

2016 Sustainability Index and Dashboard Summary: Lesotho

The HIV/AIDS Sustainability Index and Dashboard (SID) is a tool completed periodically by PEPFAR teams and partner stakeholders to sharpen the understanding of each country's sustainability landscape and to assist PEPFAR and others in making informed HIV/AIDS investment decisions. Based on responses to 90 questions, the SID assesses the current state of sustainability of national HIV/AIDS responses across 15 critical elements. Scores for these elements are displayed on a color-coded dashboard, together with other contextual charts and information. As the SID is completed over time, it will allow stakeholders to track progress and gaps across these key components of sustainability.

Dark Green Score (8.50-10 points) (sustainable and requires no additional investment at this time)
Light Green Score (7.00-8.49 points) (approaching sustainability and requires little or no investment)
Yellow Score (3.50-6.99 points) (emerging sustainability and needs some investment)
Red Score (<3.50 points) (unsustainable and requires significant investment)

The PEPFAR team completed a draft Sustainability Index Dashboard (SID) to assist with identifying areas of weakness, that are critical to the HIV and AIDS response and the attainment of Epidemic Control in Lesotho. The SID process for COP 2016 began with the formation of the SID technical working group (TWG) co-chaired by UNAIDS Lesotho. The SID TWG was composed of PEPFAR Lesotho, UN Agencies, Civil Society Organizations (CSOs) and PEPFAR Implementing Partners (IPs). The draft SID generated by the TWG was electronically circulated widely to a broader stakeholder group in the health sector but little feedback was received. Due to MOH Senior Management and PEPFAR staff time limitations the SID stakeholder meeting was cancelled. However MOH Senior Management buy-in into the SID was secured and the SID was finalized in February 2016 in readiness for the Washington DC management meetings.

Of the fifteen sustainability elements none were classified as unsustainable (Red), thirteen scored partially unsustainable (Yellow), one scored partially sustainable (Light Green) and one scored sustainable (Green). With 13 of the 15 elements scoring either partially unsustainable; the Lesotho HIV and AIDS response seems

static and requires emergency measures to change the course towards sustainable epidemic control.

The elements that scored partially unsustainable included policies and governance (yellow), domestic resource mobilization (yellow), performance data (yellow), financial/ expenditure data (yellow), civil society engagement (yellow), private sector engagement (yellow), service delivery (yellow), human resources for health (yellow), commodity security and supply chain (yellow), quality management (yellow), laboratory (yellow), technical and allocative efficiency (yellow), and epidemiological and health data (yellow).

On April 14, 2016 the Government of Lesotho launched test and treat services at Senkatana Centre of Excellence. The Government stipulated a rollout plan, which would see the Ministry of Health (MoH) providing test and start services in all health facilities in the 10 districts by June 2016. The pronouncement also meant that the HTS and treatment guidelines had to be updated to include test and start services and the new service delivery models. The PEPFAR team and USG implementing partners (IPs) will provide leadership and work with the MoH to revise, disseminate and provide training in the new guidelines to all health workers in the 5 priority districts.

Following up on COP 2015 investments and the test and start agenda, the PEPFAR team will continue to invest in policies and governance activities, service delivery, lesser in preservice education - human resources for health but more in commodity and more in supply chain management systems strengthening, more in epidemiological and health data and more in laboratory commodities and systems strengthening. In COP 2016, the PEPFAR team will continue to support the MOH to strengthen these elements, which are in line with the PEPFAR Lesotho 2015-2020 Strategic Plan. Unique to COP 2016 is the expansion of test and start programs to all PLHIV and the implementation of new service delivery models to bring in efficiencies and reduce the burden on frontline health workers. In addition, COP 2016 will continue to scale up high-impact access and demand investments throughout the continuum of response. PEPFAR will scale-up demand for HIV and AIDS services by ensuring that PLHIV know their HIV status either through PITC or CBTC and are linked to treatment services.

In addition, the PEPFAR Lesotho team has also invested in a 3 year Vodafone Public Private Partnership (PPP) project whose main objective is to expand initiation and treatment for pediatrics in order to contribute to the elimination of pediatric HIV/AIDS and vertical transmission of HIV/AIDS from mothers to their babies. The Vodafone PPP will run monthly Mobile Clinics in Maseru and Leribe (including

conditional cash transfers through MPESA (mobile money)), HIV Testing Services - Index Patient Tracking (IPT), Mobile technology, Clinical skills/ management and capacity building, and demand creation through local civil society organizations (CSOs) and Vodacom Lesotho SMS and TV broadcasting advertisements. The Vodafone PPP will act as a catalyst for increased utilization and access of services for pregnant women and pediatrics from 0 – 14 years and adolescents from 12 – 18 years old accessing Kick 4 Life services in Maseru. The Vodafone PPP also utilizes government health posts, health workers and HTS/ treatment/ laboratory commodities in order to ensure sustainability of services beyond FY 2018.

Most of the COP investments in the past have gone towards supporting all elements in the second domain (National Health System and Service Delivery) and one element under Strategic Information (Epidemiological/ Health Data) of the sustainability index mainly due to the division of labor with other partners in supporting the HIV/AIDS National Strategic Plan (NSP). Although generally speaking all partners are equally involved in supporting the first domain, Governance, Leadership and accountability, the PEPFAR team has played a key role in advocating for test and treat. The UN agency mainly through UNAIDS and WHO have played a key role in providing guidance and tools for the implementation of test and start. In addition, PEPFAR has engaged a central mechanism AIDSFREE to build the capacity of Civil Society Organizations (CSOs). The Clinton Health Access Initiative (CHAI) has played a pivotal role in building the capacities of the Host Government in Strategic Investments, Efficiency and Sustainable financing domain and the collection of financial and expenditure data through resource mapping activities. The Global Fund has been a key PEPFAR partner in supporting commodities and all the elements of the second domain of the sustainability index.

