

## 2016 Sustainability Index and Dashboard Summary: Botswana

**The HIV/AIDS Sustainability Index and Dashboard (SID)** is a tool completed periodically by PEPFAR teams and partner stakeholders to sharpen the understanding of each country's sustainability landscape and to assist PEPFAR and others in making informed HIV/AIDS investment decisions. Based on responses to 90 questions, the SID assesses the current state of sustainability of national HIV/AIDS responses across 15 critical elements. Scores for these elements are displayed on a color-coded dashboard, together with other contextual charts and information. As the SID is completed over time, it will allow stakeholders to track progress and gaps across these key components of sustainability.

<b>Dark Green Score (8.50-10 points)</b> (sustainable and requires no additional investment at this time)
<b>Light Green Score (7.00-8.49 points)</b> (approaching sustainability and requires little or no investment)
<b>Yellow Score (3.50-6.99 points)</b> (emerging sustainability and needs some investment)
<b>Red Score (&lt;3.50 points)</b> (unsustainable and requires significant investment)

**Botswana Overview:** Botswana, a country slightly smaller than Texas with a population of approximately two million people, continues to confront a prolonged and severe HIV epidemic resulting in one of the highest HIV prevalence rates in the world. The Government of Botswana (GoB) has demonstrated strong leadership and Botswana was one of the first countries to provide free anti-retrovirals (ARVs) to all citizens who qualified with CD4 levels of 350 or below, or signs of AIDS-defining illnesses. Now the GoB is adopting Test and Start (T&S), a policy to provide treatment to any citizen who tests positive regardless of his CD4 count. While the GoB is the primary funder of most HIV/AIDS activities in Botswana, external funds are being sought to assist with the initial purchase of drugs for the start-up of T&S. To lower costs, Botswana must look at increasing efficiencies within the system since it has one of the most expensive HIV care and treatment programs of any low- or middle-income country in the world<sup>1</sup>. Also of concern is the country's deteriorating medical supply chain. Challenges with warehouse management of the Central Medical Stores and distribution of commodities have led to shortages and stock-outs, including country-wide shortages of rapid test kits (RTKs) starting in August 2015 and lasting for several months.

**SID Process:** PEPFAR and UNAIDS Botswana co-convened the HIV/AIDS Sustainability Index and Dashboard (SID) process for 2016 and jointly created a list of participants for each of the four SID domains. Participants were invited from various GoB ministries, United Nations development partners, civil society organizations, private sector organizations and USG agencies. An updated SID 2.0 tool was given to participants with a copy of domain questions prior to the meeting. Participants were asked to review this copy and to bring relevant data

---

<sup>1</sup> According to OGAC, treatment in Botswana is one of the most expensive in the world, with direct spending per patient living with HIV ranging from \$800 to \$1,200 annually. Comparatively, South Africa spends about \$300 per person living with HIV (PLHIV) and Malawi spends about \$183 per PLHIV annually. Botswana has a very expensive and clinical approach to HIV because the GoB uses top-of-the-line drugs; both CD4 and viral load testing; and physician care for initiation and follow-ups. The government also maintains HIV treatment clinics separate from general care clinics and dispensaries.

sources to the meeting. During the domain meetings, participants discussed each question and arrived at a collective answer with supporting data. After the four domain meetings, the draft of each SID domain was sent to all of the domain invitees for further vetting and the collection of additional data sources. The first draft was presented to higher level external partners on February 19<sup>th</sup> and shared and discussed with external partners on March 23<sup>rd</sup>. This SID process involved many of our external partners and elicited rich discussions regarding HIV/AIDS program sustainability in Botswana.

### **Sustainability Strengths:**

- **Planning and Coordination** (7.70, light green): Botswana has a multi-year national strategy and coordinates national HIV program implementation. Botswana is currently developing a National Strategic Framework III, which will be in place by the end of 2016 and replace NSF II, 2011-2016. Most sectors participated in the development of this national strategy. The National AIDS Coordinating Agency (NACA) has been the lead governmental coordinating body for Botswana's HIV/AIDS response along with the National AIDS Council. Currently, NACA is transitioning from an independent body under the Office of the President to one embedded within the Ministry of Health (MoH).
- **Public Access to Information** (8.00, light green): The GoB widely disseminates information regarding HIV/AIDS through the publication of the Botswana AIDS Impact Survey (BAIS), the National AIDS Spending Assessment (NASA), and the National Health Accounts (NHA) – though usually with a 1-3 year time lag. Performance and service delivery data are reported in the Global AIDS Progress Report, which is published every two years. Data are also reported through district AIDS reports. HIV/AIDS related procurement occurs through normal government channels and procurements and tenders are published in the Government Gazette and local newspapers. However, the process does not really result in cost efficiencies since local bids are sometimes selected over lower-cost foreign bids. Both NACA and the MoH provide accurate information about HIV/AIDS.
- **Financial/Expenditure Data** (8.33, light green): Though usually with a time lag, the GoB collects, tracks, analyzes and makes available financial/expenditure data related to HIV/AIDS. The GoB takes the lead with some external technical assistance. Almost all financing for the collection and dissemination of expenditure data comes from the GoB. While reports like NASA are conducted every three years, the GoB uses the previous year's budget, allocation and spending to determine budget allocations for the new fiscal year. The GoB conducts health economic studies and analyses, usually utilizing external technical assistance. Recently, the GoB, working with the USG and other development partners, has been involved with many costing activities in preparation for moving to T&S.

### **Sustainability Vulnerabilities:**

- **Commodity Security and Supply Chain** (6.27, yellow): Though yellow, this was one of the areas of greatest concern for participants in the SID process, especially as

Botswana prepares to move to T&S. Botswana has experienced severe issues with its supply chain system including stock-outs of RTKs. Emergency supplies were requested and approved from OGAC. Botswana has a supply chain plan and conducts supply chain assessments, however, the real problem – the functionality of the supply chain, or lack thereof – is not adequately captured by the SID questions. Most supply chain troubles are linked back to the poor performance of the contractor who received the award through a sole source bid. The contractor was supposed to sub-contract in areas where it lacked expertise, like information systems. It did, but dropped the sub-contractors once they received the awards. At this time, the MoH is planning to re-tender this contract and start with a new provider on May 1, 2017. The MoH continues to pay the current contract in full, despite poor performance.

- **Quality Management** (4.76, yellow): This is an area of weakness for Botswana and COP15 resources worked to address this. There has been improvement with quality management and we expect to see more growth in this area as we continue to provide support and resources during COP16. Currently there is no QI strategy for HIV within MoH, however, there is a QI framework in developmental stage that will guide the development of other documents. Documentation of QI activities has been a challenge, but programs are working closely with partners to inculcate the culture of documentation of QI activities.

#### **Additional Observations:**

- Although **Private Sector Engagement** scored in the red (3.08), it is not listed above as a PEPFAR Botswana priority because it's a small sector in Botswana and the GoB provides most resources to address the HIV epidemic. Private sector engagement is not a core activity for PEPFAR/B. The U.S. Mission in Botswana will include private sector engagement activities under the Integrated Country Strategy (ICS), which is currently being updated. The private sector can be included in gender-mainstreaming activities, external partner engagement and through health diplomacy messaging. This lack of private sector engagement might present an opportunity for the GoB to build more on private sector funding sources as external funds continue to decline.
- When Botswana moves to T&S the **Policies and Governance** (6.58, yellow) score should increase as the country currently has a policy of CD4 350.
- A primary weakness of **Service Delivery** (6.11, yellow) in Botswana is the lack of financing of services and service delivery directly targeting key populations. While the GoB does provide HIV/AIDS services to all citizens it does not specifically fund nor provide services directly targeting key populations.
- **Domestic Resource Mobilization** (5.56, yellow) can be improved with the inclusion of HIV/AIDS goals/targets in the national budget. Furthermore, the GoB faced challenges with spending down budgeted items in supply chain procurement.
- The GoB takes a position of equity and provides funding to all districts with allocation based on facilities per district. The national budget by district is not available to determine the proportion of funds allocated to high burden geographic areas. Addressing this could raise **Technical and Allocative Efficiencies** (6.11, yellow).

- **Performance Data** (5.77, yellow) could be strengthened by the coordination of information systems. The GoB is moving in this direction with a recently adopted e-health strategy. The final draft is almost ready. The strategy is meant to harmonize these systems and provide guidance moving forward.

**Contact:** For questions or further information about PEPFAR's efforts to support sustainability of the HIV response in Botswana, please contact Dan Craun-Selka, PEPFAR Coordinator at CraunselkaDM@state.gov.

## Domain A. Governance, Leadership, and Accountability

What Success Looks Like: Host government upholds a transparent and accountable resolve to be responsible to its citizens and international stakeholders for achieving planned HIV/AIDS results, is a good steward of HIV/AIDS finances, widely disseminates program progress and results, provides accurate information and education on HIV/AIDS, and supports mechanisms for eliciting feedback. Relevant government entities take actions to create an enabling policy and legal environment, ensure good stewardship of HIV/AIDS resources, and provide technical and political leadership to coordinate an effective national HIV/AIDS response.

1. <b>Planning and Coordination:</b> Host country develops, implements, and oversees a costed multiyear national strategy and serves as the preeminent architect and convener of a coordinated HIV/AIDS response in the country across all levels of government and key stakeholders, civil society and the private sector.	Data Source	Notes/Comments
<p><b>1.1 Content of National Strategy:</b> Does the country have a multi-year, costed national strategy to respond to HIV?</p>	<p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. There is a multiyear national strategy. Check all that apply:</p> <p><input checked="" type="checkbox"/> It is costed</p> <p><input checked="" type="checkbox"/> It is updated at least every five years</p> <p>Strategy includes all crucial response components for prevention and treatment (HIV testing, treatment and care [including children and <input checked="" type="checkbox"/> adolescents], PMTCT, transition from 'catchup' to sustainable VMMC if country performs VMMCs, scale-up of viral load, EID, and other key metrics)</p> <p><input type="checkbox"/> Strategy includes explicit plans and activities to address the needs of key populations.</p> <p><input checked="" type="checkbox"/> Strategy includes all crucial response components to mitigate the impact of HIV on vulnerable children</p>	<p>1.1 Score: 2.20</p> <p>National Strategic Framework (NSF) II, 2011-2016 which includes the National Operational Plan for NSF (costed) and an M&amp;E Plan.</p> <p>Currently developing NSF III, will be in place by the end of 2016.</p> <p>Please note that the government is revising guidelines for viral load testing with the implementation of a test and treat strategy mid-2016.</p> <p>Strategy not explicit, includes some key populations (e.g., FSW), but not all (e.g., MSM).</p>
<p><b>1.2 Participation in National Strategy Development:</b> Who actively participates in development of the country's national HIV/AIDS strategy?</p>	<p><input type="radio"/> A. There is no national strategy for HIV/AIDS</p> <p><input checked="" type="radio"/> B. The national strategy is developed with participation from the following stakeholders (check all that apply):</p> <p><input checked="" type="checkbox"/> Its development was led by the host country government</p> <p><input checked="" type="checkbox"/> Civil society actively participated in the development of the strategy</p> <p><input type="checkbox"/> Private health sector providers, facilities, and training institutions, actively participated in the development of the strategy</p> <p><input checked="" type="checkbox"/> Businesses and the corporate sector actively participated in the development of the strategy including workplace development and corporate social responsibility (CSR)</p> <p><input checked="" type="checkbox"/> External agencies (i.e. donors, other multilateral orgs., etc.) supporting HIV services in-country participated in the development of the strategy</p>	<p>1.2 Score: 2.00</p> <p>National Strategic Framework (NSF) II; National Operational Plan for NSF.</p> <p>Private health sector institutions participates in national level planning but not at the facility-level.</p>

