectious Diseases Society of America (IDSA). He is also a member of the Advisory Committee on HIV and STD Prevention and Treatment of the Centers for Disease Control and Prevention and Health Resources and Services Administration. He is the Chief Section Editor for HIV of New England Journal of Medicine's Journal Watch Infectious Diseases, the Senior Clinical Editor for AIDS Research and Human Retroviruses and member of the editorial board of Journal of AIDS, Women, Children and HIV, and Global Public Health. Dr. del Rio has been a member of four Institute of Medicine Committees on HIV/AIDS issues (The Ryan White Care Act: Data for Resource Allocation, Planning and Evaluation, Methodological Issues on HIV Prevention Trials, HIV Social Security Disability Criteria and Data Systems for Monitoring HIV Care). He has co-authored 30 book chapters and over 300 scientific papers. Among his many honors are the James H. Nakano Citation received in 2001 and awarded by the CDC for an outstanding scientific paper published in 2000; the Emory University Marion V. Creekmore Achievement Award for Internationalization and the Thomas Jefferson Award. He was selected by the "Atlanta Magazine" as one of the 55 most influential foreign born Atlantantans in 2007. In 2013 Dr. del Rio was elected to the Institute of Medicine of the National Academies.

Quarraisha Abdool Karim, PhD

Quarraisha Abdool Karim is Associate Scientific Director of the Centre for the AIDS Programme of Research in South Africa (CAPRISA), Professor in Clinical Epidemiology, Columbia University, Honorary Professor in Public Health, University of KwaZulu-Natal. She is internationally recognized for her landmark study that demonstrated that tenofovir gel prevents both HIV and Herpes Simplex Virus Type 2 (HSV-2) infection. This contribution to AIDS prevention is the culmination of her epidemiological, clinical and basic research that spans over two decades in South Africa. Her research includes understanding the evolving HIV epidemic in South Africa; factors influencing the acquisition of HIV infection in adolescent girls; and sustainable strategies to introduce Highly Active Antiretroviral Therapy (HAART) in resource-constrained settings. She has over 170 peer reviewed publications and several books and book chapters. She founded the South African National AIDS Programme in 1995 during the Mandela Administration and is currently chair of the South African National AIDS Council Prevention and Structural Drivers Technical Task Team and a member of the WHO ARV Guidelines Committee. Since 1998 she has played a central role in building the science base in southern Africa through the Columbia University - Southern African Fogarty AIDS International Training and Research Programme that has trained over 600 scientists in this region. She serves as an advisor on numerous national and international bodies and is the recipient of several prestigious awards that include the Order of Mapungubwe from the President of South Africa in 2013 for outstanding work in the field of HIV/AIDS and Tuberculosis Research and Health Policy Development, and the 2014 TWAS-Lenovo Prize from The World Academy of Sciences (TWAS) "for her exceptional and distinguished contributions to HIV prevention and women's health" and is the 2016 L'Oréal-UNESCO Women in Science Laureate for Africa and the Arab States. She is an International Associate of the National Academy of Medicine.

Judith Auerbach, PhD

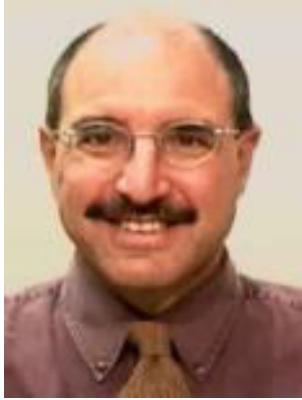

Dr. Judith Auerbach is a public sociologist, independent science and policy consultant, and Professor in the School of Medicine at the University of California, San Francisco (UCSF). She previously served as Vice President, Research & Evaluation at the San Francisco AIDS Foundation, Vice President, Public Policy and Program Development, at amfAR, Director of the Behavioral and Social Science Program and HIV Prevention Science Coordinator in the Office of AIDS Research at the NIH, Assistant Director for Social and Behavioral Sciences in the White House Office of Science and Technology Policy, and Senior Program Officer at the Institute of Medicine.

Dr. Auerbach received her Ph.D. in Sociology from the University of California, Berkeley, and has taught, presented, and published widely in the areas of HIV/AIDS, social science, public policy, and sex and gender. Her work has appeared in such journals as *Health Affairs*, *Journal of Health and Social Behavior*, *Journal of the International AIDS Society (JIAS)*, *Science*, *Global Public Health*, *JAIDS*, and the *American Journal of Public Health*, among others.

Dr. Auerbach has served on numerous professional and advisory groups, including the National Advisory Council on Drug Abuse, PEPFAR Scientific Advisory Board, NIH Office of AIDS Research Advisory Council (OARAC), Institute of Medicine Committee on the Outcome and Impact Evaluation of PEPFAR, American Sociological Association Council, the Global HIV Prevention Working Group, and the International Centre for Science in Drug Policy. In 2012, she was elected to the Governing Council of the International AIDS Society.

For her science and policy work, Dr. Auerbach has received numerous awards including the 2004 Feminist Activist Award from Sociologists for Women in Society, the 2006 Research in Action Award from the Treatment Action Group (TAG), the 2008 Career Award from the Sociologists AIDS Network, and the 2010 Thomas M. Kelly Leadership Award from Project Inform and the 2014 Feminist-Scholar-Activist Award from the Sex and Gender Section of the American Sociological Association.

Dr. Auerbach's research interests focus on the social organization of scientific knowledge, specifically, the role and standing of social research in the HIV/AIDS response; social determinants of health and wellbeing; and the relationship between science, program, and policy. As a consultant, she advises about scientific agenda-setting, strategic planning and priority-setting, and linking research and policy; and her clients include government agencies, non-profit and advocacy organizations, and universities.

Peter Berman, PhD, MSc

Prof. Peter Berman is Professor of the Practice of Global Health Systems and Economics in the Department of Global Health and Population at the Harvard T.H. Chan School of Public Health. He is Faculty Director of Harvard Chan's DrPH and coordinates Harvard Chan's India Health Partnership and graduate education programs in the GHP department. Prof. Berman is a health economist with forty years of experience in research, policy analysis and development, and training and education in global health. His research focuses on health care financing and developing effective primary care systems currently with field research in Ethiopia, India, and Malaysia. He is the author and editor of five books on global health economics and numerous academic papers. Dr. Berman holds a M.Sc. and Ph.D. from Cornell University and has held field assignments with UNICEF, Ford Foundation, and the World Bank.