Domain A. Governance, Leadership, and Accountability

What Success Looks Like: Host government upholds a transparent and accountable resolve to be responsible to its citizens and international stakeholders for achieving planned HIV/AIDS results, is a good steward of HIV/AIDS finances, widely disseminates program progress and results, provides accurate information and education on HIV/AIDS, and supports mechanisms for eliciting feedback. Relevant government entities take actions to create an enabling policy and legal environment, ensure good stewardship of HIV/AIDS resources, and provide technical and political leadership to coordinate an effective national HIV/AIDS response.

1. Planning and Coordination: Host country develops, implements, and oversees a costed multiyear national strategy and serves as the preeminent architect and convener of a coordinated HIV/AIDS response in the country across all levels of government and key stakeholders, civil society and the private sector.	Data Source	Notes/Comments
<p>1.1 Content of National Strategy: Does the country have a multi-year, costed national strategy to respond to HIV?</p>	<p>1.1 Score: 2.50</p>	<p>Revised National HIV and AIDS Strategic Plan 2011/12 - 2015/16 : September 2013</p>
<p>1.2 Participation in National Strategy Development: Who actively participates in development of the country's national HIV/AIDS strategy?</p>	<p>1.2 Score: 2.00</p>	<p>Lesotho HIV/AIDS Authority (LeHA)</p> <p>NAC has been revived for multisectoral coordination</p>

<p>1.3 Coordination of National HIV Implementation: To what extent does the host country government coordinate all HIV/AIDS implemented activities in the country, including those funded or implemented by CSOs, private sector, and donor implementing partners?</p>	<p>Check all that apply:</p> <p><input type="checkbox"/> There is an effective mechanism within the host country government for internally coordinating HIV/AIDS activities implemented by various government ministries, institutions, offices, etc.</p> <p><input type="checkbox"/> The host country government routinely tracks and maps HIV/AIDS activities of:</p> <p><input type="checkbox"/> civil society organizations</p> <p><input type="checkbox"/> private sector</p> <p><input type="checkbox"/> donors</p> <p><input checked="" type="checkbox"/> The host country government leads a mechanism or process (i.e. committee, working group, etc.) that routinely convenes key internal and external stakeholders and implementers of the national response for planning and coordination purposes.</p> <p><input checked="" type="checkbox"/> Joint operational plans are developed that include key activities of implementing organizations.</p> <p><input type="checkbox"/> Duplications and gaps among various government, CSO, private sector, and donor activities are systematically identified and addressed.</p>	<p>1.3 Score: 1.00</p>		<p>The absence of NAC since December 2011 made coordination challenging though the Commission has just been resuscitated on 10 December 2015</p>
<p>1.4 Sub-national Unit Accountability: Is there a mechanism by which sub-national units are accountable to national HIV/AIDS goals or targets? (note: equal points for B and C)</p>	<p><input type="radio"/> A. There is no formal link between the national plan and sub-national service delivery.</p> <p><input checked="" type="radio"/> B. Sub-national units have performance targets that contribute to aggregate national goals or targets.</p> <p><input type="radio"/> C. The central government is responsible for service delivery at the sub-national level.</p>	<p>1.4 Score: 2.50</p>	<p>Annual and Quarterly Joint Reviews by MoH</p>	
<p>Planning and Coordination Score:</p>		<p>8.00</p>		

2. Policies and Governance: Host country develops, implements, and oversees a wide range of policies, laws, and regulations that will achieve coverage of high impact interventions, ensure social and legal protection and equity for those accessing HIV/AIDS services, eliminate stigma and discrimination, and sustain epidemic control within the national HIV/AIDS response.		Data Source	Notes/Comments
2.1 WHO Guidelines for ART Initiation: Does current national HIV/AIDS technical practice follow current or recent WHO guidelines for initiation of ART?	For each category below, check <u>no more than one box</u> that reflects current national policy for ART initiation: A. Adults (>19 years) <input checked="" type="checkbox"/> Test and START (current WHO Guideline) <input type="checkbox"/> CD4 <500 B. Pregnant and Breastfeeding Mothers <input checked="" type="checkbox"/> Test and START/Option B+ (current WHO Guideline) <input type="checkbox"/> Option B C. Adolescents (10-19 years) <input checked="" type="checkbox"/> Test and START (current WHO Guideline) <input type="checkbox"/> CD4<500 D. Children (<10 years) <input checked="" type="checkbox"/> Test and START (current WHO Guideline) <input type="checkbox"/> CD4<500 or clinical eligibility	2.1 Score: 1.43	Minutes of the HIV/TB Technical Working Group held on the 17th December 2015; ART Guidelines Test and Start to be launched by 1 April 2016