<p><b>1.3 Coordination of National HIV Implementation:</b> To what extent does the host country government coordinate all HIV/AIDS implemented activities in the country, including those funded or implemented by CSOs, private sector, and donor implementing partners?</p>	<p>Check all that apply:</p> <p><input checked="" type="checkbox"/> There is an effective mechanism within the host country government for internally coordinating HIV/AIDS activities implemented by various government ministries, institutions, offices, etc.</p> <p><input type="checkbox"/> The host country government routinely tracks and maps HIV/AIDS activities of:</p> <p><input type="checkbox"/> civil society organizations</p> <p><input type="checkbox"/> private sector</p> <p><input type="checkbox"/> donors</p> <p><input type="checkbox"/> The host country government leads a mechanism or process (i.e. committee, working group, etc.) that routinely convenes key internal and external stakeholders and implementers of the national response for planning and coordination purposes.</p> <p><input checked="" type="checkbox"/> Joint operational plans are developed that include key activities of implementing organizations.</p> <p><input type="checkbox"/> Duplications and gaps among various government, CSO, private sector, and donor activities are systematically identified and addressed.</p>	<p>1.3 Score: 1.00</p>	<p>National Operational Plan; NACA; Partners Forum, NACA Coordination Assessment 2010; National AIDS Council chaired by the Vice President.</p>	<p>NACA has been the lead governmental coordinating body for the HIV/AIDS response along with the National AIDS Council. Currently NACA is transitioning from an independent body to one embedded within the MOH, with the intent to better coordinate government activities. The Partners Forum is the venue for stakeholders to coordinate and track activities. While the mechanism has been in place, the forum is not functionally tracking or mapping partner activities hence some gaps and duplication exist.</p> <p>The National Operational Plan is one effort to jointly plan across implementing organizations; however focus is primarily on the public sector.</p>
<p><b>1.4 Sub-national Unit Accountability:</b> Is there a mechanism by which sub-national units are accountable to national HIV/AIDS goals or targets? (note: equal points for B and C)</p>	<p><input type="radio"/> A. There is no formal link between the national plan and sub-national service delivery.</p> <p><input checked="" type="radio"/> B. Sub-national units have performance targets that contribute to aggregate national goals or targets.</p> <p><input type="radio"/> C. The central government is responsible for service delivery at the sub-national level.</p>	<p>1.4 Score: 2.50</p>	<p>District Multi-Sectoral AIDS Committees (DMSAC)</p>	<p>DMSACs set district-level targets and report contributions to national goals.</p>
<p><b>Planning and Coordination Score:</b></p>		<p>7.70</p>		

2. Policies and Governance: Host country develops, implements, and oversees a wide range of policies, laws, and regulations that will achieve coverage of high impact interventions, ensure social and legal protection and equity for those accessing HIV/AIDS services, eliminate stigma and discrimination, and sustain epidemic control within the national HIV/AIDS response.		Data Source	Notes/Comments
<p><b>2.1 WHO Guidelines for ART Initiation:</b> Does current national HIV/AIDS technical practice follow current or recent WHO guidelines for initiation of ART?</p>	<p>For each category below, check <u>no more than one box</u> that reflects current national policy for ART initiation:</p> <p>A. Adults (&gt;19 years)</p> <p><input type="checkbox"/> Test and START (current WHO Guideline)</p> <p><input type="checkbox"/> CD4 &lt;500</p> <p>B. Pregnant and Breastfeeding Mothers</p> <p><input checked="" type="checkbox"/> Test and START/Option B+ (current WHO Guideline)</p> <p><input type="checkbox"/> Option B</p> <p>C. Adolescents (10-19 years)</p> <p><input type="checkbox"/> Test and START (current WHO Guideline)</p> <p><input type="checkbox"/> CD4&lt;500</p> <p>D. Children (&lt;10 years)</p> <p><input type="checkbox"/> Test and START (current WHO Guideline)</p> <p><input type="checkbox"/> CD4&lt;500 or clinical eligibility</p>	<p>2.1 Score: 0.36</p>	<p>Botswana National HIV/AIDS Treatment Guidelines (2012)</p> <p>GOB is currently finalizing new treatment guidelines to support a national test and treat strategy planned to launch in April 2016. Current 2012 guidelines continue to promote treatment for PLHIV with CD4&lt;350, Option B+, and test and treat for children &lt;5 years of age.</p>

<p><b>2.2 Enabling Policies and Legislation:</b> Are there policies or legislation that govern HIV/AIDS service delivery or policies and legislation on health care which is inclusive of HIV service delivery?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> A national public health services act that includes the control of HIV</li> <li><input type="checkbox"/> A task-shifting policy that allows trained non-physician clinicians, midwives, and nurses to initiate and dispense ART</li> <li><input type="checkbox"/> A task-shifting policy that allows trained and supervised community health workers to dispense ART between regular clinical visits</li> <li><input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced clinical visits (i.e. every 6-12 months)</li> <li><input type="checkbox"/> Policies that permit patients stable on ART to have reduced ARV pickups (i.e. every 3-6 months)</li> <li><input type="checkbox"/> Policies that permit streamlined ART initiation, such as same day initiation of ART for those who are ready</li> <li><input checked="" type="checkbox"/> Legislation to ensure the well-being and protection of children, including those orphaned and made vulnerable by HIV/AIDS</li> </ul>	<p>2.2 Score: 0.61</p>	<p>2012 HIV/AIDS guidelines; Public Health Act 2014; Children's Act 2009 and National Plan of Action for the Care of OVC, 2010-2016</p>	<p>While 2012 treatment guidelines speak to nurses prescribing ability (and there is a handbook on nurse prescribers as well), however the scope of practice for nurses does not stipulate HIV and treatment as part of their work. An official policy will not be developed until the completion of an ongoing desk review; however, some task shifting is happening ad-hoc in some facilities.</p> <p>The new treatment guidelines to support Test and Treat in April 2016 include a move to less frequent clinical visits, lab work, and ARV pickups.</p>
<p><b>2.3 Non-discrimination Protections:</b> Does the country have non-discrimination laws or policies that specify protections (not specific to HIV) for specific populations? Are these fully implemented? (Full score possible without checking all boxes.)</p>	<p>Check all that apply:</p> <p>Adults living with HIV (women):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Law/policy exists</li> <li><input type="checkbox"/> Law/policy is fully implemented</li> </ul> <p>Adults living with HIV (men):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Law/policy exists</li> <li><input type="checkbox"/> Law/policy is fully implemented</li> </ul> <p>Children living with HIV:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Law/policy exists</li> <li><input checked="" type="checkbox"/> Law/policy is fully implemented</li> </ul> <p>Gay men and other men who have sex with men (MSM):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Law/policy exists</li> <li><input type="checkbox"/> Law/policy is fully implemented</li> </ul>	<p>2.3 Score: 0.63</p>	<p>This question aligns with the United Nations NCPI 2014. Public Service Act 2008; Employment Act 2012; Children's Act; Penal Code</p>	<p>Constitution has an anti-discriminatory law but does not refer to specific populations.</p> <p>Public Service Act 2008 protects rights of employees.</p> <p>Employment Act of 2012.</p> <p>Children's Act is implemented.</p> <p>Penal Code enforces rights of young girls as does the Children's Act.</p>

<b>2.5 Rights to Access Services:</b> Recognizing the right to nondiscriminatory access to HIV services and support, does the government have efforts in place to educate and ensure the rights of PLHIV, key populations, and those who may access HIV services about these rights?	There are host country government efforts in place as follows (check all that apply): <input checked="" type="checkbox"/> To educate PLHIV about their legal rights in terms of access to HIV services <input type="checkbox"/> To educate key populations about their legal rights in terms of access to HIV services <input checked="" type="checkbox"/> National law exists regarding health care privacy and confidentiality protections <input checked="" type="checkbox"/> Government provides financial support to enable access to legal services if someone experiences discrimination, including redress where a violation is found	2.5 Score: 1.07	Public Health Act 2014 2014 UN NCPI report, pg 49	For last check-box, note that GOB does provide financial support to PLHIV who have faced discrimination but they do not extend this support to key populations.
<b>2.6 Audit:</b> Does the host country government conduct a national HIV/AIDS program audit or audit of Ministries that work on HIV/AIDS on a regular basis (excluding audits of donor funding that are through government financial systems)?	<input type="radio"/> A. No audit is conducted of the National HIV/AIDS Program or other relevant ministry. <input type="radio"/> B. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 4 years or more. <input checked="" type="radio"/> C. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 3 years or less.	2.6 Score: 1.43	Panel of experts, February 2016.	Financial audits
<b>2.7 Audit Action:</b> To what extent does the host country government respond to the findings of a HIV/AIDS audit or audit of Ministries that work on HIV/AIDS?	<input type="radio"/> A. Host country government does not respond to audit findings, or no audit of the national HIV/AIDS program is conducted. <input type="radio"/> B. The host country government does respond to audit findings by implementing changes as a result of the audit. <input checked="" type="radio"/> C. The host country government does respond to audit findings by implementing changes which can be tracked by legislature or other bodies that hold government accountable.	2.7 Score: 1.43	Public Accounts Committee	Public Accounts Committee that ministries are accountable to re financial and performance (against funding) audits. Done on demand. Not routine.
<b>Policies and Governance Score:</b>		<b>6.58</b>		

3. Civil Society Engagement			
<p><b>3. Civil Society Engagement:</b> Local civil Society is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, and as a key stakeholder to inform the national HIV/AIDS response. There are mechanisms for civil society to review and provide feedback regarding public programs, services and fiscal management and civil society is able to hold government institutions accountable for the use of HIV/AIDS funds and for the results of their actions.</p>		Data Source	Notes/Comments
<p><b>3.1 Civil Society and Accountability for HIV/AIDS:</b> Are there any laws or policies that restrict civil society from playing an oversight role in the HIV/AIDS response?</p>	<p><input type="radio"/> A. There exists a law or laws that restrict civil society from playing an oversight role in the HIV/AIDS response.</p> <p><input checked="" type="radio"/> B. There are no laws that restrict civil society playing a role in providing oversight of the HIV/AIDS response but in practice, it does not happen.</p> <p><input type="radio"/> C. There are no laws or policies that prevent civil society from providing an oversight of the HIV/AIDS response and civil society is very actively engaged in providing oversight.</p>	<p>3.1 Score: 0.83</p>	<p>Expert panel of Civil Society representatives, Feb 5, 2016.</p> <p>Ad hoc role for CSOs; not organized or consistent;</p>
<p><b>3.2 Government Channels and Opportunities for Civil Society Engagement:</b> Does host country government have formal channels or opportunities for diverse civil society groups to engage and provide feedback on its HIV/AIDS policies, programs, and services (not including Global Fund CCM civil society engagement requirements)?</p>	<p>Check A, B, or C; if C checked, select appropriate disaggregates:</p> <p><input type="radio"/> A. There are no formal channels or opportunities.</p> <p><input type="radio"/> B. There are formal channels or opportunities, but civil society is called upon in an ad hoc manner to provide inputs and feedback.</p> <p><input checked="" type="radio"/> C. There are functional formal channels and opportunities for civil society engagement and feedback. Check all that apply:</p> <p><input checked="" type="checkbox"/> During strategic and annual planning</p> <p><input checked="" type="checkbox"/> In joint annual program reviews</p> <p><input checked="" type="checkbox"/> For policy development</p> <p><input checked="" type="checkbox"/> As members of technical working groups</p> <p><input checked="" type="checkbox"/> Involvement on government HIV/AIDS program evaluation teams</p> <p><input checked="" type="checkbox"/> Involvement in surveys/studies</p> <p><input type="checkbox"/> Collecting and reporting on client feedback</p>	<p>3.2 Score: 1.43</p>	<p>Partner Forum, National AIDS Council, TWG, Global Fund Concept note, TB/HIV meeting, TB evaluation CSO involvement, MLG supports CSOs</p> <p>BBSS included CSO representation. Partner Furum not meeting regularly.</p>