Connie Celum, MD, MPH

Dr. Celum is Professor of Global Health and Medicine, Adjunct Professor of Epidemiology and Director of the International Clinical Research Center in the Department of Global Health at University of Washington. Dr. Celum is an infectious disease epidemiologist with a focus on HIV prevention. She has led multi-center HIV prevention efficacy trials, including genital herpes suppression for prevention of HIV acquisition (HPTN 039, funded by NIH) and prevention of HIV transmission and disease progression in HIV serodiscordant couples (Partners in Prevention HSV/HIV Transmission Study, funded by BMGF). Most recently Dr. Celum co-lead a 3 arm trial of tenofovir-based pre-exposure antiretroviral prophylaxis among HIV serodiscordant couples in Kenya and Uganda (the Partners PrEP Study, funded by BMGF) and is co-leading a demonstration project of ARV-based prevention in serodiscordant couples in Kenya and Uganda and young women in South Africa (the Partners Demo project, funded by BMGF, NIH and USAID). Dr. Celum is co-leading implementation science research about PrEP implementation for young women in Kenya and South Africa (3P and POWER studies, funded by NIH, BMGF, and USAID). Dr. Celum is leading combination HIV prevention studies focusing on community-level HIV testing and decentralized ART initiation in Uganda and South Africa (funded by BMGF).

Judith S. Currier, MD, MSc

Dr. Currier is Professor of Medicine and Chief of the Division of Infectious Diseases and Co-Director of the Center for AIDS Research and Education Center (CARE) in the Department of Medicine at University of California, Los Angeles (UCLA). She is Vice Chair of the NIH sponsored AIDS Clinical Trials Group and serves on the leadership team for the Expanding Quality Improvement for HIV/AIDS in Malawi (EQUIP) Project. Her research has focused on HIV therapeutics and long-term complications of HIV disease with an emphasis on sex differences and antiretroviral therapy, cardiovascular disease, and women's health.

Sofia Gruskin, JD, MIA

Sofia Gruskin directs the Program on Global Health & Human Rights at the University of Southern California (USC) Institute for Global Health and holds appointments as Professor of Preventive Medicine at the Keck School of Medicine and as Professor of Law and Preventive Medicine at the Gould School of Law. She is also Adjunct Professor of Global Health in the Department of Global Health and Population at the T.H. Chan School of Public Health at Harvard University, where she previously served as Associate Professor, Director of the Program on International Health and Human Rights, and Co-Director of the Inter-departmental Program on Women, Gender and Health. Her work, which ranges from global policy to the grassroots level, has as its focus developing the conceptual, methodological and empirical links between health and human rights, with particular concern for HIV and AIDS, non-communicable disease, child and adolescent health, sexual and reproductive health, gender-based violence and health systems. Current partners include the World Health Organization, the United Nations Development Programme (UNDP), United Nations Population Fund (UNFPA), Concern Worldwide, Open Society Foundation, and local organizations and universities in Brazil, India Indonesia and Vietnam. She has published extensively and been engaged with numerous projects, boards and committees over the years, all concerned with bringing human rights concepts and methods together with public health evidence to develop policies and programs that promote public health. She currently serves on the Board of Directors of the Guttmacher Institute, is Co-Coordinator of the Rights-Oriented Research and Education Network for Sexual and Reproductive Health (The RORE Network), an international network of SRHR researchers and advocates, and is a member of The Core Group of Experts on Under 5 Mortality and Morbidity for the Office of the High Commissioner for Human Rights and the World Health Organization. Most recently Professor Gruskin was on the Institute of Medicine's Committee for the Outcome and Impact Evaluation of Global HIV/AIDS Programs Implemented Under the Lantos/Hyde Act of 2008 (PEPFAR), and the Technical Advisory Group of the UN Global Commission on HIV and the Law. Professor Gruskin is also an associate editor for *The American Journal of Public Health*, *Global Public Health*, and *Reproductive Health Matters*.

Mark Harrington

Mark Harrington was born and raised in San Francisco, CA. He studied film, photography, history and literature at Harvard, where he graduated in 1983. In 1988 he joined the AIDS Coalition to Unleash Power (ACT UP)/New York, where he was a key member of its Treatment + Data (T+D) Committee, and with whom he helped lead the 1988 “Seize Control of the FDA” and 1990 “Storm the NIH” demonstrations. In 1992 along with other members of T+D he cofounded Treatment Action Group (TAG), where he has been executive director since 2002. He cowrote AIDS Research at the NIH: A Critical Review with Gregg Gonsalves; its recommendations were included in the NIH Revitalization Act of 1993. He cowrote Problems with Protease Inhibitor Development Plans (1995) and wrote Viral Load in Vancouver (1996). He served as a member of the U.S. panel on Guidelines for the Use of Antiretroviral Agents in HIV-1-Infected Adults and Adolescents (1997-2010) and the World Health Organization (WHO) writing groups on Scaling Up Antiretroviral Therapy in Resource-Limited Settings: Treatment Guidelines for a Public Health Approach (2003, 2006), the WHO Interim policy on collaborative TB/HIV activities (2004), and Recommendations to improve the diagnosis of smear negative pulmonary and extrapulmonary TB among adults in HIV prevalent and resource constrained settings (2007). He was a member of the Global TB/HIV Working Group in the Stop TB Partnership (2003–2014) and served on New York Governor Andrew Cuomo’s Ending the Epidemic Task Force (October 2014–January 2015) that developed New York’s plan to end AIDS as an epidemic by 2020. Currently he is a member of the AIDS Clinical Trials Group Tuberculosis Transformative Sciences Group (ACTG TB TSG), the International AIDS Society (IAS) Stakeholders’ Advisory Board for a Global Scientific Strategy Towards a Cure, and the Ending the Epidemic Subcommittee of the New York State AIDS Advisory Council. In 1997 he was awarded a MacArthur Foundation fellowship and in 2012 the HealthGAP Evan Ruderman Global Health Justice Award.