<p>2.2 Enabling Policies and Legislation: Are there policies or legislation that govern HIV/AIDS service delivery or policies and legislation on health care which is inclusive of HIV service delivery?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> A national public health services act that includes the control of HIV <input checked="" type="checkbox"/> A task-shifting policy that allows trained non-physician clinicians, midwives, and nurses to initiate and dispense ART <input checked="" type="checkbox"/> A task-shifting policy that allows trained and supervised community health workers to dispense ART between regular clinical visits <input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced clinical visits (i.e. every 6-12 months) <input checked="" type="checkbox"/> Policies that permit patients stable on ART to have reduced ARV pickups (i.e. every 3-6 months) <input checked="" type="checkbox"/> Policies that permit streamlined ART initiation, such as same day initiation of ART for those who are ready <input checked="" type="checkbox"/> Legislation to ensure the well-being and protection of children, including those orphaned and made vulnerable by HIV/AIDS 	<p>2.2 Score: 1.43</p>		
<p>2.3 Non-discrimination Protections: Does the country have non-discrimination laws or policies that specify protections (not specific to HIV) for specific populations? Are these fully implemented? (Full score possible without checking all boxes.)</p>	<p>Check all that apply:</p> <p>Adults living with HIV (women):</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Law/policy exists <input type="checkbox"/> Law/policy is fully implemented <p>Adults living with HIV (men):</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Law/policy exists <input type="checkbox"/> Law/policy is fully implemented <p>Children living with HIV:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Law/policy exists <input checked="" type="checkbox"/> Law/policy is fully implemented <p>Gay men and other men who have sex with men (MSM):</p> <ul style="list-style-type: none"> <input type="checkbox"/> Law/policy exists <input type="checkbox"/> Law/policy is fully implemented 	<p>2.3 Score: 0.56</p>	<p>This question aligns with the revised UNAIDS NCPI (2015). If your country has completed the new NCPI, you may use it as a data source to answer this question.</p> <p>Lesotho Local Government Service Workplace Policy on HIV/AIDS</p>

<p>2.5 Rights to Access Services: Recognizing the right to nondiscriminatory access to HIV services and support, does the government have efforts in place to educate and ensure the rights of PLHIV, key populations, and those who may access HIV services about these rights?</p>	<p>There are host country government efforts in place as follows (check all that apply):</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> To educate PLHIV about their legal rights in terms of access to HIV services <input type="checkbox"/> To educate key populations about their legal rights in terms of access to HIV services <input checked="" type="checkbox"/> National law exists regarding health care privacy and confidentiality protections <input type="checkbox"/> Government provides financial support to enable access to legal services if someone experiences discrimination, including redress where a violation is found 	<p>2.5 Score: 0.71</p>	<p>National HIV Policy 2006; MOH, NSP for HIV/AIDS 2012/2013 to 2015/2016</p>	
<p>2.6 Audit: Does the host country government conduct a national HIV/AIDS program audit or audit of Ministries that work on HIV/AIDS on a regular basis (excluding audits of donor funding that are through government financial systems)?</p>	<ul style="list-style-type: none"> <input checked="" type="radio"/> A. No audit is conducted of the National HIV/AIDS Program or other relevant ministry. <input type="radio"/> B. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 4 years or more. <input type="radio"/> C. An audit is conducted of the National HIV/AIDS program or other relevant ministries every 3 years or less. 	<p>2.6 Score: 0.00</p>		
<p>2.7 Audit Action: To what extent does the host country government respond to the findings of a HIV/AIDS audit or audit of Ministries that work on HIV/AIDS?</p>	<ul style="list-style-type: none"> <input checked="" type="radio"/> A. Host country government does not respond to audit findings, or no audit of the national HIV/AIDS program is conducted. <input type="radio"/> B. The host country government does respond to audit findings by implementing changes as a result of the audit. <input type="radio"/> C. The host country government does respond to audit findings by implementing changes which can be tracked by legislature or other bodies that hold government accountable. 	<p>2.7 Score: 0.00</p>		
Policies and Governance Score:		5.01		

3. Civil Society Engagement			
		Data Source	Notes/Comments
<p>3.1 Civil Society and Accountability for HIV/AIDS: Are there any laws or policies that restrict civil society from playing an oversight role in the HIV/AIDS response?</p>	<p><input type="radio"/> A. There exists a law or laws that restrict civil society from playing an oversight role in the HIV/AIDS response.</p> <p><input type="radio"/> B. There are no laws that restrict civil society playing a role in providing oversight of the HIV/AIDS response but in practice, it does not happen.</p> <p><input checked="" type="radio"/> C. There are no laws or policies that prevent civil society from providing an oversight of the HIV/AIDS response and civil society is very actively engaged in providing oversight.</p>	<p>3.1 Score: 1.67</p>	<p>Civil Society Health Advocacy Forum formed and active</p>
<p>3.2 Government Channels and Opportunities for Civil Society Engagement: Does host country government have formal channels or opportunities for diverse civil society groups to engage and provide feedback on its HIV/AIDS policies, programs, and services (not including Global Fund CCM civil society engagement requirements)?</p>	<p>Check A, B, or C; if C checked, select appropriate disaggregates:</p> <p><input type="radio"/> A. There are no formal channels or opportunities.</p> <p><input type="radio"/> B. There are formal channels or opportunities, but civil society is called upon in an ad hoc manner to provide inputs and feedback.</p> <p><input checked="" type="radio"/> C. There are functional formal channels and opportunities for civil society engagement and feedback. Check all that apply:</p> <p><input checked="" type="checkbox"/> During strategic and annual planning</p> <p><input checked="" type="checkbox"/> In joint annual program reviews</p> <p><input checked="" type="checkbox"/> For policy development</p> <p><input checked="" type="checkbox"/> As members of technical working groups</p> <p><input checked="" type="checkbox"/> Involvement on government HIV/AIDS program evaluation teams</p> <p><input checked="" type="checkbox"/> Involvement in surveys/studies</p> <p><input checked="" type="checkbox"/> Collecting and reporting on client feedback</p>	<p>3.2 Score: 1.67</p>	<p>Lesotho Concept Note submission April 2015</p>