<p><b>3.3 Impact of Civil Society Engagement:</b> Does civil society engagement substantively impact policy and budget decisions related to HIV/AIDS?</p>	<p>A. Civil society does not actively engage, or civil society engagement does not impact policy and budget decisions related to HIV/AIDS.</p> <p><input checked="" type="radio"/> B. Civil society's engagement impacts HIV/AIDS policy and budget decisions (check all that apply):</p> <p><input type="checkbox"/> In advocacy</p> <p><input type="checkbox"/> In programmatic decision making</p> <p><input type="checkbox"/> In technical decision making</p> <p><input type="checkbox"/> In service delivery</p> <p><input type="checkbox"/> In HIV/AIDS basket or national health financing decisions</p>	<p>3.3 Score: 0.00</p>	<p>Expert panel of Civil Society representatives, Feb 5, 2016.</p>	<p>A national umbrella organization exists (BONEFA) but the group is not very engaged or effective.</p>
<p><b>3.4 Domestic Funding of Civil Society:</b> To what extent are HIV/AIDS related Civil Society Organizations funded domestically (either from government, private sector, or self generated funds)?</p> <p>(if exact or approximate overall percentage known, or the percentages from the various domestic sources, please note in Comments column)</p>	<p><input type="radio"/> A. No funding (0%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input type="radio"/> B. Minimal funding (approx. 1-9%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input checked="" type="radio"/> C. Some funding (approx. 10-49%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/> D. Most funding (approx. 50-89%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/> E. All or almost all funding (approx. 90%+) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants).</p>	<p>3.4 Score: 1.67</p>	<p>NACA data source, email communication with J. Moremi February 2016.</p>	<p>Majority of CSO funding comes from donors; however NACA provides 12-19% of funds. World Bank loan from 2014 was noted as a domestic source.</p>
<p><b>3.5 Civil Society Enabling Environment:</b> Is the legislative and regulatory framework conducive to Civil Society Organizations (CSOs) or not-for-profit organizations to engage in HIV service provision or health advocacy?</p>	<p><input type="radio"/> A. The legislative and regulatory framework is not conducive for engagement in HIV service provision or health advocacy</p> <p><input checked="" type="radio"/> B. The legislative and regulatory framework is conducive for engagement in HIV service delivery and health advocacy as follows (check all that apply):</p> <p><input checked="" type="checkbox"/> Significant tax deductions for business or individual contributions to not-for-profit CSOs</p> <p><input checked="" type="checkbox"/> Significant tax exemptions for not-for-profit CSOs</p> <p><input checked="" type="checkbox"/> Open competition among CSOs to provide government-funded services</p> <p><input checked="" type="checkbox"/> Freedom for CSOs to advocate for policy, legal and programmatic change</p> <p><input checked="" type="checkbox"/> There is a national public private partnership (PPP) technical working group or desk officer within the government (ministry of health, finance, or president's office) in which CSOs or non-profit organizations participate/engage.</p>	<p>3.5 Score: 1.67</p>	<p>National Policy for Non-Governmental Organisations, Ministry of Labour and Home Affairs, February 2001 Box 4: Recent court cases such as registration of LEGABIBO and ARVS for foreign inmates.</p>	<p>Partners Forum is venue for PPP and CSO participation; although currently not functioning well.</p>
<p><b>Civil Society Engagement Score:</b></p>		<p><b>5.60</b></p>		

4. Private Sector Engagement			Data Source	Notes/Comments
<p><b>4. Private Sector Engagement:</b> Global as well as local private sector (both private health care providers and private business) is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, innovation, and as a key stakeholder to inform the national HIV/AIDS response. There are supportive policies and mechanisms for the private sector to engage and to review and provide feedback regarding public programs, services and fiscal management of the national HIV/AIDS response. The public uses the private sector for HIV service delivery at a similar level as other health care needs.</p>	<p><b>4.1 Government Channels and Opportunities for Private Sector Engagement:</b> Does host country government have formal channels and opportunities for diverse private sector entities to engage and provide feedback on its HIV/AIDS policies, programs, and services?</p> <p> <input type="radio"/> A. There are no formal channels or opportunities  <input type="radio"/> B. There are formal channels or opportunities, but private sector is called upon in an ad hoc manner to provide inputs and feedback  <input checked="" type="radio"/> C. There are functional formal channels and opportunities for private sector engagement and feedback. Check all that apply:         </p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Corporate contributions, private philanthropy and giving</li> <li><input type="checkbox"/> Joint (i.e. public-private) supervision and quality oversight of private facilities</li> <li><input type="checkbox"/> Collection of service delivery and client satisfaction data from private providers</li> <li><input checked="" type="checkbox"/> Tracking of private training institution HRH graduates and placements</li> <li><input type="checkbox"/> Contributing to develop innovative solutions, both technology and systems innovation</li> <li><input checked="" type="checkbox"/> For technical advisory on best practices and delivery solutions</li> </ul>	<p>4.1 Score: 0.83</p>	<p>Botswana Business Coalition for AIDS (BBCA)</p>	<p>Are some donations but how does that relate to feedback? Public tracking of HRH graduates placements.</p> <p>PPM Policy for TB Program (2012)- calls for public-private oversight of private facilities for TB care however as this policy is being implemented the uptake is low (email, Feb 2016).</p> <p>GoB supports some students at private training facilities and tracks their placement.</p>

<p><b>4.2 Private Sector Partnership:</b> Do private sector partnerships with government result in stronger policy and budget decisions for HIV/AIDS programs?</p>	<p><input type="radio"/> A. Private sector does not actively engage, or private sector engagement does not influence policy and budget decisions in HIV/AIDS.</p> <p><input checked="" type="radio"/> B. Private sector engagement influences HIV/AIDS policy and budget decisions in the following areas (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> In patient advocacy and human rights</li> <li><input type="checkbox"/> In programmatic decision making</li> <li><input type="checkbox"/> In technical decision making</li> <li><input type="checkbox"/> In service delivery for both public and private providers</li> <li><input type="checkbox"/> In HIV/AIDS basket or national health financing decisions</li> <li><input checked="" type="checkbox"/> In advancing innovative sustainable financing models</li> <li><input checked="" type="checkbox"/> In HRH development, placement, and retention strategies</li> <li><input type="checkbox"/> In building capacity of private training institutions</li> <li><input type="checkbox"/> In supply chain management of essential supplies and drugs</li> </ul>	<p>4.2 Score: 0.37</p>	<p>BBCA - PPP financing</p>	<p>Historically there was a PPP for treatment of stable ART patients by private insurance organizations but that ended in 2014.</p> <p>Debswana - how do we count their contribution to response? Boitekanelo College - training HRH with GOB contributions</p>
--	--	------------------------	-----------------------------	---

<p><b>4.3 Legal Framework for Private Health Sector:</b> Does the legislative and regulatory framework make provisions for the needs of the private health sector (including hospitals, networks, and insurers)?</p>	<p>The legislative and regulatory framework makes the following provisions (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Systems are in place for service provision and/or research reporting by private sector facilities to the government.</li> <li><input checked="" type="checkbox"/> Mechanisms exist to ensure that private providers receive, understand and adhere to national guidelines/protocols for ART.</li> <li><input type="checkbox"/> Tax deductions for private health providers.</li> <li><input type="checkbox"/> Tax deductions for private training institutions training health workers.</li> <li><input checked="" type="checkbox"/> Open competition for private health providers to compete for government services.</li> <li><input type="checkbox"/> General or HIV/AIDS-specific service agreement frameworks exist between local government authorities/municipalities and private providers at the sub-national unit (e.g. district) levels.</li> <li><input checked="" type="checkbox"/> Freedom of private providers to advocate for policy, legal, and regulatory frameworks.</li> <li><input checked="" type="checkbox"/> Standardized processes for developing public-private partnerships (PPP) and memorandums of understanding (MOUs) between public and private providers.</li> </ul>	<p>4.3 Score: 1.04</p>	<p>Panel of experts, February 2016.</p>	<p>Box 1: partly. Routine reporting by some private sector facilities to gov.</p>
<p><b>4.4 Legal Framework for Private Businesses:</b> Does the legislative and regulatory framework make provisions for the needs of private businesses (local or multinational corporations)?</p>	<p>The legislative and regulatory framework makes the following provisions (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Tax deductions for health-related private businesses (i.e. pharmacists, supply chain, etc.).</li> <li><input type="checkbox"/> Systematic and timely process for private company registration and/or testing of new health products; drugs, diagnostics kits, medical devices.</li> <li><input checked="" type="checkbox"/> Standardized processes for developing public-private partnerships (PPP) and memorandums of understanding (MOUs) between local government and private business.</li> <li><input type="checkbox"/> Corporate Social Responsibility (CSR) tax policies (compulsory or optional) contributing private corporate resources to the HIV/AIDS response.</li> <li><input checked="" type="checkbox"/> Workplace policies support HIV-related services and/or benefits for employees.</li> <li><input checked="" type="checkbox"/> Existing forums between business community and government to engage in dialogue to support HIV/AIDS and public health programs.</li> </ul>	<p>4.4 Score: 0.83</p>	<p>Public Health Act (anti-discrimination against workers); Botswana PPP Policy and Implementation Framework, 2009</p>	<p>Box 2: Systematic but not timely.  Department within MOH responsible for PPPs Health Policy Development</p>

<p><b>4.5 Private Health Sector Supply:</b> Does the host country government enable private health service provision for lower and middle-income HIV patients?</p>	<p><input checked="" type="radio"/> A. There are no enablers for private health service provision for lower and middle-income HIV patients.</p> <p><input type="radio"/> B. The host country government enables private health service provision for lower and middle-income patients in the following ways (check all that apply):</p> <p><input type="checkbox"/> Private for-profit providers are eligible to procure HIV and/or ART commodities via public sector procurement channels and/or vertical programs.</p> <p><input type="checkbox"/> The private sector scope of practice for physicians, nurses and midwives serving low and middle-income patients currently includes HIV and/or ART service provision.</p>	<p>4.5 Score: 0.00</p>	<p>Expert panel, Feb 5, 2016.</p>	<p>Services provided by GoB</p>
<p><b>4.6 Private Health Sector Demand:</b> Is the percentage of people accessing HIV treatment services through the private sector similar to (or approaching) the percentage of those seeking other curative services through the private sector?</p>	<p><input checked="" type="radio"/> A. The percentage of people accessing HIV treatment services through the private sector is significantly lower than the percentage seeking other curative services through the private sector.</p> <p><input type="radio"/> B. The percentage of people accessing HIV treatment services through the private sector is similar to (or approaching) the percentage seeking other curative services through the private sector due to the following factors (check all that apply):</p> <p><input type="checkbox"/> HIV-related services/products are covered by national health insurance.</p> <p><input type="checkbox"/> HIV-related services/products are covered by private or other health insurance.</p> <p><input type="checkbox"/> Adequate risk pooling exists for HIV services.</p> <p><input type="checkbox"/> Models currently exist for cost-recovery for ART.</p> <p><input type="checkbox"/> HIV drugs are not subject to higher pharmaceutical mark-ups than other drugs in the market.</p>	<p>4.6 Score: 0.00</p>	<p>Expert panel, Feb 5, 2016.</p>	<p>Most people access services through the GoB.</p>
<p><b>Private Sector Engagement Score:</b></p>		<p>3.08</p>		