Mark Heywood, MA

Mark Heywood is the Executive Director SECTION27. SECTION27 was established in May 2010. It incorporates the AIDS Law Project (ALP), one of South Africa's most successful post-apartheid human rights organizations. SECTION27 is a public interest law center that seeks to influence, develop and use the law to protect, promote and advance human rights.

Mr. Heywood grew up in Nigeria, Ghana, Botswana and England. He holds a BA (Hons) in English Language and Literature from Balliol College, Oxford University. After graduating from Oxford in 1986, he worked for the Marxist Workers Tendency of the ANC, first in London and then from 1989 to 1994 in South Africa. During this time he was instrumental in setting up campaigns such as the Philemon Mauku Defence Campaign, the Leeukop Political Prisoners Support Committee and the Johannesburg Inner City Community Forum. He also did an MA in African literature at the University of the Witwatersrand, Johannesburg, and lectured and wrote on the influences of Shakespeare on African writing and politics in South Africa.

Mr. Heywood joined the ALP in 1994, becoming its head in 1997 and executive director in 2006. In 1998, he was one of the founders of the Treatment Action Campaign (TAC). In 2007, he was elected as deputy chairperson of the South African National AIDS Council, a position he held until 2012. He is also the former chairperson of the UNAIDS Reference Group on HIV/AIDS and Human Rights, a position he held until 2012. In 2009, Mr. Heywood was appointed as a member of the Ministerial Advisory Committee on National Health Insurance.

Mr. Heywood has written extensively on HIV, human rights and the law, including co-editing the AIDS and the Law Resource Manual and *Health & Democracy: A guide to human rights, health law and policy in post-Apartheid South Africa*. He has been part of the legal teams of the ALP and TAC that have been involved in all the major litigation around HIV and human rights.

Musimbi Kanyoro, PhD

Dr. Musimbi Kanyoro is President and CEO of Global Fund for Women and a passionate advocate for women and girls' health and human rights, and social change philanthropy. Dr. Kanyoro is an accomplished leader with three decades of experience managing international non-governmental organizations, global programs, and ecumenical agencies in cross-cultural contexts. In addition to being a sought after public speaker who inspires people, mobilizes action and resources, Dr. Kanyoro has authored numerous articles, opinion pieces and written or co-edited seven books.

Dr. Kanyoro also serves on several International Boards and working groups including the Aspen Leaders Council, the UN High level Taskforce for Reproductive Health, CARE, and the UN Women Civil Society Advisory Board and PEPFAR Scientific Advisory Board.

Etienne Karita, MD, MSc

Dr. Etienne Karita has worked in the field of HIV/AIDS prevention and research for the last twenty-five years. He received his medical degree from the University of Rwanda in 1985. He also holds a Master's degree in Molecular Biology from the Free University of Brussels in Belgium (1995), and a Master's of Science degree (Epidemiology) from the University of Alabama at Birmingham (2002). For the last 12 years, Dr. Karita has been the Country Director of Project San Francisco (PSF), an HIV/AIDS research organization of Emory University established in Rwanda in 1986. In addition to participating in research activities on HIV transmission among discordant couples, acute HIV infection, and integration of couples HIV and family planning counseling, Dr. Karita has been Principal Investigator for five phase 1 HIV vaccine trials conducted by PSF with support from the International AIDS Vaccine Initiative (IAVI). Prior to joining PSF, Dr. Karita was a Senior Technical Advisor and International Program Officer for PMTCT programs sponsored by the Elizabeth Glaser Pediatric AIDS Foundation. He is the founding director of the Treatment and Research AIDS Center and the National Reference Laboratory of the Ministry of Health in Rwanda. He has also served as the Director of the National AIDS Control Program, and he played a very active role in the implementation and scale-up of HTC, PMTCT, and HIV care & treatment services in Rwanda. He initiated the first pilot PMTCT program in Rwanda and has offered technical assistance to many HIV programs across Africa. He continues to be a resource person for several technical working groups of the Ministry of Health in Rwanda. He is also a member of the Scientific Advisory Committee of IAVI.

Jennifer Kates, PhD

Dr. Jen Kates is Vice President and Director of Global Health & HIV Policy at the Kaiser Family Foundation. She oversees the Foundation's policy analysis and research focused on the U.S. government's role in global health and on the global and domestic HIV epidemics. Widely regarded as an expert in the field, she regularly publishes and presents on global health and HIV policy issues and is particularly known for her work analyzing donor government investments in global health; assessing and mapping the U.S. government's global health architecture, programs, and funding; and tracking and analyzing major U.S. HIV programs and financing, and key trends in the HIV epidemic, an area she has been working in for twenty-five years. Prior to joining the Foundation in 1998, Dr. Kates was a Senior Associate with The Lewin Group, a health care consulting firm, where she focused on HIV policy, strategic planning/health systems analysis, and health care for vulnerable populations. Prior to that, she directed the Office of Lesbian, Gay, and Bisexual Concerns at Princeton University.

Dr. Kates serves on numerous federal and private sector advisory committees on global health and HIV issues. Currently, she is a member of the CDC/HRSA Advisory Committee on HIV, Viral Hepatitis and STD Prevention and Treatment (CHACHSPT) and is an Alternate Board Member of the Global Fund to Fight AIDS, Tuberculosis and Malaria. She recently served on the Institute of Medicine's (IOM) Congressionally-mandated evaluation of the President's Emergency Plan for AIDS Relief (PEPFAR), and on two IOM study committees commissioned by the White House to inform the implementation of the National HIV/AIDS Strategy.

Dr. Kates received her Ph.D. in Health Policy from George Washington University, where she is also a lecturer. She holds a Bachelor's degree from Dartmouth College, a Master's degree in Public Affairs from Princeton University's Woodrow Wilson School of Public and International Affairs and a Master's degree in Political Science from the University of Massachusetts.

Lejeune Lockett, DIM, MSc

Dr. Lejeune Y. Lockett currently works at the Charles R. Drew University of Medicine and Science in Los Angeles, California as the Operations & Program Manager for Global Health. Since 2010, she has provided oversight for 3 distinct Military HIV/AIDS Prevention Projects in Angola, Jamaica and Belize funded by PEPFAR and the US Department of Defense.