<p>3.3 Impact of Civil Society Engagement: Does civil society engagement substantively impact policy and budget decisions related to HIV/AIDS?</p>	<p><input type="radio"/> A. Civil society does not actively engage, or civil society engagement does not impact policy and budget decisions related to HIV/AIDS.</p> <p><input checked="" type="radio"/> B. Civil society's engagement impacts HIV/AIDS policy and budget decisions (check all that apply):</p> <p><input checked="" type="checkbox"/> In advocacy</p> <p><input checked="" type="checkbox"/> In programmatic decision making</p> <p><input checked="" type="checkbox"/> In technical decision making</p> <p><input checked="" type="checkbox"/> In service delivery</p> <p><input type="checkbox"/> In HIV/AIDS basket or national health financing decisions</p>	<p>3.3 Score: 1.33</p>	<p>Lesotho Concept Note submission April 2015</p>	
<p>3.4 Domestic Funding of Civil Society: To what extent are HIV/AIDS related Civil Society Organizations funded domestically (either from government, private sector, or self generated funds)?</p> <p>(if exact or approximate overall percentage known, or the percentages from the various domestic sources, please note in Comments column)</p>	<p><input type="radio"/> A. No funding (0%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input checked="" type="radio"/> B. Minimal funding (approx. 1-9%) for HIV/AIDS related civil society organizations comes from domestic sources.</p> <p><input type="radio"/> C. Some funding (approx. 10-49%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/> D. Most funding (approx. 50-89%) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants through government Principal Recipients).</p> <p><input type="radio"/> E. All or almost all funding (approx. 90%+) for HIV/AIDS related civil society organizations comes from domestic sources (not including Global Fund grants).</p>	<p>3.4 Score: 0.83</p>		
<p>3.5 Civil Society Enabling Environment: Is the legislative and regulatory framework conducive to Civil Society Organizations (CSOs) or not-for-profit organizations to engage in HIV service provision or health advocacy?</p>	<p><input type="radio"/> A. The legislative and regulatory framework is not conducive for engagement in HIV service provision or health advocacy</p> <p><input checked="" type="radio"/> B. The legislative and regulatory framework is conducive for engagement in HIV service delivery and health advocacy as follows (check all that apply):</p> <p><input type="checkbox"/> Significant tax deductions for business or individual contributions to not-for-profit CSOs</p> <p><input type="checkbox"/> Significant tax exemptions for not-for-profit CSOs</p> <p><input type="checkbox"/> Open competition among CSOs to provide government-funded services</p> <p><input checked="" type="checkbox"/> Freedom for CSOs to advocate for policy, legal and programmatic change</p> <p><input type="checkbox"/> There is a national public private partnership (PPP) technical working group or desk officer within the government (ministry of health, finance, or president's office) in which CSOs or non-profit organizations participate/engage.</p>	<p>3.5 Score: 1.00</p>		
<p>Civil Society Engagement Score:</p>		<p>6.50</p>		

4. Private Sector Engagement			Data Source	Notes/Comments
<p>4. Private Sector Engagement: Global as well as local private sector (both private health care providers and private business) is an active partner in the HIV/AIDS response through service delivery provision when appropriate, advocacy efforts as needed, innovation, and as a key stakeholder to inform the national HIV/AIDS response. There are supportive policies and mechanisms for the private sector to engage and to review and provide feedback regarding public programs, services and fiscal management of the national HIV/AIDS response. The public uses the private sector for HIV service delivery at a similar level as other health care needs.</p>	<p><input type="radio"/> A. There are no formal channels or opportunities</p> <p><input type="radio"/> B. There are formal channels or opportunities, but private sector is called upon in an ad hoc manner to provide inputs and feedback</p> <p><input checked="" type="radio"/> C. There are functional formal channels and opportunities for private sector engagement and feedback. Check all that apply:</p> <p><input checked="" type="checkbox"/> Corporate contributions, private philanthropy and giving</p> <p><input type="checkbox"/> Joint (i.e. public-private) supervision and quality oversight of private facilities</p> <p><input checked="" type="checkbox"/> Collection of service delivery and client satisfaction data from private providers</p> <p><input type="checkbox"/> Tracking of private training institution HRH graduates and placements</p> <p><input checked="" type="checkbox"/> Contributing to develop innovative solutions, both technology and systems innovation</p> <p><input checked="" type="checkbox"/> For technical advisory on best practices and delivery solutions</p>	<p>4.1 Score: 1.11</p>		<p>Vodafone Foundation</p>
<p>4.1 Government Channels and Opportunities for Private Sector Engagement: Does host country government have formal channels and opportunities for diverse private sector entities to engage and provide feedback on its HIV/AIDS policies, programs, and services?</p>				

<p>4.2 Private Sector Partnership: Do private sector partnerships with government result in stronger policy and budget decisions for HIV/AIDS programs?</p>	<p><input type="radio"/> A. Private sector does not actively engage, or private sector engagement does not influence policy and budget decisions in HIV/AIDS.</p> <p><input checked="" type="radio"/> B. Private sector engagement influences HIV/AIDS policy and budget decisions in the following areas (check all that apply):</p> <ul style="list-style-type: none"> <input type="checkbox"/> In patient advocacy and human rights <input checked="" type="checkbox"/> In programmatic decision making <input checked="" type="checkbox"/> In technical decision making <input checked="" type="checkbox"/> In service delivery for both public and private providers <input type="checkbox"/> In HIV/AIDS basket or national health financing decisions <input checked="" type="checkbox"/> In advancing innovative sustainable financing models <input type="checkbox"/> In HRH development, placement, and retention strategies <input type="checkbox"/> In building capacity of private training institutions <input type="checkbox"/> In supply chain management of essential supplies and drugs 	<p>4.2 Score: 0.74</p>		
--	--	------------------------	--	--