5. Public Access to Information: Host government widely disseminates timely and reliable information on the implementation of HIV/AIDS policies and programs, including goals, progress and challenges towards achieving HIV/AIDS targets, as well as fiscal information (public revenues, budgets, expenditures, large contract awards , etc.) related to HIV/AIDS. Program and audit reports are published publically. Efforts are made to ensure public has access to data through print distribution, websites, radio or other methods of disseminating information.				Source of Data	Notes/Comments
<p><b>5.1 Surveillance and Survey Transparency:</b> Does the host country government ensure that HIV/AIDS surveillance and survey data, or at least a summary report of data, and analyses are made available to stakeholders and general public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public, or they are made available 3 or more years after the date of collection.</p> <p><input checked="" type="radio"/> B. The host country government makes HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public within 1-3 years.</p> <p><input type="radio"/> C. The host country government makes HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public within the same year.</p>	<p>5.1 Score: 1.00</p>	<p>BAIS</p>		
<p><b>5.2 Expenditure Transparency:</b> Does the host country government make annual HIV/AIDS expenditure data, or at a minimum at least a summary of it, available to stakeholders and the public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS expenditure summary reports available to stakeholders and the general public or they are made available 3 or more years after the date of expenditures.</p> <p><input checked="" type="radio"/> B. The host country government makes HIV/AIDS expenditure summary reports available to stakeholders and the general public or website within 1-3 years after date of expenditures.</p> <p><input type="radio"/> C. The host country government makes HIV/AIDS expenditure summary reports available to stakeholders and the general public within 1 year after expenditures.</p>	<p>5.2 Score: 1.00</p>	<p>NASA; NHA</p>		
<p><b>5.3 Performance and Service Delivery Transparency:</b> Does the host country government make annual HIV/AIDS program performance and service delivery data (or at a minimum of summary of it) available to stakeholders and the public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS program performance and service delivery summary reports available to stakeholders and the general public or they are made available 3 or more years after the date of programming.</p> <p><input type="radio"/> B. The host country government makes HIV/AIDS program performance and service delivery summary reports available to stakeholders and the general public within 1-3 years after date of programming.</p> <p><input checked="" type="radio"/> C. The host country government makes HIV/AIDS program performance and service delivery summary reports available to stakeholders and the general public within 1 year after date of programming .</p>	<p>5.3 Score: 2.00</p>	<p>2013 GAPR(Global AIDS progress report) annually since 2013, DMSAC reports</p>	<p>GAPR Report is every two years rather than annual, but it is a regularly occurring public accounting of national HIV/AIDS program progress and results. Civil Society orgs state that District AIDS Committee CHANGEreports are also shared at the district level.</p>	

<p><b>5.4 Procurement Transparency:</b> Does the host country government make government HIV/AIDS procurements public in a timely way?</p>	<p><input type="radio"/> A. Host country government does not make any HIV/AIDS procurements.</p> <p><input type="radio"/> B. Host country government makes HIV/AIDS procurements, but neither procurement tender nor award details are publicly available.</p> <p><input type="radio"/> C. Host country government makes HIV/AIDS procurements, and tender, but not award, details are publicly available.</p> <p><input checked="" type="radio"/> D. Host Country government makes HIV/AIDS procurements, and both tender and award details available.</p>	<p>5.4 Score: 2.00</p>	<p>Government Gazette - 15 Pula available to public, includes procurements and tenders. Award details published in daily PPAD newspaper.</p>	<p>Procurement done through normal gov procurement channels. However, process does not really result in cost efficiencies - sometimes local bids selected over lower-cost bids.</p>
<p><b>5.5 Institutionalized Education System:</b> Is there a government agency that is explicitly responsible for educating the public about HIV?</p>	<p><input type="radio"/> A. There is no government institution that is responsible for this function and no other groups provide education.</p> <p><input type="radio"/> B. There is no government institution that is responsible for this function but at least one of the following provides education:</p> <p><input type="checkbox"/> Civil society</p> <p><input type="checkbox"/> Media</p> <p><input type="checkbox"/> Private sector</p> <p><input checked="" type="radio"/> C. There is a government institution that is responsible for, and is providing, scientifically accurate information on HIV/AIDS.</p>	<p>5.5 Score: 2.00</p>	<p>MoH and NACA</p>	
<p><b>Public Access to Information Score: 8.00</b></p>				

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN A

## Domain B. National Health System and Service Delivery

What Success Looks Like: Host country institutions (inclusive of government, NGOs, civil society, and the private sector), the domestic workforce, and local health systems constitute the primary vehicles through which HIV/AIDS programs and services are managed and delivered. Optimally, national, sub-national and local governments have achieved high and appropriate coverage of a range of quality, life-saving prevention, treatment, and care services and interventions. There is a high demand for HIV/AIDS services, which are accessible and affordable to poor and vulnerable populations at risk of infection (i.e. key populations, discordant couples, exposed infants), are infected and/or are affected by the HIV/AIDS epidemic.

**6. Service Delivery:** The host country government at national, sub-national and facility levels facilitates planning and management of, access to and linkages between facility- and community-based HIV services.

**Data Source**

**Notes/Comments**

<p><b>6.1 Responsiveness of facility-based services to demand for HIV services:</b> Do public facilities respond to and generate demand for HIV services to meet local needs? (Check all that apply.)</p>	<p><input checked="" type="checkbox"/> Public facilities are able to tailor services to accommodate demand (e.g., modify or add hours/days of operations; add/second additional staff during periods of high patient influx; customize scope of HIV services offered; adapt organization/model of service deliver to patient flow)</p> <p><input checked="" type="checkbox"/> Public facilities are able to situate services in proximity to high-HIV burden locations or populations (e.g., mobile clinics)</p> <p><input checked="" type="checkbox"/> There is evidence that public facilities in high burden areas and/or serving high-burden populations generate demand for HIV services</p>	<p>6.1 Score:      1.11</p>	<p>Expert panel, Feb 5, 2016.</p>	<p>Clinics often need a directive from MoH to alter services; however a few examples indicate ability to tailor to accommodate clients. Examples: i) some clinics expanded to 24 hour services; and ii) smaller clinics now provide ART in response to client demand.</p>
<p><b>6.2 Responsiveness of community-based HIV/AIDS services:</b> Has the host country standardized the design and implementation of community-based HIV services?</p>	<p>The host country has standardized the following design and implementation components of community-based HIV services through (check all that apply):</p> <p><input checked="" type="checkbox"/> Formalized mechanisms of participation by communities, high-burden populations and/or civil society engagement in delivery or oversight of services</p> <p><input checked="" type="checkbox"/> National guidelines detailing how to operationalize HIV services in communities</p> <p><input checked="" type="checkbox"/> Providing official recognition to skilled human resources (e.g. community health</p> <p><input checked="" type="checkbox"/> Providing financial support for community-based services</p> <p><input checked="" type="checkbox"/> Providing supply chain support for community-based services</p> <p><input type="checkbox"/> Supporting linkages between facility- and community-based services through formalized bidirectional referral services (e.g., use of national reporting systems to refer and monitor referrals for completeness)</p>	<p>6.2 Score:      0.93</p>	<p>APC delivery model NSF II details testing operations in communities NOP - national strategies and training at community level MOH provides certificate to skilled community health workers</p>	<p>Historically CBOs focused on prevention not direct service delivery. Now they are moving into this work area and developing formalized referral systems.</p>
<p><b>6.3 Domestic Financing of Service Delivery:</b> To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services in high burden areas (i.e. excluding any external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> D. Host country institutions provide most (approx. 50-89%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input checked="" type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) financing for delivery of HIV/AIDS services in high burden areas</p>	<p>6.3 Score:      1.67</p>	<p>NASA, NASA Powerpoint, 2013</p>	

<p><b>6.4 Domestic Provision of Service Delivery:</b> To what extent do host country institutions (public, private, or voluntary sector) deliver HIV/AIDS services in high burden areas without external technical assistance from donors?</p>	<p><input type="radio"/> A. HIV/AIDS services in high burden areas are primarily delivered by external agencies, organizations, or institutions.</p> <p><input type="radio"/> B. Host country institutions deliver HIV/AIDS services in high burden areas but with substantial external technical assistance.</p> <p><input checked="" type="radio"/> C. Host country institutions deliver HIV/AIDS services in high burden areas with some external technical assistance.</p> <p><input type="radio"/> D. Host country institutions deliver HIV/AIDS services in high burden areas with minimal or no external technical assistance.</p>	<p>6.4 Score: 0.74</p>	<p>Expert panel, Feb 5, 2016.</p>	<p>PEPFAR and Global Fund provide technical assistance.</p>
<p><b>6.5 Domestic Financing of Service Delivery for Key Populations:</b> To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services to key populations in high burden areas (i.e. without external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input checked="" type="radio"/> A. Host country institutions provide no or minimal (0%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> D. Host country institutions provide most (approx. 50-89%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p>	<p>6.5 Score: 0.00</p>	<p>Expert panel, Feb 5, 2016; Government data: NASA, NHA.</p>	<p>MOH policy is to provide HIV/AIDS treatment and care to any PLHIV citizen in Botswana, regardless of gender, identity, or occupation and in fact MOH covers cost of ARVs for all citizens. However in practice, no budget line item targets key populations. Instead, MOH requested funds for KP but asked that the money go directly to Botswana Family Welfare Association (BOFWA) for KP services.</p>
<p><b>6.6 Domestic Provision of Service Delivery for Key Populations:</b> To what extent do host country institutions (public, private, or voluntary sector) deliver HIV/AIDS services to key populations in high burden areas without external technical assistance from donors?</p>	<p><input checked="" type="radio"/> A. HIV/AIDS services to key populations are primarily delivered by external agencies, organizations, or institutions.</p> <p><input type="radio"/> B. Host country institutions deliver HIV/AIDS services to key populations but with substantial external technical assistance.</p> <p><input type="radio"/> C. Host country institutions deliver HIV/AIDS services to key populations with some external technical assistance.</p> <p><input type="radio"/> D. Host country institutions deliver HIV/AIDS services to key populations with minimal or no external technical assistance.</p>	<p>6.6 Score: 0.00</p>	<p>Expert panel, Feb 5, 2016.</p>	<p>MOH policy is to provide HIV/AIDS treatment and care to any PLHIV citizen in Botswana, regardless of gender, identity, or occupation. However in practice, there are no services targeting FSW or MSM and anecdotal reports of discrimination in facilities may discourage routine use. Efforts to indirectly support services for KP through support of BOFWA continue</p>
<p><b>6.7 National Service Delivery Capacity:</b> Do national health authorities have the capacity to effectively plan and manage HIV services in high HIV burden areas?</p>	<p>The national MOH (check all that apply):</p> <p><input checked="" type="checkbox"/> Translates national policies/strategies into sub-national level HIV/AIDS strategic plan and response activities.</p> <p><input type="checkbox"/> Uses epidemiologic and program data to measure effectiveness of sub-national level programs in delivering needed HIV/AIDS services in right locations.</p> <p><input checked="" type="checkbox"/> Assesses current and future staffing needs based on HIV/AIDS program goals and</p> <p><input checked="" type="checkbox"/> Develops sub-national level budgets that allocate resources to high burden service delivery locations.</p> <p><input type="checkbox"/> Effectively engages with civil society in program planning and evaluation of services .</p> <p><input type="checkbox"/> Designs a staff performance management plan to assure that staff working at high burden sites maintain good clinical and technical skills, such as through training and/or mentorship.</p>	<p>6.7 Score: 0.56</p>	<p>HRH Plan, staffing norms, National budget, Expert panel, Feb 5, 2016.</p>	<p>Data is used to measure geographic access to services but not to measure effectiveness of programs.</p> <p>HRH Plan and staffing norms used to plan for staffing across entire MOH including HIV/AIDS. Staffing for HIV/AIDS base on number of patients on ARVs. National budget allocates resources by district.</p> <p>Huge gap in engagement with SOs for planning and evaluation; need participation on both sides.</p> <p>Training is targeted based on need; allocated by staffing and patients.</p>