As the Associate Director/Health for the U.S. Peace Corps in Windhoek, Namibia, she spearheaded the development of the Community Health and HIV/AIDS Program from 2004-2009. She participated in the initial USG partner coordinating meetings held in Namibia, South Africa, Uganda, and Ethiopia as PEPFAR was launched in the region. She supported the first technical working groups formed to shape the implementation of the PEPFAR program in Namibia. She supervised 45 Peace Corps Volunteers (PCVs) posted in the country at any given time and funded by PEPFAR. She established over 100 HIV-related work assignments for PCVs with the Ministry of Health, Ministry of Youth, UN organizations, NGOs, and Faith Based Organizations. She also provided pre- and in-service orientations including cross-cultural and HIV technical training support for an additional 80 Peace Corps Volunteers assigned to the Ministry of Education.

In 2004, Dr. Lockett co-founded the Young Achievers Empowerment Program in Namibia to implement outreach and leadership skills development activities for over 50 youth living in the township of Katutura. This organization continues to serve as an intervention to mitigate the impact of HIV/AIDS on the community and its youth. The impact of the central theme “You Can Cross the River. Have a Vision!” provided a foundation for her doctoral research topic on the use of cultural metaphors to enhance youth leadership development.

Dr. Lockett worked for seven years for the Augsburg College Center for Global Education (CGE) as the Program Coordinator/Adjunct Professor in Mexico (1997-2002) and as Interim Director in Namibia (2002-2004). She facilitated adult experiential learning semester abroad programs and short-term travel seminars in Mexico, Namibia, South Africa, Guatemala, El Salvador, and Cuba. She coordinated intellectual exchange related to Health, Gender, Social Stratification, Social Justice and Development.

From 1993-1997, Dr. Lockett was based at the Mexican National Institute of Public Health initially as an International Population Fellow and later as the Head of the Department of Alternative Health Care Models. She conducted research on topics related to health care access, and complementary and alternative healthcare models. She taught courses at the National School of Public Health of Mexico in program planning, monitoring and evaluation. She also collaborated with senior level officials around the globe on a project funded by the World Health Organization to develop a database on International Healthcare Reform.

Dr. Lockett is from Southern California. She has travelled to 45 countries and enjoys music, dance and culture. She holds a Bachelors in Psychology (Biology emphasis), Masters of Science in Public Health (Health Services Planning and Policy Analysis emphasis), and a Doctorate of Management (Organizational Leadership emphasis).

Ruth Macklin, PhD

Ruth Macklin is Professor of Bioethics in the Department of Epidemiology and Population Health at Albert Einstein College of Medicine in the Bronx, New York, USA. She received a BA with Distinction from Cornell University and an MA and PhD in Philosophy from Case Western Reserve University. She has more than two hundred sixty publications in professional journals and scholarly books in bioethics, law, medicine, philosophy, and the social sciences, in addition to articles in magazines and newspapers for general audiences. She is author or editor of thirteen books, including *Mortal Choices* (1988), *Enemies of Patients* (1993), *Surrogates and Other Mothers* (1994), *Against Relativism* (1999), *Double Standards in Medical Research in Developing Countries* (2004), and *Ethics in Global Health: Research, Policy and Practice* (2012). Her other publications include articles on HIV/AIDS, reproductive health, ethics in human subjects research, global health, and multinational research. Dr. Macklin is an elected member of the National Academy of Medicine (formerly the Institute of Medicine of the National Academies of Science). She was president of the International Association of Bioethics from 1999-2001, and has served several terms on its Board of Directors. She was a member of the Scientific and Ethical Review Committee in the Department of Reproductive Health and Research at the World Health Organization (WHO) from 1989 to 2014, served on the HIV Vaccine Advisory Committee at WHO from 2001 to 2010, and was Chair of the External Ethics Committee of the Centers for Disease Control and Prevention (CDC) from 2005 to 2008. Dr. Macklin chaired the Ethical Review Committee at the Joint United Nations Programme on HIV/AIDS (UNAIDS) in Geneva from 1996-2000; also at UNAIDS she was a member of the Global Reference Group on HIV/AIDS and Human Rights from 2003-2008. Since 2000 she has co-directed an NIH Fogarty International Center Training Program on research ethics, which takes place in Buenos Aires, Argentina. On three occasions she served as visiting faculty teaching research ethics courses at the National Institute of Public Health in Mexico, and has participated in consultations organized by WHO departments in Botswana, Malawi, South Africa, Nigeria, Senegal, Zimbabwe, Turkey, Thailand, India, Russia, and Brazil, among other venues. In 2012 she was invited to help organize two sessions on research ethics at the International Microbicide Conference in Sydney, Australia. She has also been on the faculty of workshops in Argentina and Peru conducted by the Department of Clinical Ethics of the NIH. In 2014 she received two prestigious awards: the Hastings Center's Henry Beecher Award, and an award from the Global Forum on Bioethics in Research for contributions to progress international research ethics.

Celia Maxwell, MD, FACP

Dr. Maxwell is Associate Professor of Medicine and Associate Dean for Research at Howard University. She is the principal investigator on a HRSA-funded project, a Ryan White Part C Early Intervention Service Program, PI of the Routine HIV Screening Program funded by the CDC thru by the DC Department of Health and co-investigator of a study on HIV, and immune function funded by the National Institutes of Health. She obtained her medical degree from Columbia University College of Physicians and Surgeons, completed her residency training in Internal Medicine at Howard University Hospital, and was awarded a Fellowship at the National Institutes of Health, Laboratory of Parasitic Diseases. Additionally, thru an Institute of Medicine Health Policy Fellowship, she served as a health legislative assistant for Senator Tom Harkin (D. Iowa). Dr. Maxwell is a member of several national organizations including The American College of Physicians (Fellow), The Medical Society of the District of Columbia, The Infectious Diseases Society of America and The National Medical Association among others. She has served as a medical expert on HIV screening in China, Brazil, Panama and in Dubai, United Arab Emirates.