<p>4.3 Legal Framework for Private Health Sector: Does the legislative and regulatory framework make provisions for the needs of the private health sector (including hospitals, networks, and insurers)?</p>	<p>The legislative and regulatory framework makes the following provisions (check all that apply):</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Systems are in place for service provision and/or research reporting by private sector facilities to the government. <input checked="" type="checkbox"/> Mechanisms exist to ensure that private providers receive, understand and adhere to national guidelines/protocols for ART. <input type="checkbox"/> Tax deductions for private health providers. <input type="checkbox"/> Tax deductions for private training institutions training health workers. <input type="checkbox"/> Open competition for private health providers to compete for government services. <input type="checkbox"/> General or HIV/AIDS-specific service agreement frameworks exist between local government authorities/municipalities and private providers at the sub-national unit (e.g. district) levels. <input checked="" type="checkbox"/> Freedom of private providers to advocate for policy, legal, and regulatory frameworks. <input checked="" type="checkbox"/> Standardized processes for developing public-private partnerships (PPP) and memorandums of understanding (MOUs) between public and private providers. 	<p>4.3 Score: 0.83</p>		<p>National referral hospital (QMMH) is a PPP</p>
<p>4.4 Legal Framework for Private Businesses: Does the legislative and regulatory framework make provisions for the needs of private businesses (local or multinational corporations)?</p>	<p>The legislative and regulatory framework makes the following provisions (check all that apply):</p> <ul style="list-style-type: none"> <input type="checkbox"/> Tax deductions for health-related private businesses (i.e. pharmacists, supply chain, etc.). <input type="checkbox"/> Systematic and timely process for private company registration and/or testing of new health products; drugs, diagnostics kits, medical devices. <input type="checkbox"/> Standardized processes for developing public-private partnerships (PPP) and memorandums of understanding (MOUs) between local government and private business. <input type="checkbox"/> Corporate Social Responsibility (CSR) tax policies (compulsory or optional) contributing private corporate resources to the HIV/AIDS response. <input checked="" type="checkbox"/> Workplace policies support HIV-related services and/or benefits for employees. <input type="checkbox"/> Existing forums between business community and government to engage in dialogue to support HIV/AIDS and public health programs. 	<p>4.4 Score: 0.28</p>		

<p>4.5 Private Health Sector Supply: Does the host country government enable private health service provision for lower and middle-income HIV patients?</p>	<p><input type="radio"/> A. There are no enablers for private health service provision for lower and middle-income HIV patients.</p> <p><input checked="" type="radio"/> B. The host country government enables private health service provision for lower and middle-income patients in the following ways (check all that apply):</p> <p><input type="checkbox"/> Private for-profit providers are eligible to procure HIV and/or ART commodities via public sector procurement channels and/or vertical programs.</p> <p><input checked="" type="checkbox"/> The private sector scope of practice for physicians, nurses and midwives serving low and middle-income patients currently includes HIV and/or ART service provision.</p>	<p>4.5 Score: 0.83</p>		
<p>4.6 Private Health Sector Demand: Is the percentage of people accessing HIV treatment services through the private sector similar to (or approaching) the percentage of those seeking other curative services through the private sector?</p>	<p><input checked="" type="radio"/> A. The percentage of people accessing HIV treatment services through the private sector is significantly lower than the percentage seeking other curative services through the private sector.</p> <p><input type="radio"/> B. The percentage of people accessing HIV treatment services through the private sector is similar to (or approaching) the percentage seeking other curative services through the private sector due to the following factors (check all that apply):</p> <p><input type="checkbox"/> HIV-related services/products are covered by national health insurance.</p> <p><input type="checkbox"/> HIV-related services/products are covered by private or other health insurance.</p> <p><input type="checkbox"/> Adequate risk pooling exists for HIV services.</p> <p><input type="checkbox"/> Models currently exist for cost-recovery for ART.</p> <p><input type="checkbox"/> HIV drugs are not subject to higher pharmaceutical mark-ups than other drugs in the market.</p>	<p>4.6 Score: 0.00</p>	<p>Anecdotal</p> <p>Public Sector data is in the process of being created by host government</p> <p>Public Sector HIV services are free and individuals are less likely to seek services in the private sector</p>	
<p>Private Sector Engagement Score:</p>		<p>3.80</p>		