<p><b>6.8 Sub-national Service Delivery Capacity:</b> Do sub-national health authorities (i.e., district, provincial) have the capacity to effectively plan and manage HIV services sufficiently to achieve sustainable epidemic control?</p>	<p>Sub-national health authorities (check all that apply):</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Translate national policies/strategies into sub-national level HIV/AIDS strategic plan and response activities.</li> <li><input checked="" type="checkbox"/> Use epidemiologic and program data to measure effectiveness of sub-national level programs in delivering needed HIV/AIDS services in right locations.</li> <li><input checked="" type="checkbox"/> Assess current and future staffing needs based on HIV/AIDS program goals and budget realities for high burden locations.</li> <li><input checked="" type="checkbox"/> Develop sub-national level budgets that allocate resources to high burden service delivery locations.</li> <li><input checked="" type="checkbox"/> Effectively engage with civil society in program planning and evaluation of services.</li> <li><input checked="" type="checkbox"/> Design a staff performance management plan to assure that staff working at high burden sites maintain good clinical and technical skills, such as through training and/or mentorship.</li> </ul>	<p>6.8 Score: 1.11</p>	<p>DMSAC workplans</p>	<p>DHMT uses data to look at services, e.g., PMTCT.</p>
<b>Service Delivery Score</b>		<b>6.11</b>		
<p><b>7. Human Resources for Health:</b> HRH staffing decisions for those working on HIV/AIDS are based on use of HR data and are aligned with national plans. Host country has sufficient numbers and categories of competent health care workers and volunteers to provide quality HIV/AIDS prevention, care and treatment services in health facilities and in the community. Host country trains, deploys and compensates health workers providing HIV/AIDS services through local public and/or private resources and systems. Host country has a strategy or plan for transitioning staff funded by donors.</p>			<b>Data Source</b>	<b>Notes/Comments</b>
<p><b>7.1 HRH Supply:</b> To what extent is the health worker supply adequate to enable the volume and quality of HIV/AIDS services needed for sustained epidemic control at the facility and/or comm site level?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and skills mix of health care providers</li> <li><input type="checkbox"/> The country's health workers are adequately deployed to, or distributed within, facilities and communities with high HIV burden</li> <li><input checked="" type="checkbox"/> The country has developed retention schemes that address health worker vacancy or attrition in high HIV burden areas</li> <li><input checked="" type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and appropriate skills mix of social service workers to deliver social services to vulnerable children</li> </ul>	<p>7.1 Score: 0.67</p>	<p>Scarce Skills is an allowance given to compensate for rural placement. This applies to civil service jobs nationwide, not just HIV/AIDS. Social Development Framework, 2010</p>	<p>There is a shortage of Doctors in Clinics. There are only 669 doctors country wide (old number from Health Professionals / Bots Professional Councils). HRIS is not up and running, so records of total doctors and nurses are unavailable. The MOH concurs there is a shortage of doctors but believes the number of nurses are adequate. The MOH cannot produce a vacancy report as their Infinium data is currently being migrated to their Oracle system. Regarding pre-service training, institutions are producing adequate numbers but GOB is not placing adequate numbers into service.</p>
<p><b>7.2 HRH transition:</b> What is the status of transitioning PEPFAR and other donor supported HIV/AIDS health worker salaries to local financing/compensation?</p>	<ul style="list-style-type: none"> <li><input type="radio"/> A. There is no inventory or plan for transition of donor-supported health workers</li> <li><input checked="" type="radio"/> B. There is an inventory of donor-supported health workers, but no official plan to transition these staff to local support</li> <li><input type="radio"/> C. There is an inventory and plan for transition of donor-supported workers, but it has not yet been implemented</li> <li><input type="radio"/> D. There is an inventory and plan for donor-supported workers to be transitioned, and staff are being transitioned according to this plan</li> <li><input type="radio"/> E. No plan is necessary because all HIV/AIDS health worker salaries are already locally financed/compensated</li> </ul>	<p>7.2 Score: 0.33</p>	<p>Botswana PFP documentation</p>	<p>PEPFAR is currently supporting very few HCWs providing direct services -- there is an inventory, but no formal plan for the transition of these positions.</p>

<p><b>7.3 Domestic funding for HRH:</b> What proportion of health worker (doctors, nurses, midwives, and CHW) salaries are supported with domestic public or private resources (i.e. excluding donor resources)?</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) health worker salaries</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) health worker salaries</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) health worker salaries</p> <p><input type="radio"/> D. Host country institutions provide most (approx. 50-89%) health worker salaries</p> <p><input checked="" type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) health worker salaries</p>	<p>7.3 Score: 3.33</p>	<p>PEPFAR funded positions budget. MoH Budget</p>	<p>Apart from the PEPFAR support, virtually all HCW are paid for by the GOB.</p>
<p><b>7.4 Pre-service:</b> Do current pre-service education curricula for health workers providing HIV/AIDS services include HIV content that has been updated in last three years?</p>	<p><input checked="" type="radio"/> A. Pre-service education institutions do not have HIV content, or HIV content used by pre-service education institutions is out of date (not updated within 3 years)</p> <p><input type="radio"/> B. Pre-service institutions have updated HIV/AIDS content within the last three years (check all that apply):</p> <p><input type="checkbox"/> Updated content reflects national standards of practice for cadres offering HIV/AIDS-related services</p> <p><input type="checkbox"/> Institutions maintain process for continuously updating content, including HIV/AIDS content</p> <p><input type="checkbox"/> Updated curricula contain training related to stigma &amp; discrimination of PLWHA</p> <p><input type="checkbox"/> Institutions track student employment after graduation to inform planning</p>	<p>7.4 Score: 0.00</p>	<p>Lab Curriculum, and other curricula dated before 2012</p> <p>New Univ of Botswana curricula to be evaluated/updated after 4 years.</p>	<p>Most curricula last updated in 2008 - curriculums available in hard copy only. MOH states that the curricula are currently undergoing a review and update, however the lecturers have been using the updated guidelines to train new HCW.</p>
<p><b>7.5 In-service Training:</b> To what extent does the host country government (through public, private, and/or voluntary sectors) plan and implement HIV/AIDS in-service training necessary to equip health workers for sustained epidemic control?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p>Check all that apply among A, B, C, D:</p> <p><input checked="" type="checkbox"/> A. The host country government provides the following support for in-service training in the country (check ONE):</p> <p><input type="checkbox"/> Host country government implements no (0%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements minimal (approx. 1-9%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements some (approx. 10-49%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements most (approx. 50-89%) HIV/AIDS in-service training</p> <p><input checked="" type="checkbox"/> Host country government implements all or almost all (approx. 90%+) HIV/AIDS in-service training</p> <p><input checked="" type="checkbox"/> B. The host country government has a national plan for institutionalizing (establishing capacity within local institutions to deliver) donor-supported in-service training in HIV/AIDS</p> <p><input type="checkbox"/> C. The host country government requires continuing professional development, a form of in-service training, for re-licensure for key clinicians</p> <p><input checked="" type="checkbox"/> D. The host country government maintains a database to track training for HIV/AIDS, and allocates training based on need (e.g. focusing on high burden areas)</p>	<p>7.5 Score: 1.00</p>	<p>2012 National guidelines and KITSO program</p>	<p>Different programs are at different stages of institutionalization. For example the Corporate Services Department "Leadership and Management" course is managed by GOB and the GOB is now budgeting for this training course, although this was PEPFAR funded. Another example is the Kitso training - historically funded by PEPFAR through BHP, now the Kitso training unit is housed at MOH and funded by PEPFAR through the GOB Mega-COag, and will also be supported through the new TBD FOA.</p> <p>Continuing education program for MOH nurses but under-developed for other clinicians.</p> <p>Database to track training exists but use for allocating staff is inadequate.</p>

<p><b>7.6 HR Data Collection and Use:</b> Does the country systematically collect health workforce data, such as through a Human Resource Information Systems (HRIS), for HIV/AIDS services and/or health workforce planning and management?</p>	<p><input type="radio"/> A. There is no HRIS in country and data on the health workforce is not collected systematically for planning and management</p> <p><input type="radio"/> B. There is no HRIS in country, but some data is collected for planning and management</p> <p><input type="checkbox"/> Registration and re-licensure data for key professionals is collected and used for planning and management</p> <p><input type="checkbox"/> MOH health worker employee data (number, cadre, and location of employment) is collected and used</p> <p><input type="checkbox"/> Routine assessments are conducted regarding health worker staffing at health facility and/or community sites</p> <p><input checked="" type="radio"/> C. There is an HRIS (an interoperable system that captures at least regulatory and deployment data on health workers) in country:</p> <p><input checked="" type="checkbox"/> The HRIS is primarily financed and managed by host country institutions</p> <p><input checked="" type="checkbox"/> There is a national strategy or approach to interoperability for HRIS</p> <p><input type="checkbox"/> The government produces HR data from the system at least annually</p> <p><input type="checkbox"/> Host country institutions use HR data from the system for planning and management (e.g. health worker deployment)</p>	<p>7.6 Score: 1.00</p>	<p>Panel of experts, February 2016. Follow-up email from GoB, February 2016.</p>	<p>ORACLE is a database tracking system for all civil servants.</p> <p>An HRIS pilot, funded by PEPFAR, was specific for HRH in 2 districts; however it was never adopted nationally.</p>

All or almost all (approx. 90%+) laboratory services are financed by domestic resources.</p>	<p>8.5 Score: 3.33</p>	<p>Expert panel, Feb 5, 2016; MOH Budget; NASA</p>	
<b>Laboratory Score:</b>		<b>5.69</b>		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN B

## Domain C. Strategic Investments, Efficiency, and Sustainable Financing

What Success Looks Like: Host country government is aware of the financial resources required to effectively and efficiently meet its national HIV/AIDS prevention, care and treatment targets. HCG actively seeks, solicits and or generates the necessary financial resources, ensures sufficient resource commitments, and uses data to strategically allocate funding and maximize investments.

	Data Source	Notes/Comments
<p><b>11. Domestic Resource Mobilization:</b> The partner country budgets for its HIV/AIDS response and makes adequate resource commitments and expenditures to achieve national HIV/AIDS goals for epidemic control in line with its financial ability.</p>		
<p><b>11.1 Domestic Budget:</b> To what extent does the national budget explicitly account for the national HIV/AIDS response?</p>	<p> <input type="radio"/> A. There is no explicit funding for HIV/AIDS in the national budget.  <input checked="" type="radio"/> B. There is explicit HIV/AIDS funding within the national budget.  <input checked="" type="checkbox"/> The HIV/AIDS budget is program-based across ministries  <input type="checkbox"/> The budget includes or references indicators of progress toward national HIV/AIDS strategy goals  <input type="checkbox"/> The budget includes specific HIV/AIDS service delivery targets  <input type="checkbox"/> National budget reflects all sources of funding for HIV, including from external donors                 </p>	<p>11.1 Score: 1.39</p> <p>National Budget and NACA</p> <p>Each Ministry has a line item for HIV. NACA controls remaining discretionary HIV/AIDS budget. By April 2016 NACA's budget will be combined within the MOH budget.</p>
<p><b>11.2 Annual Targets:</b> Did the most recent budget as executed achieve stated annual HIV/AIDS goals?  (if exact or approximate percentage known, please note in Comments column)</p>	<p> <input checked="" type="radio"/> A. There are no HIV/AIDS goals/targets articulated in the national budget  <input type="radio"/> B. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, but none (0%) were attained.  <input type="radio"/> C. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, but very few (approx. 1-9%) were attained.  <input type="radio"/> D. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and some (approx. 10-49%) were reached.  <input type="radio"/> E. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and most (approx. 50-89%) were reached.  <input type="radio"/> F. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and all or almost all (approx. 90%+) were reached.                 </p>	<p>11.2 Score: 0.00</p> <p>National budget</p>