Kenneth Mayer, MD

Dr. Mayer is a Professor at Harvard Medical School and the Harvard School of Public Health, and Attending Physician at Beth Israel Deaconess Medical Center in Boston and Director of HIV Prevention Research there. He is the founder, Co-Chair and Medical Research Director of The Fenway Institute, the research, training and health policy division of Fenway Health, the largest ambulatory facility caring for HIV-infected patients in New England. He previously was a Professor of Medicine and Community Health at Brown University, and Director of its AIDS Program. Dr. Mayer has served on the national boards of the HIV Medicine Association, the American Foundation for AIDS Research and the Gay and Lesbian Medical Association. He is a member of the Governing Council of the International AIDS Society, and Co-Chair of the Scientific Advisory Board of the Center for Global Health Policy of the Infectious Disease Society of America.

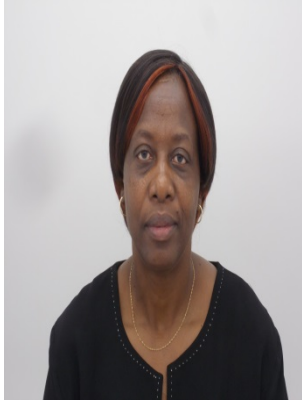

Since 1994, he has been the Principal Investigator of the only NIH-funded HIV Prevention Research Clinical Trials Unit in New England focusing on bio-behavioral prevention and chemoprophylaxis and the Co-Principal Investigator of the Harvard HIV/AIDS Vaccine Unit, conducting trials in the NIH-funded HIVNET, HPTN, HVTN and MTN networks. He was the Co-Chair of an NIAID-funded protocol evaluating a community-based prevention intervention for African-American Men who have Sex with Men in 6 U.S. cities (HPTN 061) and is Co-Chair of a multicenter protocol evaluating the safety, tolerability and adherence with Maraviroc-based chemoprophylaxis regimens. He is the co-author of more than 500 peer-reviewed publications. He is a member of the Editorial Board of *Clinical Infectious Diseases*, the editor of three texts related to the impact of AIDS on diverse disciplines, as well as “*The Social Ecology of Infectious Diseases*” (Academic Press) and is Associate Editor of *The Fenway Guide to LGBT Health* (ACP Press).

He continues to teach and mentor medical students, residents, and fellows. He has provided care to people living with HIV since the beginning of the AIDS epidemic.

Jesse Milan, JD

Jesse Milan, Jr., JD. is a person living with HIV for 33 years. He is a Senior Fellow at Atlas Research, a Fellow at the Altarum Institute, and an executive leadership development consultant with the Dorrier Underwood firm. He is the HIV Subject Matter Expert on numerous federal programs including the CDC National Capacity Building Partners Network Resource Center, and the CDC's Changing Landscape qualitative assessment of the impact of the National HIV/AIDS Strategy and High Impact Prevention on health departments. He serves on the Steering Committee for the AIDS Education and Training Center (AETC) National Coordinating Resource Center, and on the Scientific Advisory Board for the President's Emergency Plan for AIDS Relief. He is Chair Emeritus, current officer, and past board chair of the Black AIDS Institute, and serves on the Dean's Advisory Council for the UNC Gillings School of Global Public Health. He served for five years as co-chair of the CDC/HRSA Advisory Committee on HIV and STD Prevention and Treatment, and was co-chair of the CDC's Division of HIV/AIDS Prevention's External Peer Review of its entire \$700 million portfolio. He worked seven years as director of the CDC National Prevention Information Network (NPIN) and was project director for the CDC's Act Against AIDS Leadership Initiative. He served on the Host Planning Committee for the 2015 U.S. Conference on AIDS and as co-chair of its Maryland Committee; and served appointments for the 2012 International AIDS Conference on both the Conference Coordinating Committee, and the Leadership and Accountability Programme Committee. He is past director of the AIDS Office for the City of Philadelphia Department of Health, was president of the board of ActionAIDS (Pennsylvania's largest AIDS service organization), and chair of the Philadelphia EMA Ryan White Planning Council and HIV Prevention Planning Group. He served also as president of the board of the National Episcopal AIDS Coalition, the Philadelphia AIDS Consortium, and the Princeton Class of 1978 Foundation. He worked five years as Vice President of the Altarum Institute and for ten years as Vice President at the Constella Group where he directed public health projects for WHO, CDC, HRSA, NIH, SAMHSA, USDA, and foundations. A lawyer, he was Deputy City Solicitor for Philadelphia and was Chief of Staff to the President of Temple University. Mr. Milan has given hundreds of speeches, keynotes, and presentations, addressing millions of people in the U.S. and Africa on HIV/AIDS issues, including three speaking tours for the U.S. State Department and at the White House. He will receive in 2015 the Public Service Award from the Association of Nurses in AIDS Care (ANAC). In 2010, Mr. Milan was named by POZ magazine as one of the 100 most influential Americans in HIV/AIDS and was honored by the Health Resources and Services Administration in 2004 for "leading the national and international fight against HIV disease." He is a graduate the New York University School of Law and of Princeton University.

Angela Mushavi, MBChB, MMed Pediatrics

Angela Mushavi is a Medical Doctor who graduated from the University of Zimbabwe Medical School in 1988. She has a postgraduate qualification in Pediatrics obtained from the University of Zimbabwe, and is currently working towards a Master's in Business Administration (MBA) degree with Regent Business School in Durban, South Africa.

Angela Mushavi is the National PMTCT and Pediatric HIV Care and Treatment Coordinator in the Ministry of Health and Child Care (MOHCC) in Zimbabwe, and has responsibility to provide technical leadership and coordination for the expansion of the national PMTCT and Pediatric HIV and AIDS care and treatment programs in Zimbabwe. In that regard, she works to facilitate the collaboration and networking of national, regional and international organizations involved in delivering PMTCT and Pediatric HIV and AIDS care and treatment that is integrated within the overall maternal newborn and child health settings. She chairs the National PMTCT Partnership Forum and through its various technical sub-committees, provides guidance and support to PMTCT and Pediatric HIV and AIDS care and treatment partners to develop plans that are aligned with national policies, plans and priorities. Angela Mushavi supports the MOHCC to mobilize resources to support scale-up of PMTCT and Pediatric HIV and AIDS care programs and provide technical leadership in identifying priority areas for operational research. She is involved in the implementation of operational research to generate evidence to guide expansion of the national PMTCT and Pediatric HIV and AIDS care and treatment programs.