5. Public Access to Information: Host government widely disseminates timely and reliable information on the implementation of HIV/AIDS policies and programs, including goals, progress and challenges towards achieving HIV/AIDS targets, as well as fiscal information (public revenues, budgets, expenditures, large contract awards , etc.) related to HIV/AIDS. Program and audit reports are published publically. Efforts are made to ensure public has access to data through print distribution, websites, radio or other methods of disseminating information.			
		Source of Data	Notes/Comments
<p>5.1 Surveillance and Survey Transparency: Does the host country government ensure that HIV/AIDS surveillance and survey data, or at least a summary report of data, and analyses are made available to stakeholders and general public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public, or they are made available 3 or more years after the date of collection.</p> <p><input checked="" type="radio"/> B. The host country government makes HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public within 1-3 years.</p> <p><input type="radio"/> C. The host country government makes HIV/AIDS surveillance and survey summary reports available to stakeholders and the general public within the same year.</p>	<p>5.1 Score: 1.00</p>	<p>DHS 2014, 2009, 2004. Key Pops.</p>
<p>5.2 Expenditure Transparency: Does the host country government make annual HIV/AIDS expenditure data, or at a minimum at least a summary of it, available to stakeholders and the public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS expenditure summary reports available to stakeholders and the general public or they are made available 3 or more years after the date of expenditures.</p> <p><input type="radio"/> B. The host country government makes HIV/AIDS expenditure summary reports available to stakeholders and the general public or website within 1-3 years after date of expenditures.</p> <p><input checked="" type="radio"/> C. The host country government makes HIV/AIDS expenditure summary reports available to stakeholders and the general public within 1 year after expenditures.</p>	<p>5.2 Score: 2.00</p>	<p>Annual Joint Review (AJR)</p>
<p>5.3 Performance and Service Delivery Transparency: Does the host country government make annual HIV/AIDS program performance and service delivery data (or at a minimum of summary of it) available to stakeholders and the public in a timely way?</p>	<p><input type="radio"/> A. The host country government does not make HIV/AIDS program performance and service delivery summary reports available to stakeholders and the general public or they are made available 3 or more years after the date of programming.</p> <p><input type="radio"/> B. The host country government makes HIV/AIDS program performance and service delivery summary reports available to stakeholders and the general public within 1-3 years after date of programming.</p> <p><input checked="" type="radio"/> C. <p>5.4 Procurement Transparency: Does the host country government make government HIV/AIDS procurements public in a timely way?</p>	<p><input type="radio"/> A. Host country government does not make any HIV/AIDS procurements.</p> <p><input type="radio"/> B. Host country government makes HIV/AIDS procurements, but neither procurement tender nor award details are publicly available.</p> <p><input type="radio"/> C. Host country government makes HIV/AIDS procurements, and tender, but not award, details are publicly available.</p> <p><input checked="" type="radio"/> D. Host Country government makes HIV/AIDS procurements, and both tender and award details available.</p>	<p>5.4 Score: 2.00</p>	<p>Supply Chain Rapid Analysis & TA Model Review (11/2015)</p>	
<p>5.5 Institutionalized Education System: Is there a government agency that is explicitly responsible for educating the public about HIV?</p>	<p><input type="radio"/> A. There is no government institution that is responsible for this function and no other groups provide education.</p> <p><input type="radio"/> B. There is no government institution that is responsible for this function but at least one of the following provides education:</p> <p><input type="checkbox"/> Civil society</p> <p><input type="checkbox"/> Media</p> <p><input type="checkbox"/> Private sector</p> <p><input checked="" type="radio"/> C. There is a government institution that is responsible for, and is providing, scientifically accurate information on HIV/AIDS.</p>	<p>5.5 Score: 2.00</p>	<p>Ministry of Education and Training Website http://www.gov.ls/education/</p>	<p>Listed as a sector objectives for the Ministry of Education and Training</p>
<p>Public Access to Information Score: 9.00</p>				

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN A

Domain B. National Health System and Service Delivery

What Success Looks Like: Host country institutions (inclusive of government, NGOs, civil society, and the private sector), the domestic workforce, and local health systems constitute the primary vehicles through which HIV/AIDS programs and services are managed and delivered. Optimally, national, sub-national and local governments have achieved high and appropriate coverage of a range of quality, life-saving prevention, treatment, and care services and interventions. There is a high demand for HIV/AIDS services, which are accessible and affordable to poor and vulnerable populations at risk of infection (i.e. key populations, discordant couples, exposed infants), are infected and/or are affected by the HIV/AIDS epidemic.

6. Service Delivery: The host country government at national, sub-national and facility levels facilitates planning and management of, access to and linkages between facility- and community-based HIV services.		Data Source	Notes/Comments
<p>6.1 Responsiveness of facility-based services to demand for HIV services: Do public facilities respond to and generate demand for HIV services to meet local needs? (Check all that apply.)</p>	<p><input type="checkbox"/> Public facilities are able to tailor services to accommodate demand (e.g., modify or add hours/days of operations; add/second additional staff during periods of high patient influx; customize scope of HIV services offered; adapt organization/model of service deliver to patient flow)</p> <p><input checked="" type="checkbox"/> Public facilities are able to situate services in proximity to high-HIV burden locations or populations (e.g., mobile clinics)</p> <p><input checked="" type="checkbox"/> There is evidence that public facilities in high burden areas and/or serving high-burden populations generate demand for HIV services</p>	<p>6.1 Score: 0.74</p>	<p>1. UNFPA document on community mobilization national strategy/policy (not on hand)</p> <p>2. MHIT project presentation</p> <p>3. PEPFAR SDS 2015</p>
<p>6.2 Responsiveness of community-based HIV/AIDS services: Has the host country standardized the design and implementation of community-based HIV services?</p>	<p>The host country has standardized the following design and implementation components of community-based HIV services through (check all that apply):</p> <p><input checked="" type="checkbox"/> Formalized mechanisms of participation by communities, high-burden populations and/or civil society engagement in delivery or oversight of services</p> <p><input type="checkbox"/> National guidelines detailing how to operationalize HIV services in communities</p> <p><input checked="" type="checkbox"/> Providing official recognition to skilled human resources (e.g. community health workers) working and delivering HIV services in communities</p> <p><input checked="" type="checkbox"/> Providing financial support for community-based services</p> <p><input checked="" type="checkbox"/> Providing supply chain support for community-based services</p> <p><input type="checkbox"/> Supporting linkages between facility- and community-based services through formalized bidirectional referral services (e.g., use of national reporting systems to refer and monitor referrals for completeness)</p>	<p>6.2 Score: 0.74</p>	<p>1. Community Health Guidelines from Ministry of Health</p> <p>2. CAGs strategy (not on hand); HIV and community mobilization strategy (not on hand)</p>
<p>6.3 Domestic Financing of Service Delivery: To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services in high burden areas (i.e. excluding any external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input checked="" type="radio"/> C. Host country institutions provide some (approx. 10-49%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> D. Host country institutions provide most (approx. 50-89%) financing for delivery of HIV/AIDS services in high burden areas</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) financing for delivery of HIV/AIDS services in high burden areas</p>	<p>6.3 Score: 0.83</p>	<p>Resource Mapping 2014 - HIV/AIDS slides</p> <p>GoI invests between 28 and 36% of the total response to HIV/AIDS in country</p>