<p><b>11.3 Budget Execution:</b> For the previous three years, what was the average execution rate for budgeted domestic HIV/AIDS resources (i.e. excluding any donor funds) at both the national and subnational level?</p> <p>(If subnational data does not exist or is not available, answer the question for the national level. Note level covered in the comments column)</p>	<p><input type="radio"/> A. Information is not available</p> <p><input type="radio"/> B. There is no national HIV/AIDS budget, or the execution rate was 0%.</p> <p><input type="radio"/> C. 1-9%</p> <p><input type="radio"/> D. 10-49%</p> <p><input checked="" type="radio"/> E. 50-89%</p> <p><input type="radio"/> F. 90% or greater</p>	<p>11.3 Score: 1.67</p>	<p>Monthly budget expenditure rates</p>	<p>Some challenges with spending down budgeted items in supply chain procurement.</p> <p>GOB Fiscal year 2014-2015: warranted provision 352,862,455.07 actual expenditure 348,569,337.83 percent expenditure 98.78%</p> <p>GOB Fiscal year 2015-2016 to date: warranted provision 560,365,220.00 actual expenditure 432,811,072.83 percent expenditure 77.23%</p>
<p><b>11.4 PLACEHOLDER</b> for future indicator measuring country's financial ability to pay for its HIV response (will not be included in SID for COP 16)</p>				
<p><b>11.5 Domestic Spending:</b> What percent of the annual national HIV response is financed with domestic public and domestic private sector HIV funding (excluding out-of-pocket and donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. None (0%) is financed with domestic funding.</p> <p><input type="radio"/> B. Very little (approx. 1-9%) is financed with domestic funding.</p> <p><input type="radio"/> C. Some (approx. 10-49%) is financed with domestic funding.</p> <p><input checked="" type="radio"/> D. Most (approx. 50-89%) is financed with domestic funding.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) is financed with domestic funding.</p>	<p>11.6 Score: 2.50</p>	<p>Sept. 2013 USAID Transitional Financing Report National Health Accounts (preliminary data Dec 2015)</p>	<p>55.2% domestic public and 2.9% domestic private for 2012, for a domestic total of 58.1% (these figures represent an adjustment of the NASA figures, which were 69.6% and 1.9%, respectively, for domestic public and domestic private).</p>
<p><b>Domestic Resource Mobilization Score:</b></p>		<p><b>5.56</b></p>		

12. Technical and Allocative Efficiencies: The host country analyzes and uses relevant HIV/AIDS epidemiological, health, health workforce, and economic data to inform HIV/AIDS investment decisions. For maximizing impact, data are used to choose which high impact program services and interventions are to be implemented, where resources should be allocated, and what populations demonstrate the highest need and should be targeted (i.e. the right thing at the right place and at the right time). Unit costs are tracked and steps are taken to improve HIV/AIDS outcomes within the available resource envelope (or achieves comparable outcomes with fewer resources).					Data Source	Notes/Comments
<p><b>12.1 Resource Allocation Process:</b> Does the partner country government utilize a recognized data-driven model to inform the allocation of domestic (i.e. non-donor) public HIV resources?</p> <p>(note: full score achieved by selecting one checkbox)</p>	<p><input type="radio"/> A. The host country government does not use one of the mechanisms listed below to inform the allocation of their resources.</p> <p><input checked="" type="radio"/> B. The host country government does use the following mechanisms to inform the allocation of their resources (check all that apply):</p> <p><input type="checkbox"/> Optima</p> <p><input checked="" type="checkbox"/> Spectrum (including EPP and Goals)</p> <p><input type="checkbox"/> AIDS Epidemic Model (AEM)</p> <p><input checked="" type="checkbox"/> Modes of Transmission (MOT) Model</p> <p><input type="checkbox"/> Other recognized process or model (specify in notes column)</p>	<p>12.1 Score: 1.43</p>	<p>Spectrum (2014-2015) MOT (2010)</p>	<p>Spectrum (2014-2015) used by UNAIDS for Investment Case and Test and Treat costing exercise. MOT (2010) used by NACA</p>		
<p><b>12.2 High Impact Interventions:</b> What percentage of site-level point of service HIV domestic public sector resources (excluding any donor funds) are being allocated to the following set of interventions: provision of ART, VMMC, PMTCT, HTC, condoms, and targeted prevention for key and priority populations?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Information not available</p> <p><input type="radio"/> B. No (0%) site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> D. Some (approx. 10-49%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input checked="" type="radio"/> E. Most (approx. 50-89%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p>	<p>12.2 Score: 1.07</p>	<p>NASA (2012 report)</p>	<p>258 mil Pula for activities outside of these high impact interventions (e.g., management, HRH, research) out of 2.2 billion Pula (27%) - check slide from Dr. Sun</p>		

<p><b>12.3 Geographic Allocation:</b> Of central government HIV-specific resources (excluding any donor funds) allocated to geographic subunits in the most recent year available, what percentage is being allocated in the highest burden geographic areas (i.e. districts that cumulatively account for 80% of PLHIV)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input checked="" type="radio"/> A. Information not available.</p> <p><input type="radio"/> B. No resources (0%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> C. Minimal resources (approx. 1-9%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> D. Some resources (approx. 10-49%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> E. Most resources (approx. 50-89%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> F. All or almost all resources (approx. 90%+) are targeting the highest burden geographic areas.</p>	<p>12.3 Score: 0.00</p>	<p>Per MOH Staff at SID meeting, Feb 8, 2016</p>	<p>GOB takes position of equity and provides funding to all districts with allocation based on facilities per district. Disease burden by district is available but national budget by district is not available to allow us to determine the proportion of funds allocated to high burden geographic areas.</p>
<p><b>12.4 Data-Driven Reprogramming:</b> Do host country government policies/systems allow for reprogramming domestic investments based on new or updated program data during the government funding cycle?</p>	<p><input type="radio"/> A. There is no system for funding cycle reprogramming</p> <p><input checked="" type="radio"/> B. There is a policy/system that allows for funding cycle reprogramming, but it is seldom used.</p> <p><input type="radio"/> C. There is a system that allows for funding cycle reprogramming and reprogramming is done as per the policy but not based on data</p> <p><input type="radio"/> D. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy and is based on data</p>	<p>Q3 Score: 0.48</p>	<p>Per MOH Staff at SID meeting, Feb 8, 2016.</p>	<p>Prior to end of year, MOH reviews unspent funds and may reallocate to a specific tangible item (e.g., procurement of medicines or equipment). Any unused money by end of year from MOH goes back to treasury and gets reallocated in following fiscal year.</p>
<p><b>12.5 Unit Costs:</b> Does the host country government use recent expenditure data or cost analysis (i.e. data from within the last three years) to estimate unit costs of HIV/AIDS services for budgeting or planning purposes?</p> <p>(note: full score can be achieved without checking all disaggregate boxes).</p>	<p><input type="radio"/> A. The host country government does not use recent expenditure data or cost analysis to estimate unit costs</p> <p><input checked="" type="radio"/> B. The host country government uses recent expenditure data or cost analysis to estimate unit costs for (check all that apply):</p> <p><input checked="" type="checkbox"/> HIV Testing</p> <p><input checked="" type="checkbox"/> Care and Support</p> <p><input checked="" type="checkbox"/> ART</p> <p><input checked="" type="checkbox"/> PMTCT</p> <p><input checked="" type="checkbox"/> VMMC</p> <p><input type="checkbox"/> OVC Service Package</p> <p><input type="checkbox"/> Key population Interventions</p>	<p>12.5 Score: 1.43</p>	<p>Essential health package study (Oct 2015)</p>	<p>The MOH completed a study on costing the essential health package, have costed out ARV regimens, PMTCT, etc. PEPFAR has supported a number of these studies, so this is not yet routinely and regularly conducted by the GOB.</p>

<p><b>12.6 Improving Efficiency:</b> Has the partner country achieved any of the following efficiency improvements through actions taken within the last three years?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> Improved operations or interventions based on the findings of cost-effectiveness or efficiency studies</p> <p><input type="checkbox"/> Reduced overhead costs by streamlining management</p> <p><input checked="" type="checkbox"/> Lowered unit costs by reducing fragmentation, i.e. pooled procurement, resource pooling, etc.</p> <p><input type="checkbox"/> Improved procurement competition</p> <p><input type="checkbox"/> Integrated HIV/AIDS into national or subnational insurance schemes (private or public -- need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated HIV into primary care services with linkages to specialist care (need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated TB and HIV services, including ART initiation in TB treatment settings and TB screening and treatment in HIV care settings (need not be within last three years)</p> <p><input checked="" type="checkbox"/> Integrated HIV and MCH services, including ART initiated and maintained in eligible pregnant and postpartum women and in infants at maternal and child health care settings (need not be within last three years)</p> <p><input type="checkbox"/> Developed and implemented other new and more efficient models of HIV service delivery (specify in comments)</p>	<p>12.6 Score: 0.63</p>	<p>Costing studies; New Treatment Guidelines; email from procurement expert.</p>	<p>Costing studies completed but translation of findings into improved operations is in development.</p> <p>Efficiencies are under consideration in the new Treatment Guidelines (due 2016) to reduce frequencies of clinical visits, lab testing, ARV pickups.</p> <p>3rd Box: Yes-- through the establishment of 2-3 year framework contracts; emergency procurements, reduced product expiries, and fixed pricing for the life of the contract.</p> <p>Box 4: International-- yes Local contracts-- no</p> <p>In an effort to promote local suppliers, the local pricing is not competitive. Once local suppliers have obtains products from international manufacturers</p>
<p><b>12.7 ARV Benchmark prices:</b> How do the costs of ARVs (most common first line regimen) purchased in the previous year by the partner government using domestic resources compare to international benchmark prices for that year?</p> <p>(Use the "factory cost" of purchased commodities, excluding transport costs, distribution costs, etc.)</p>	<p><input type="radio"/> A. Partner government did not pay for any ARVs using domestic resources in the previous year.</p> <p><input type="radio"/> B. Average price paid for ARVs by the partner government in the previous year was more than 50% greater than the international benchmark price for that regimen.</p> <p><input checked="" type="radio"/> C. Average price paid for ARVs by the partner government in the previous year was 10-50% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> D. Average price paid for ARVs by the partner government in the previous year was 1-10% greater than the international benchmark price for that regimen.</p> <p><input type="radio"/> E. Average price paid for ARVs by the partner government in the previous year was below or equal to the international benchmark price for that regimen.</p>	<p>12.7 Score: 0.71</p>	<p>CMS Records, per February 17, 2016 email.</p> <p>WHO Global Price Reporting Mechanism (<a href="http://apps.who.int/hiv/amds/price/hd/Default.aspx">http://apps.who.int/hiv/amds/price/hd/Default.aspx</a>)</p>	<p>Per ARV quantification data extract from Quantimed for GOB 16/17 financial year, the annual cost for Atripla first-line regimen for 2015/2016 was \$132.74. That is 18% above the 2015 international median annual cost for TDF/FTC/EFV treatment (\$112.14). From data provided by CMS the current price for Atripla is \$10.02. However, data used for quantification provides average price for procurements done in the whole year, including prices paid for emergency orders. (Ideally the analysis should be based on a number of ARVs and not one)</p> <p>Dr. Sun - efficiency gains are lost when GOB has to pay for emergency ARV procurement at much higher cost. Can we see if data is avail on coss for routine vx emergency procurements.</p>
<p><b>Technical and Allocative Efficiencies Score:</b></p>		<p><b>5.75</b></p>		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN C

## Domain D: Strategic Information

What Success Looks Like: Using local and national systems, the host country government collects, analyzes and makes available timely, comprehensive, and quality HIV/AIDS data (including epidemiological, economic/financial, and performance data) that can be used to inform policy, program and funding decisions.

