

# Zimbabwe

The U.S. government, through the President's Emergency Plan for AIDS Relief (PEPFAR), is partnering with the people and the Government of Zimbabwe to accelerate progress toward achieving HIV/AIDS epidemic control, with a focus on the following priorities:

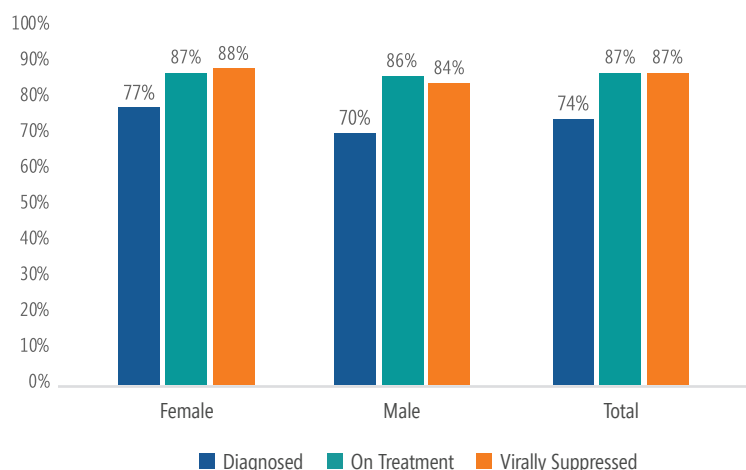

- Increasing partner performance and impact by identifying and leveraging greater efficiencies through collection and use of more granular data
- Identifying new HIV-positive individuals through index testing (contact tracing) and innovative interventions such as HIV self-testing to better reach men and young adults
- Implementing Test and Start, including expanded direct service delivery and differentiated models of care such as mobile lifesaving antiretroviral treatment (ART) and same-day ART initiation
- Reaching at least 90 percent treatment coverage in all 40 PEPFAR-supported districts
- Expanding efficient and effective testing strategies and treatment modalities
- Scaling up evidence-based prevention by targeting males ages 15-29 with voluntary medical male circumcision and increasing services where Determined, Resilient, Empowered, AIDS-free, and Safe (DREAMS) programs are already operating for vulnerable adolescent girls and young women
- Supporting activities for orphans and vulnerable children
- Enhancing key populations prevention and treatment programming by focusing primarily on female sex workers and men who have sex with men, and integrating key populations services into public health facilities

## Progress Toward Reaching Epidemic Control

## Population-Based HIV Impact Assessment

Progress to UNAIDS 90-90-90 Targets (15-64 years of age)