<p>6.4 Domestic Provision of Service Delivery: To what extent do host country institutions (public, private, or voluntary sector) deliver HIV/AIDS services in high burden areas without external technical assistance from donors?</p>	<p><input type="radio"/> A. HIV/AIDS services in high burden areas are primarily delivered by external agencies, organizations, or institutions.</p> <p><input checked="" type="radio"/> B. Host country institutions deliver HIV/AIDS services in high burden areas but with substantial external technical assistance.</p> <p><input type="radio"/> C. Host country institutions deliver HIV/AIDS services in high burden areas with some external technical assistance.</p> <p><input type="radio"/> D. Host country institutions deliver HIV/AIDS services in high burden areas with minimal or no external technical assistance.</p>	<p>6.4 Score: 0.37</p>		<p>PEPFAR is providing technical assistance in the 5 priority districts, which is substantial, including supportive HR, printing, some commodities, and clinical mentorship. Government also provides substantial contribution to service delivery in terms of HR, particularly nurses, and drug supplies.</p>
<p>6.5 Domestic Financing of Service Delivery for Key Populations: To what extent do host country institutions (public, private, or voluntary sector) finance the delivery of HIV/AIDS services to key populations in high burden areas (i.e. without external financial assistance from donors)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Host country institutions provide no or minimal (0%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input checked="" type="radio"/> C. Host country institutions provide some (approx. 10-49%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> D. Host country institutions provide most (approx. 50-89%) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) financing for delivery of HIV/AIDS services to key populations in high burden areas.</p>	<p>6.5 Score: 0.83</p>	<p>Resource Mapping 2014 - HIV/AIDS slides</p>	<p>GoL invests between 28 and 36% of the total response to HIV/AIDS in country. Government services are available for free to all people, including those in key populations.</p>
<p>6.6 Domestic Provision of Service Delivery for Key Populations: To what extent do host country institutions (public, private, or voluntary sector) deliver HIV/AIDS services to key populations in high burden areas without external technical assistance from donors?</p>	<p><input type="radio"/> A. HIV/AIDS services to key populations are primarily delivered by external agencies, organizations, or institutions.</p> <p><input checked="" type="radio"/> B. Host country institutions deliver HIV/AIDS services to key populations but with substantial external technical assistance.</p> <p><input type="radio"/> C. Host country institutions deliver HIV/AIDS services to key populations with some external technical assistance.</p> <p><input type="radio"/> D. Host country institutions deliver HIV/AIDS services to key populations with minimal or no external technical assistance.</p>	<p>6.6 Score: 0.37</p>	<p>Appendix 3: Comprehensive Data Tables - Table 5: Available HIV/AIDS Funding (Resource Mapping data in US\$) (FY 2013/14 – FY 2017/18)</p>	<p>Work targeting MSM was funded by PEPFAR and Global Fund. Support to factory workers is supported by the factory leadership. Work with miners is also supported by TEBA, MDA, ICAP, and the mines, among others.</p>
<p>6.7 National Service Delivery Capacity: Do national health authorities have the capacity to effectively plan and manage HIV services in high HIV burden areas?</p>	<p>The national MOH (check all that apply):</p> <p><input checked="" type="checkbox"/> Translates national policies/strategies into sub-national level HIV/AIDS strategic plan and response activities.</p> <p><input checked="" type="checkbox"/> Uses epidemiologic and program data to measure effectiveness of sub-national level programs in delivering needed HIV/AIDS services in right locations.</p> <p><input type="checkbox"/> Assesses current and future staffing needs based on HIV/AIDS program goals and budget realities for high burden locations.</p> <p><input type="checkbox"/> Develops sub-national level budgets that allocate resources to high burden service delivery locations.</p> <p><input type="checkbox"/> Effectively engages with civil society in program planning and evaluation of services.</p> <p><input type="checkbox"/> Designs a staff performance management plan to assure that staff working at high burden sites maintain good clinical and technical skills, such as through training and/or mentorship.</p>	<p>6.7 Score: 0.37</p>	<p>JANS Report RM 2014 report - HIV</p>	<p>1. District plans are developed based on the national strategic objectives. 2. JANS report for planning using data. 4. Allocation across districts is not correlated with disease burden 6. Performance appraisal system is in place, as well as training and mentorship. However, implementation of the performance appraisal system appears to be inconsistent, and training and mentorship is primarily driven by partners. CHAL performance may differ from national</p>