			Data Source	Notes/Comments
<p><b>13. Epidemiological and Health data:</b> Host Country Government routinely collects, analyzes and makes available data on the HIV/AIDS epidemic and its effects on health outcomes. HIV/AIDS epidemiological and health data include size estimates of key populations, PLHIV, HIV incidence, HIV prevalence, viral load and AIDS-related mortality rates.</p>				
<p><b>13.1 Who Leads General Population Surveys &amp; Surveillance:</b> To what extent does the host country government lead and manage planning and implementation of the HIV/AIDS portfolio of general population epidemiological surveys and/or surveillance activities (population-based household surveys, case reporting/clinical surveillance, drug resistance surveillance, etc.)?</p>	<ul style="list-style-type: none"> <li><input type="radio"/> A. No HIV/AIDS general population surveys or surveillance activities have been conducted within the past 5 years</li> <li><input type="radio"/> B. Surveys &amp; surveillance activities are primarily planned and implemented by external agencies, organizations or institutions</li> <li><input type="radio"/> C. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies</li> <li><input checked="" type="radio"/> D. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with some technical assistance from external agencies</li> <li><input type="radio"/> E. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with minimal or no technical assistance from external agencies</li> </ul>	<p>13.1 Score: 0.71</p>	<p>BAIS IV report (Nov 2013), YRBSS report, HIV Sentinel Surveillance survey (2011).</p>	<p>Statistics Botswana Leads the implementation of surveys, relevant government ministry leads the planning for each survey (i.e. MOE leads the YRBSS, NACA leads BAIS). BAIS is done with minimal TA; however TA is provided from external partners for YRBSS and MOPS. HIV Sentinel Surv has been delayed due to a change in protocol that has received external TA. An upcoming Violence Against Children survey will receive substantial TA.</p>
<p><b>13.2 Who Leads Key Population Surveys &amp; Surveillance:</b> To what extent does the host country government lead &amp; manage planning and implementation of the HIV/AIDS portfolio of key population epidemiological surveys and/or behavioral surveillance activities (IBBS, size estimation studies, etc.)?</p>	<ul style="list-style-type: none"> <li><input type="radio"/> A. No HIV/AIDS key population surveys or surveillance activities have been conducted within the past 5 years</li> <li><input type="radio"/> B. Surveys &amp; surveillance activities are primarily planned and implemented by external agencies, organizations or institutions</li> <li><input checked="" type="radio"/> C. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies</li> <li><input type="radio"/> D. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, with some technical assistance from external agencies</li> <li><input type="radio"/> E. Surveys &amp; surveillance activities are planned and implemented by the host country government/other domestic institution, without minimal or no technical assistance from external agencies</li> </ul>	<p>13.2 Score: 0.48</p>	<p>BBSS 2012</p>	<p>Substantial TA from WHO and PEPFAR</p>
<p><b>13.3 Who Finances General Population Surveys &amp; Surveillance:</b> To what extent does the host country government fund the HIV/AIDS portfolio of general population epidemiological surveys and/or surveillance activities (e.g., protocol development, printing of paper-based tools, salaries and transportation for data collection, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<ul style="list-style-type: none"> <li><input type="radio"/> A. No HIV/AIDS general population surveys or surveillance activities have been conducted within the past 5 years</li> <li><input type="radio"/> B. No financing (0%) is provided by the host country government</li> <li><input type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</li> <li><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</li> <li><input checked="" type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</li> <li><input type="radio"/> F. All or almost all financing (90%+) is provided by the host country government</li> </ul>	<p>13.3 Score: 1.25</p>	<p>BAIS IV budget</p>	<p>According to the CDC SI team BAIS cost 3.68 million of which PEPFAR funded a portion and GOB funded 3.1 million = 84% .</p>

<p><b>13.4 Who Finances Key Populations Surveys &amp; Surveillance:</b> To what extent does the host country government fund the HIV/AIDS portfolio of key population epidemiological surveys and/or behavioral surveillance activities (e.g., protocol development, printing of paper-based tools, salaries and transportation for data collection, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No HIV/AIDS key population surveys or surveillance activities have been conducted within the past 5 years</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input checked="" type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input type="radio"/> F. All or almost all financing (approx. 90%+) is provided by the host country government</p>	<p>13.4 Score: 0.42</p>	<p>BBSS 2012</p>	<p>Primary funding for the BBSS came from PEPFAR (\$400,000) and WHO (\$50,000). MOH donated all the lab reagents needed for testing under the BBSS.</p>
<p><b>13.5 Comprehensiveness of Prevalence and Incidence Data:</b> To what extent does the host country government collect HIV prevalence and incidence data according to relevant disaggregations, populations and geographic units? (Note: Full score possible without selecting all disaggregates.)</p>	<p>Check ALL boxes that apply below:</p> <p><input checked="" type="checkbox"/> A. The host country government collects at least every 5 years HIV prevalence data disaggregated by:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> Age</li> <li><input checked="" type="checkbox"/> Sex</li> <li><input checked="" type="checkbox"/> Key populations (FSW, PWID, MSM/transgender)</li> <li><input checked="" type="checkbox"/> Priority populations (e.g., military, prisoners, young women &amp; girls, etc.)</li> <li><input checked="" type="checkbox"/> Sub-national units</li> </ul> <p><input checked="" type="checkbox"/> B. The host country government collects at least every 5 years HIV incidence disaggregated by:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Age</li> <li><input type="checkbox"/> Sex</li> <li><input checked="" type="checkbox"/> Key populations (FSW, PWID, MSM/transgender)</li> <li><input type="checkbox"/> Priority populations (e.g., military, prisoners, young women &amp; girls, etc.)</li> <li><input type="checkbox"/> Sub-national units</li> </ul>	<p>13.5 Score: 0.60</p>	<p>BAIS IV report (Nov 2013), BBSS report 2012</p>	<p>Responses are based on the last BAIS IV survey and the BBSS survey. BAIS data is collected every 4 years and provides detailed prevalence data with the exception of KP data. Estimates from BAIS for KP depend on derived variable for KP identification. BBSS data is used to estimate KP prevalence; data is collected in select locations only.</p>

<p><b>13.6 Comprehensiveness of Viral Load Data:</b> To what extent does the host country government collect/report viral load data according to relevant disaggregations and across all PLHIV?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. The host country government does not collect/report viral load data or does not conduct viral load monitoring</p> <p><input checked="" type="radio"/> B. The host country government collects/reports viral load data (answer both subsections below):</p> <p>According to the following disaggregates (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Age</p> <p><input checked="" type="checkbox"/> Sex</p> <p><input type="checkbox"/> Key populations (FSW, PWID, MSM/transgender)</p> <p><input type="checkbox"/> Priority populations (e.g., military, prisoners, young women &amp; girls, etc.)</p> <p>For what proportion of PLHIV (select ONE of the following):</p> <p><input type="checkbox"/> Less than 25%</p> <p><input type="checkbox"/> 25-50%</p> <p><input checked="" type="checkbox"/> 50-75%</p> <p><input type="checkbox"/> More than 75%</p>	<p>13.6 Score: 0.60</p>	<p>Panel of experts, February 2016.</p>	<p>Absolute numbers of test performed are reported by partners, but not analyzed by result. Per the national guidelines, viral load is conducted regularly for patient case management purposes, and tracked in patient charts. This data is captured in the MOH data warehouse but may not be routinely analyzed for trends. BHP (ended 2015) did some reporting on lab testing during life of training project.</p>
<p><b>13.7 Comprehensiveness of Key and Priority Populations Data:</b> To what extent does the host country government conduct IBBS and/or size estimation studies for key and priority populations? (Note: Full score possible without selecting all disaggregates.)</p>	<p><input type="radio"/> A. The host country government does not conduct IBBS or size estimation studies for key populations (FSW, PWID, MSM) or priority populations (Military, etc.).</p> <p><input checked="" type="radio"/> B. The host country government conducts (answer both subsections below):</p> <p>IBBS for (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Female sex workers (FSW)</p> <p><input checked="" type="checkbox"/> Men who have sex with men (MSM)/transgender</p> <p><input checked="" type="checkbox"/> People who inject drugs (PWID)</p> <p><input type="checkbox"/> Priority populations (e.g., military, prisoners, young women &amp; girls, etc.)</p> <p>Size estimation studies for (check ALL that apply):</p> <p><input checked="" type="checkbox"/> Female sex workers (FSW)</p> <p><input checked="" type="checkbox"/> Men who have sex with men (MSM)/transgender</p> <p><input type="checkbox"/> People who inject drugs (PWID)</p> <p><input checked="" type="checkbox"/> Priority populations (e.g., military, prisoners, young women &amp; girls, etc.)</p>	<p>13.7 Score: 0.95</p>	<p>BBSS 2012</p>	<p>BBSS received PEPFAR funding, but was led and managed by the GOB. The BBSS attempted to survey PWID but was unable to find sufficient PWID, so PWID were then removed from the survey. Military and Prisoner population prevalence surveys completed by GOB but data is confidential.</p>
<p><b>13.8 Timeliness of Epi and Surveillance Data:</b> To what extent is a timeline for the collection of epidemiologic and surveillance data outlined in a national HIV/AIDS surveillance and survey strategy (or a national surveillance and survey strategy with specifics for HIV)?</p>	<p><input checked="" type="radio"/> A. There is no national HIV surveillance and surveys strategy, or a national surveillance and surveys strategy exists but does not include specifics for HIV surveillance and surveys</p> <p><input type="radio"/> B. A national HIV surveillance and surveys strategy exists (or a national surveillance and surveys strategy exists and includes specifics for HIV), but the strategy does not outline a timeline for data collection for all relevant population groups</p> <p><input type="radio"/> C. A national HIV surveillance and surveys strategy exists (or a national surveillance and surveys strategy exists and includes specifics for HIV), and outlines a timeline for data collection for all relevant population groups</p>	<p>13.8 Score: 0.00</p>	<p>Panel of experts, February 2016.</p>	<p>National HIV surveillance and survey strategy remains in draft form.</p>

<p><b>13.9 Quality of Surveillance and Survey Data:</b> To what extent does the host country government define and implement policies, procedures and governance structures that assure quality of HIV/AIDS surveillance and survey data?</p>	<p><input type="radio"/> A. No governance structures, procedures or policies designed to assure surveys &amp; surveillance data quality exist/could be documented.</p> <p><input checked="" type="radio"/> B. The following structures, procedures or policies exist to assure quality of surveys &amp; surveillance data (check all that apply):</p> <p><input checked="" type="checkbox"/> A national surveillance unit or other entity is responsible for assuring the quality of surveys &amp; surveillance data</p> <p><input type="checkbox"/> A national, approved surveys &amp; surveillance strategy is in place, which outlines standards, policies and procedures for data quality assurance</p> <p><input type="checkbox"/> Standard national procedures &amp; protocols exist for reviewing surveys &amp; surveillance data for quality and sharing feedback with appropriate staff responsible for data collection</p> <p><input checked="" type="checkbox"/> An in-country internal review board (IRB) exists and reviews reviews all protocols.</p>	<p>13.9 Score: 0.48</p>	<p>HRDC - IRB Policy and Planning division - surveillance unit</p>	
<b>Epidemiological and Health Data Score:</b>		<b>5.48</b>		
<p><b>14. Financial/Expenditure data:</b> Government collects, tracks and analyzes and makes available financial data related to HIV/AIDS, including the financing and spending on HIV/AIDS expenditures from all financing sources, costing, and economic evaluation, efficiency and market demand analyses for cost-effectiveness.</p>	<b>Data Source</b>	<b>Notes/Comments</b>		
<p><b>14.1 Who Leads Collection of Expenditure Data:</b> To what extent does the host country government lead &amp; manage a national expenditure tracking system to collect HIV/AIDS expenditure data?</p>	<p><input type="radio"/> A. No tracking of public HIV/AIDS expenditures has occurred within the past 5 years</p> <p><input type="radio"/> B. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), but planning and implementation is primarily led by external agencies, organizations, or institutions</p> <p><input type="radio"/> C. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with substantial external technical assistance</p> <p><input checked="" type="radio"/> D. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA) and planning and implementation is led by the host country government, with some external technical assistance</p> <p><input type="radio"/> E. Collection of public HIV/AIDS expenditure data occurs using a standard tool (i.e. NASA, NHA), and planning and implementation is led by the host country government, with minimal or no external technical assistance</p>	<p>14.1 Score: 1.25</p>	<p>2012 NASA Report; pending NHA (2016)</p>	<p>NASA data to be updated every 3 years. Currently analyzing new NHA data to inform NASA. PEPFAR and WHO provided TA for the NHA data collection and analysis.</p>
<p><b>14.2 Who Finances Collection of Expenditure Data:</b> To what extent does the host country government finance the collection of HIV/AIDS expenditure data (e.g., printing of paper-based tools, salaries and transportation for data collection, etc.)?  (if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No HIV/AIDS expenditure tracking has occurred within the past 5 years</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input checked="" type="radio"/> F. All or almost all financing (90%+) is provided by the host country government</p>	<p>14.2 Score: 3.33</p>	<p>Pending NHA report.</p>	<p>Data collection financing primarily from GOB, some additional funds from WHO and UNAIDS.</p>