She is involved in policy formulation and guideline development both at national and international levels, and provides technical expertise to the WHO HIV guidelines development process; in 2010 as an external reviewer to the PMTCT guidelines, and in 2013 and 2015 as a member of the WHO Guideline Development Group.

Prior to joining the MOHCC in Zimbabwe, Angela Mushavi worked with CDC Namibia as a PMTCT Technical Advisor to the Ministry of Health and Social Services (MOHSS) from 2007 to 2009. From 2004-2007, she worked as the Pediatrician running the Pediatric ART Clinic at Katutura State Hospital, a referral hospital in Windhoek, Namibia. Before practicing in Namibia, Angela Mushavi was the Head of Division of the Harare Children's Hospital in Zimbabwe and a consultant in charge of a firm delivering clinical care to children.

She is a member of the Southern Africa HIV Clinicians Society and a steering committee member of the African Network for the Care of Children Affected by HIV/AIDS (ANECCA), and has contributed to the publication of the ANECCA Handbook on Pediatric AIDS in Africa.

Christine Nabiryo, MBChB, DPH, MMed PH, MBA

Christine has 25 years, experience in Public Health and HIV Projects Design, Management, Research, monitoring and evaluation across the Public – Urban and Rural, Faith –Based, Private and NGO sectors with senior management and leadership positions within Uganda. She has numerous short term technical consulting engagements through working visits to over 20 countries. At global level, she has worked with agencies like Global Fund, WHO, UNFPA, UNAIDS/UN Millennium villages project and White Ribbon Alliance, amongst others.

Christine has vast experience in managing donor funded projects including USAID, CDC, DFID, DANIDA, Irish AID, Global Fund and private sector grants for a portfolio of over 50 M USD in Uganda.

She is currently a part time Research and Ethics Technical Advisor for Mildmay Uganda and an independent Public Health and HIV Consultant. She is a member of the PEPFAR Scientific Advisory Board and the Community Health Alliance Uganda Board.

For legacy, she is serving family and the community. She is working on documenting a model for sustainable social development with Public Health as the entry point- “Transforming communities: A village at a time” with Jjumbi Village, Mpenja Sub county, Gomba district, Uganda, East Africa.

Rev. Dr. Nyambura Njoroge

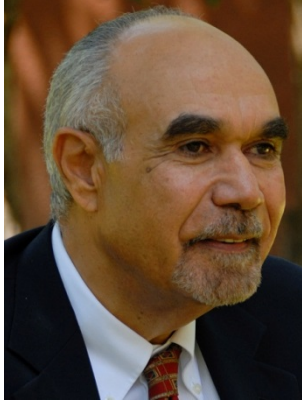

The Reverend Dr. Nyambura J. Njoroge is a Kenyan global church leader, theologian and advocate for justice, human dignity and rights for women, girls, and people living with HIV and marginalized groups. She is currently the World Council of Churches' Ecumenical HIV and AIDS Initiatives and Advocacy program executive. Njoroge' accomplishments includes providing leadership in facilitating theological scholarships for women of global south and advocating for women's inclusion in the teaching of theology in church seminaries and universities while directing the World Council of Churches' Ecumenical Theological Education (1999-2007). Prior to moving to the World Council of Churches she successfully established and coordinated a new global program to promote partnership of women and men among the member churches of the World Alliance of Reformed Churches (1992- 1999).

In her current job Njoroge provides leadership in creating and growing HIV competent churches and theological institutions by addressing the multiple social determinants of sexual and gender-based-violence (SGBV), gender and economic disparities, harmful cultural practices, leadership crisis and misleading faith healing preaching that stop people living with HIV from accessing ARVs and adherence to treatment in sub-Saharan Africa. She has ensured increased participation of men and adolescents in HIV programs as well as studies and publications on religion, transformed masculinities and femininities, sex, sexualities and sexual reproductive health and SGBV in the churches and theological institutions. The HIV program includes people living with HIV, people in the armed forces, prisons, sex workers, people with disabilities and sexual minorities. The program is also working with churches in Jamaica, the Philippines and Ukraine.

Njoroge received her first degree at St. Paul's University, Limuru, Kenya, Master's degree from Louisville Presbyterian Theological Seminary, Louisville, Kentucky, and a Ph.D. in Christian Social Ethics from Princeton Theological Seminary, Princeton, New Jersey, USA. She is a founding member of the Circle of Concerned African Women Theologians (1989) and a member of the International Network of Religious Leaders living with or personally affected by HIV and AIDS (INERELA+).

She grew up in Kenya and was the first woman to be ordained by the Presbyterian Church of East Africa in 1982. In 2009 she received the Distinguished Alum Award from Louisville Presbyterian Theological Seminary and in 2012 a Lifetime Achievement Award by Alumnae Association of St. Paul's University, Limuru, Kenya. She has written and published extensively on matters affecting communities, churches, women, girls and leadership. She currently lives in Geneva, Switzerland.

Jean Pape, MD

Dr. Pape, a graduate of Columbia University (BS, 1971) and Weill Cornell Medical College (MD, 1975), completed his medicine and Infectious Diseases training at Cornell prior to returning to his native Haiti in 1980.

He made significant public health contributions in Haiti that led to significant decrease in the national infantile mortality and to a similar decrease in the national HIV seroprevalence, showing that it is possible to develop successful national programs in the poorest countries and under conditions of instability and political unrest.

In 1980, he was the first to introduce oral rehydration therapy in Haiti, with a decrease in hospital infant mortality rate from 40%, to < 1% within 1 year. Expansion of the program nationwide resulted in a 50% decrease in national infant mortality.

Dr. Pape is also credited with the recognition and first comprehensive description of AIDS in the developing world. He assumed an international leadership role and has been unrelenting in his efforts to implement programs for the prevention and control of AIDS and tuberculosis in Haiti and other resource-poor countries. Dr. Pape established in 1982 the “Haitian Study Group on Kaposi’s Sarcoma and Opportunistic Infections (GHESKIO)”, the first institution in the world dedicated to the fight against AIDS and continues as its Director.

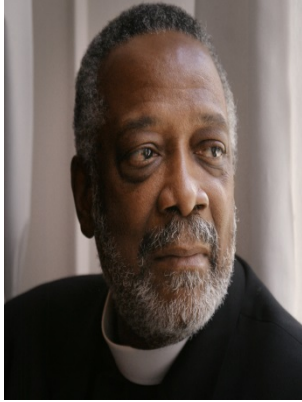

Three decades later despite deteriorating political and economic conditions, GHESKIO continues to provide uninterrupted free care to over 500,000 patients with HIV, STIs and TB annually. New therapies for HIV/AIDS, TB and diarrhea have been validated and implemented. A world-class vaccine and clinical trials Unit has been established with NIH support. Funding from the UN Global Fund and PEPFAR has expanded the GHESKIO comprehensive care paradigm throughout Haiti. Over one third of all patients on HAART in Haiti are treated in the GHESKIO network. Dr. Pape and his team have been credited with “slowing the AIDS epidemic in Haiti” and serving as “a model for how poor countries with few resources can combat AIDS, TB and diarrhea” (NY Times 12/22/02).

Dr. Pape currently directs NIH-supported HIV therapy trials in Haiti as well as one of the largest AIDS and tuberculosis treatment centers in the Americas. In 2010, he successfully introduced oral cholera vaccine in Haiti during the cholera epidemic leading WHO to change its guidelines on reactive vaccination. Dr. Pape is the recipient of numerous awards including: the French “Legion d’Honneur,” election to the Institute of Medicine, the Carlos Slim Health Award for Life Achievement in Research, Gates Global Health, Clinton Global Initiative, WHO STOP TB Kochon awards, and Christophe Mérieux prize by Institut de France. In 2014 he was awarded Haiti’s highest recognition: “Honneur et Mérite, Grade Commandeur”.

David Peters, MD, DrPH, MPH

David H. Peters, MD, MPH, DrPH, is Professor and Chair of the Department of International Health and Johns Hopkins Bloomberg School of Public Health. He is a specialist in international health systems who has worked as a researcher, policy advisor, educator, bureaucrat, manager, and clinician in dozens of developing countries over the last two decades. He previously worked as a Senior Public Health Specialist at the World Bank, and as the Director of the Health Systems Program at Johns Hopkins. He is Research Director for the Future Health Systems research consortium, which is working to improve access, affordability and quality of health services for the poor, with field sites in five countries in Africa and Asia. He pioneered the development of Sector Wide Approaches (SWAs) in health, and created the first national Balanced Scorecard to assess and manage health services (in Afghanistan), while writing seven books and over 100 articles. His teaching and research focus on the performance of health systems, implementation research methods, poverty and health systems, innovations in organization, technology, and financing of health systems, the role of the private sector, human resource management, and ways to use donor assistance to strengthen local capacity in low-income countries.

Rev. Edwin Sanders

The Reverend Edwin C. Sanders, II, is the Senior Servant and Founder of the Metropolitan Interdenominational Church in Nashville, Tennessee. This congregation has attracted a broad cross-section of people with the mission of being “inclusive of all and alienating to none.” Metropolitan has outreach ministries in the areas of substance abuse, advocacy for children, sexual violence, and harm reduction, in addition to providing services to persons infected with, and affected by, HIV/AIDS through the First Response Center, which Rev. Sanders founded in 1992.

Rev. Sanders is a graduate of Wesleyan University, where he received the Bachelor of Arts Degree in Anthropology in 1969. He specialized in Cultural Anthropology, and his thesis was entitled, “The Black Church as a Revolutionary Institution.” Rev. Sanders’ professional life also began at Wesleyan, as Co-Director of the African American Institute, and he is a former member of the Wesleyan University Board of Trustees. He has done graduate study at Yale University Divinity School and as a special student at Vanderbilt University Divinity School. The opportunity to travel extensively throughout Europe and Africa was afforded Rev. Sanders as one of the first fellows of the Thomas J. Watson Foundation.

For eighteen years, Rev. Sanders served as Pastoral Counselor for the Meharry Medical College Alcohol and Drug Abuse Program in Nashville, Tennessee, where he was responsible for the spiritual component of all programs. This work was primarily built around the conducting of group and individual therapy sessions. Also in Nashville, Rev. Sanders has served as Director of the Southern Prison Ministry, and as the Dean of the Chapel at Fisk University.

Rev. Sanders holds life membership in the NAACP, and is a member of the Interdenominational Ministers’ Fellowship (former President). He is a member of the Alcohol and Drug Council of Middle Tennessee, and has served as a Commissioner for the Tennessee Human Rights Commission. He is past Chairperson of the Ryan White Community AIDS Partnership, and is still an active member of the consortium. He was appointed to the CDC Advisory Committee on HIV and STD Prevention during the Clinton Administration and served five years on the Presidential Advisory Council on HIV/AIDS during the Bush Administration. He also served as co-chair of the National Syphilis Elimination Working Group and is currently involved with the Obama Administration White House Office on AIDS in implementing the National AIDS Strategy. Rev. Sanders was a presenter at the World AIDS Conferences in Geneva, Switzerland, Durban, South Africa and Toronto, Canada, as well as speaking regularly at other forums and conferences throughout the United States and around the world. Rev. Sanders serves on the Boards of Directors of the Black AIDS Institute, The AIDS Institute, The National Minority AIDS Council, The Religious Coalition for Reproductive Choice and The Drug Policy Alliance. He is the National Coordinator for Religious Leaders for a More Just and Compassionate Drug Policy, and a former member of the National Advisory Council on Sexual Health at the National Center for Primary Care. More of his current commitments include serving on the Advisory Committee of the Rural Center for HIV/STD Prevention, and as Chair of the HIV Vaccine Trials Network Legacy Project Advisory Group designed to increase the participation of African Americans and Latinos in HIV vaccine studies.