<p><b>14.3 Comprehensiveness of Expenditure Data:</b> To what extent does the host country government collect HIV/AIDS public sector expenditures according to funding source, expenditure type, program and geographic area?</p>	<p><input type="radio"/> A. No HIV/AIDS expenditure tracking has occurred within the past 5 years</p> <p><input checked="" type="radio"/> B. HIV/AIDS expenditure data are collected (check all that apply):</p> <p><input checked="" type="checkbox"/> By source of financing, such as domestic public, domestic private, out-of-pocket, Global Fund, PEPFAR, others</p> <p><input checked="" type="checkbox"/> By expenditures per program area, such as prevention, care, treatment, health systems strengthening</p> <p><input checked="" type="checkbox"/> By type of expenditure, such as training, overhead, vehicles, supplies, commodities/reagents, personnel</p> <p><input type="checkbox"/> Sub-nationally</p>	<p>14.3 Score: 1.25</p>	<p>2012 NASA Report; pending NHA (2016); HPP costing for Essential Health Service Package (EHSP, 2015)</p>	<p>Recurrent NASA conducted every 3 years</p>
<p><b>14.4 Timeliness of Expenditure Data:</b> To what extent are expenditure data collected in a timely way to inform program planning and budgeting decisions?</p>	<p><input type="radio"/> A. No HIV/AIDS expenditure data are collected</p> <p><input type="radio"/> B. HIV/AIDS expenditure data are collected irregularly, and more than 3 years ago</p> <p><input type="radio"/> C. HIV/AIDS expenditure data were collected at least once in the past 3 years</p> <p><input type="radio"/> D. HIV/AIDS expenditure data are collected annually but represent more than one year of expenditures</p> <p><input checked="" type="radio"/> E. <p><b>14.5 Economic Studies:</b> Does the host country government conduct health economic studies or analyses for HIV/AIDS?</p>	<p><input type="radio"/> A. The host country government does not conduct health economic studies or analyses for HIV/AIDS</p> <p><input checked="" type="radio"/> B. The host country government conducts (check all that apply):</p> <p><input checked="" type="checkbox"/> Costing</p> <p><input checked="" type="checkbox"/> Economic evaluation (e.g., cost-effectiveness analysis and cost-benefit analysis)</p> <p><input type="checkbox"/> Efficiency analysis (e.g., efficiency of service delivery by public and private sector, resource allocation)</p> <p><input type="checkbox"/> Market demand analysis</p>	<p>14.5 Score: 0.83</p>	<p>HTC costing study, Costing for move to Test &amp; Treat (2015/16), Effectiveness of Dr. vs. Nurse prescribers (6 June 2013, Monyatsi et al.), HHPP costing for Essential Health Service Package (EHSP, 2015), HPP costing of select HIV/AIDS services (2015).</p>	<p>Most of these received some funding support from PEPFAR.</p> <p>Efficiency study for SRH/HIV linkages (2016)</p> <p>HFG (Abt assoc) conducting ART Efficiency study (2015-16)</p> <p>WB efficiency study is at the data analysis stage though there are some gaps in available data. Analysis should be completed by April 2016.</p>
<p><b>Financial/Expenditure Data Score: 8.33</b></p>				
<p><b>15. Performance data:</b> Government routinely collects, analyzes and makes available HIV/AIDS service delivery data. Service delivery data are analyzed to track program performance, i.e. coverage of key interventions, results against targets, and the continuum of care and treatment cascade, including linkage to care, adherence and retention.</p>			<p><b>Data Source</b></p>	<p><b>Notes/Comments</b></p>
<p><b>15.1 Who Leads Collection of Service Delivery Data:</b> To what extent is the routine collection of HIV/AIDS service delivery data institutionalized in an information system and managed and operated by the host country government?</p>	<p><input type="radio"/> A. No system exists for routine collection of HIV/AIDS service delivery data</p> <p><input type="radio"/> B. Multiple unharmonized or parallel information systems exist that are managed and operated separately by various government entities, local institutions and/or external agencies/institutions</p> <p><input checked="" type="radio"/> C. One information system, or a harmonized set of complementary information systems, exists and is primarily managed and operated by an external agency/institution</p> <p><input type="radio"/> D. One information system, or a harmonized set of complementary information systems, exists and is managed and operated by the host country government with technical assistance from external agency/institution</p> <p><input type="radio"/> E. One information system, or a harmonized set of complementary information systems, exists and is managed and operated by the host country government</p>	<p>15.1 Score: 0.33</p>	<p>DHIS, PIMS; IPMS; ETR; Open-MRS; data warehouse</p>	<p>Systems are uncoordinated. MOH recently adopted an e-health strategy, final draft is almost ready. Strategy is meant to harmonize these systems and provide guidance moving forward.</p>

<p><b>15.2 Who Finances Collection of Service Delivery Data:</b> To what extent does the host country government finance the routine collection of HIV/AIDS service delivery data (e.g., salaries of data clerks/M&amp;E staff, printing &amp; distribution of paper-based tools, electronic reporting system maintenance, data quality supervision, etc.)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No routine collection of HIV/AIDS service delivery data exists</p> <p><input type="radio"/> B. No financing (0%) is provided by the host country government</p> <p><input type="radio"/> C. Minimal financing (approx. 1-9%) is provided by the host country government</p> <p><input type="radio"/> D. Some financing (approx. 10-49%) is provided by the host country government</p> <p><input checked="" type="radio"/> E. Most financing (approx. 50-89%) is provided by the host country government</p> <p><input type="radio"/> F. All or almost all financing (90% +) is provided by the host country government</p>	<p>15.2 Score: 2.50</p>	<p>Panel of experts, February 2016.</p>	<p>Distribution of paper-based tools and maintenance of e-systems is funded by government. However gaps exist in the system and MOH overall expenditures on M&amp;E are very low. Government is committed to IPMS while other systems are supported externally.</p>
<p><b>15.3 Comprehensiveness of Service Delivery Data:</b> To what extent does the host country government collect HIV/AIDS service delivery data by population, program and geographic area? (Note: Full score possible without selecting all disaggregates.)</p>	<p>Check ALL boxes that apply below:</p> <p><input checked="" type="checkbox"/> A. The host country government routinely collects &amp; reports service delivery data for:</p> <ul style="list-style-type: none"> <li><input checked="" type="checkbox"/> HIV Testing</li> <li><input checked="" type="checkbox"/> PMTCT</li> <li><input type="checkbox"/> Adult Care and Support</li> <li><input checked="" type="checkbox"/> Adult Treatment</li> <li><input checked="" type="checkbox"/> Pediatric Care and Support</li> <li><input checked="" type="checkbox"/> Orphans and Vulnerable Children</li> <li><input checked="" type="checkbox"/> Voluntary Medical Male Circumcision</li> <li><input type="checkbox"/> HIV Prevention</li> <li><input checked="" type="checkbox"/> AIDS-related mortality</li> </ul> <p><input checked="" type="checkbox"/> B. Service delivery data are being collected:</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> By key population (FSW, PWID, MSM/transgender)</li> <li><input type="checkbox"/> By priority population (e.g., military, prisoners, young women &amp; girls, etc.)</li> <li><input checked="" type="checkbox"/> By age &amp; sex</li> <li><input checked="" type="checkbox"/> From all facility sites (public, private, faith-based, etc.)</li> <li><input type="checkbox"/> From all community sites (public, private, faith-based, etc.)</li> </ul>	<p>15.3 Score: 1.00</p>	<p>Monthly HAART update and quarterly reports from TB, HTC, PMTCT</p>	<p>For Care and Support - TB data is collected, but pre-ART data is not. The MOH, with CDC support, has created registers and indicators for pre-ART care. The next step is implementing these registers/indicators. Pre-ART pilot was conducted in 2015. Those data are available although report is not publicly released yet.</p> <p>Condom distribution data is collected and reported however consumption data is not collected. Other HIV prevention activities (e.g., life skills training) are not routinely collected. AIDS-related mortality is collected however there is a multi-year lag in producing analyses.</p> <p>Currently not all community sites are routinely collected.</p>
<p><b>15.4 Timeliness of Service Delivery Data:</b> To what extent are HIV/AIDS service delivery data collected in a timely way to inform analysis of program performance?</p>	<p><input type="radio"/> A. The host country government does not routinely collect/report HIV/AIDS service delivery data</p> <p><input type="radio"/> B. The host country government collects &amp; reports service delivery data annually</p> <p><input type="radio"/> C. The host country government collects &amp; reports service delivery data semi-annually</p> <p><input checked="" type="radio"/> D. The host country government collects &amp; reports service delivery data at least quarterly</p>	<p>15.4 Score: 1.33</p>	<p>Quarterly program reports for most programs - HTC, PMTCT, TB, treatment, etc.</p>	<p>Quarterly program reports for most programs - HTC, PMTCT, TB, etc. HAART data is collected quarterly but due to staff vacancy the HAART report was not published quarterly in 2015</p>

<p><b>15.5 Analysis of Service Delivery Data:</b> To what extent does the host country government routinely analyze service delivery data to measure program performance (i.e., continuum of care cascade, coverage, retention, AIDS-related mortality rates)?</p>	<p><input type="radio"/> A. The host country government does not routinely analyze service delivery data to measure program performance</p> <p><input checked="" type="radio"/> B. Service delivery data are being analyzed to measure program performance in the following ways (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> Continuum of care cascade for each identified priority population (e.g., military, prisoners, young women &amp; girls, etc.), including HIV testing, linkage to care, treatment, adherence and retention</li> <li><input type="checkbox"/> Continuum of care cascade for each relevant key population (FSW, PWID, MSM/transgender), including HIV testing, linkage to care, treatment, adherence and retention</li> <li><input checked="" type="checkbox"/> Results against targets</li> <li><input checked="" type="checkbox"/> Coverage of key treatment &amp; prevention services (ART, PMTCT, VMMC, etc.)</li> <li><input type="checkbox"/> Site-specific yield for HIV testing (HTC and PMTCT)</li> <li><input type="checkbox"/> AIDS-related mortality rates</li> <li><input type="checkbox"/> Variations in performance by sub-national unit</li> <li><input type="checkbox"/> Creation of maps to facilitate geographic analysis</li> </ul>	<p>15.5 Score: 0.33</p>	<p>Health Statistics Report, 2009; Maternal Mortality Ratio 2008-2013, 2013.</p>	<p>Data is being collected and select programs are using it to measure program performance (e.g., PMTCT, VMMC). District DHMTs use data to measure against their district-level targets. National target setting and measurement of performance is inadequate. Unclear how the district targets map to national targets. Drug forecasting uses HAART data to refine procurement projections.</p>
<p><b>15.6 Quality of Service Delivery Data:</b> To what extent does the host country government define and implement policies, procedures and governance structures that assure quality of HIV/AIDS service delivery data?</p>	<p><input type="radio"/> A. No governance structures, procedures or policies designed to assure service delivery data quality exist/could be documented.</p> <p><input checked="" type="radio"/> B. The following structures, procedures or policies exist to assure quality of service delivery data (check all that apply):</p> <ul style="list-style-type: none"> <li><input type="checkbox"/> A national, approved data quality strategy is in place, which outlines standards, policies and procedures for HIV/AIDS data quality assurance</li> <li><input type="checkbox"/> A national protocol exists for routine (at least annual) Data Quality Audits/Assessments of key HIV program indicators, which are led and implemented by the host country government</li> <li><input checked="" type="checkbox"/> Standard national procedures &amp; protocols exist for routine data quality checks at the point of data entry</li> <li><input type="checkbox"/> Data quality reports are published and shared with relevant ministries/government entities &amp; partner organizations</li> <li><input type="checkbox"/> The host country government leads routine (at least annual) data review meetings at national &amp; subnational levels to review data quality issues and outline improvement plans</li> </ul>	<p>15.6 Score: 0.27</p>	<p>SOPs</p>	<p>No plan/strategy articulated and shared regarding routine assessments. Standard operating procedures exist to assure data quality.</p>
<p><b>Performance Data Score:</b></p>		<p><b>5.77</b></p>