Also in 2002, Rev. Sanders was a candidate for Governor of the state of Tennessee, finishing third out of a field of fourteen candidates.

Fredrick Sawe, MBChB, MMed

As the Deputy Director, Kenya Medical Research Institute /Walter Reed Project (KEMRI/WRP) HIV Program in Kericho, Kenya. Dr. Sawe leads all HIV prevention, care, treatment and research activities for this site, which is part of the U.S. Military HIV Research Program international research network. Dr. Sawe is a Specialist Obstetrician and Gynecologist who has worked in the Kericho area for more than 20 years.

Dr. Sawe has played a key role in the execution of several HIV vaccine and therapeutic clinical trials and related HIV cohort studies in Kericho. Dr. Sawe is the Clinical Research Site (CRS) leader for Kericho and has been a Chair or Principal Investigator on a number of the protocols being implemented at the site, including studies sponsored by the US Army and the US National Institutes of Health, including AIDS Clinical Trial Group (ACTG) studies.

Since 2004, Dr. Sawe has been in charge of the KEMRI/WRP South Rift Valley Province (SRV) President's Emergency Plan For AIDS Relief (PEPFAR) funded comprehensive HIV prevention, care and treatment program that covers a population of 2.5 million people. The SRV PEPFAR program includes: HIV Counseling and Testing, Other Prevention (prevention programs and activities targeting high risk populations), HIV Care and Treatment, Prevention of Mother to Child transmission of HIV infection (PMTCT) and Orphans and Vulnerable Children.

Dr. Sawe graduated from medical school at the University of Nairobi, Kenya. He also received specialized training for health care in developing countries and AIDS care and prevention from the Boston University School of Public Health and Makerere University in Kampala, Uganda.

Albert Siemens, PhD

Albert John Siemens has served on the Family Health International (FHI) Foundation's Board of Trustees since May of 2014 and was elected as its Chair in November 2014. He joined FHI in 1983 with responsibility for the organization's Clinical Trials Division. In 1998, Dr. Siemens was appointed as the Chief Executive Officer, a position he held until retirement on May 1, 2014. In 1986, as Vice President of Research, he was instrumental in the formation of Clinical Research International (CRI), an affiliate of FHI, which provided research services to pharmaceutical, biotechnology and medical device companies.

He served as President of CRI until the company was acquired by ClinTrials Research in late 1990. As Executive Vice President of ClinTrials Research from 1991 through 1997, Dr. Siemens was responsible for international corporate expansion and business development. Dr. Siemens was appointed Chairman and CEO of PharmaLinkFHI/Novella Clinical from 1999 to 2008 and then as Chairman from 2008 until the sale to Quintiles in 2013.

He was elected to the Board of Directors of FHI in 1998 and as Chair of the Board in 2006. Since June 2014, Dr. Siemens is also a board member of Made in Durham, a not-for-profit that facilitates education-to-employment pathways for youth throughout Durham County, NC. In February 2015, he was appointed to the Scientific Advisory Board of the U.S. President's Emergency Plan for AIDS Relief.

Dr. Siemens' career in medicinal product development began at Pfizer Inc., where he was responsible for clinical studies of cardiovascular, antibiotic, anti-inflammatory and psychotropic agents in domestic and international divisions. His pharmaceutical background is augmented by seven years of research management and teaching experience in pharmacology at the Research Institute on Alcoholism and the State University of New York at Buffalo.

Dr. Siemens holds a BSc degree in Pharmacy and an MSc degree in Pharmacognosy from the University of Manitoba and a PhD in Pharmacology from the University of Toronto.

Carole Treston, RN, MPH, ACRN, FAAN

Carole Treston is the Chief Nursing Officer for the Association of Nurses in AIDS Care, the global professional nursing membership organization for nurses involved in HIV and HIV-related care. She is an established leader in healthcare and nonprofit management with more than 20 years' experience in local, national, and international health and research organizations and health policy. She co-developed one of the first comprehensive, family-centered HIV/AIDS clinical and research programs in the U.S. and served as Executive Director of the Children's Hope Foundation New York City. She was the Director of Operations for the PACTG/IMPAACT Group, the global multi-site, HIV/AIDS NIH clinical research network, and was the Executive Director of AIDS Alliance for Children, Youth and Families, a national policy and advocacy organization in Washington, DC. Treston's areas of interest include health disparities, the impact of HIV stigma, the unique experience of nurses at the intersection of health care and social determinants of health and strengthening and supporting the nursing workforce. She is an experienced nurse clinician with a Master of Public Health/Health Policy from Columbia University and is a Fellow of the American Academy of Nursing.

Mitchell Warren

Mitchell Warren is the Executive Director of AVAC, an international non-governmental organization that uses education, policy analysis, advocacy and a network of global collaborations to accelerate the ethical development and global delivery of AIDS vaccines, male circumcision, microbicides, PrEP, condoms, and other emerging HIV prevention options as part of a comprehensive response to the pandemic.

Before this, he was the Senior Director for Vaccine Preparedness at the International AIDS Vaccine Initiative (IAVI) where he directed efforts to increase community understanding and national involvement in AIDS vaccine clinical trials. Warren previously spent four years as Vice President and Director of International Affairs for The Female Health Company (FHC), the manufacturer of the female condom, where he directed efforts to design and implement reproductive health programs that integrate the female condom and led global advocacy efforts for female-initiated prevention methods. Warren also spent six years at Population Services International (PSI) designing and implementing social marketing, communications and health promotion activities in Africa, Asia and Europe, including five years running PSI's project in South Africa.

Warren is a member of the President's Emergency Plan for AIDS Relief (PEPFAR) Scientific Advisory Board (SAB); Office of AIDS Research Advisory Council of the US National Institutes of Health (NIH); the board of directors of the Global HIV Vaccine Enterprise and of Maloto; the WHO-UNAIDS HIV Vaccine Advisory Committee; the advisory board of the Towards an HIV Cure Initiative of the International AIDS Society (IAS); and the International Track D Co-Chair and member of the Scientific Programme Committee for the 2016 International AIDS Conference.

Warren has degrees in English and History at the University of Wisconsin-Madison and studied health policy at the Johns Hopkins University School of Hygiene and Public Health.