<p>6.8 Sub-national Service Delivery Capacity: Do sub-national health authorities (i.e., district, provincial) have the capacity to effectively plan and manage HIV services sufficiently to achieve sustainable epidemic control?</p>	<p>Sub-national health authorities (check all that apply):</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Translate national policies/strategies into sub-national level HIV/AIDS strategic plan and response activities. <input type="checkbox"/> Use epidemiologic and program data to measure effectiveness of sub-national level programs in delivering needed HIV/AIDS services in right locations. <input checked="" type="checkbox"/> Assess current and future staffing needs based on HIV/AIDS program goals and budget realities for high burden locations. <input checked="" type="checkbox"/> Develop sub-national level budgets that allocate resources to high burden service delivery locations. <input type="checkbox"/> Effectively engage with civil society in program planning and evaluation of services. <input type="checkbox"/> Design a staff performance management plan to assure that staff working at high burden sites maintain good clinical and technical skills, such as through training and/or mentorship. 	<p>6.8 Score: 0.56</p>	<p>SIMS report District operational plans</p>	<ol style="list-style-type: none"> 1. Districts are starting to use data in their PSM meetings, but with heavy partner support. 2. During SIMS assessment, DHMTs demonstrated a good understanding of their HR needs. 3. During district planning and budgeting processes, facilities generate their own budgets. This process is supported heavily by partners, and often allocates funds away from high burden facilities, because donors are targeting funds there. 4. Community advisory committees are in place at the district level, but are not meeting regularly or operating in an effective way. 6. Staff performance system is designed at central level.
Service Delivery Score		4.81		
<p>7. Human Resources for Health: HRH staffing decisions for those working on HIV/AIDS are based on use of HR data and are aligned with national plans. Host country has sufficient numbers and categories of competent health care workers and volunteers to provide quality HIV/AIDS prevention, care and treatment services in health facilities and in the community. Host country trains, deploys and compensates health workers providing HIV/AIDS services through local public and/or private resources and systems. Host country has a strategy or plan for transitioning staff funded by donors.</p>			Data Source	Notes/Comments
<p>7.1 HRH Supply: To what extent is the health worker supply adequate to enable the volume and quality of HIV/AIDS services needed for sustained epidemic control at the facility and/or comm site level?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and skills mix of health care providers <input type="checkbox"/> The country's health workers are adequately deployed to, or distributed within, facilities and communities with high HIV burden <input type="checkbox"/> The country has developed retention schemes that address health worker vacancy or attrition in high HIV burden areas <input checked="" type="checkbox"/> The country's pre-service education institutions are producing an adequate supply and appropriate skills mix of social service workers to deliver social services to vulnerable children 	<p>7.1 Score: 0.67</p>	<p>NEPI HRH optimization report</p>	<ol style="list-style-type: none"> 1. Nurse output is adequate and is aligned and guided by the NEPI 2. 2014 HRH optimization report showed misallocation of health workers according to need 3. Salary increase was implemented, plus incentives for hard to reach areas. But the group feels that these are not adequate to the needs. 4. Training institutions are producing social workers and those trained on counseling and social work, but they are not being hired. There is also a dearth of social workers focused on children.
<p>7.2 HRH transition: What is the status of transitioning PEPFAR and other donor supported HIV/AIDS health worker salaries to local financing/compensation?</p>	<ul style="list-style-type: none"> <input type="radio"/> A. There is no inventory or plan for transition of donor-supported health workers <input checked="" type="radio"/> B. There is an inventory of donor-supported health workers, but no official plan to transition these staff to local support <input type="radio"/> C. There is an inventory and plan for transition of donor-supported workers, but it has not yet been implemented <input type="radio"/> D. There is an inventory and plan for donor-supported workers to be transitioned, and staff are being transitioned according to this plan <input type="radio"/> E. No plan is necessary because all HIV/AIDS health worker salaries are already locally financed/compensated 	<p>7.2 Score: 0.33</p>	<p>PEPFAR inventory of HRH HRIS (captures all donor-supported HR)</p>	

<p>7.3 Domestic funding for HRH: What proportion of health worker (doctors, nurses, midwives, and CHW) salaries are supported with domestic public or private resources (i.e. excluding donor resources)?</p>	<p><input type="radio"/> A. Host country institutions provide no (0%) health worker salaries</p> <p><input type="radio"/> B. Host country institutions provide minimal (approx. 1-9%) health worker salaries</p> <p><input type="radio"/> C. Host country institutions provide some (approx. 10-49%) health worker salaries</p> <p><input checked="" type="radio"/> D. Host country institutions provide most (approx. 50-89%) health worker salaries</p> <p><input type="radio"/> E. Host country institutions provide all or almost all (approx. 90%+) health worker salaries</p>	<p>7.3 Score: 2.50</p>	<p>RM data could be analyzed to provide the answer.</p>	<p>Global Fund support has phased out for health worker salaries. Government is the primary funder of health worker salaries in Lesotho.</p>
<p>7.4 Pre-service: Do current pre-service education curricula for health workers providing HIV/AIDS services include HIV content that has been updated in last three years?</p>	<p><input type="radio"/> A. Pre-service education institutions do not have HIV content, or HIV content used by pre-service education institutions is out of date (not updated within 3 years)</p> <p><input checked="" type="radio"/> B. Pre-service institutions have updated HIV/AIDS content within the last three years (check all that apply):</p> <p><input checked="" type="checkbox"/> Updated content reflects national standards of practice for cadres offering HIV/AIDS-related services</p> <p><input type="checkbox"/> Institutions maintain process for continuously updating content, including HIV/AIDS content</p> <p><input type="checkbox"/> Updated curricula contain training related to stigma & discrimination of PLWHA</p> <p><input type="checkbox"/> Institutions track student employment after graduation to inform planning</p>	<p>7.4 Score: 0.83</p>	<p>NEPI</p>	<p>Institutions do not continuously update their curricula.</p>
<p>7.5 In-service Training: To what extent does the host country government (through public, private, and/or voluntary sectors) plan and implement HIV/AIDS in-service training necessary to equip health workers for sustained epidemic control?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p>Check all that apply among A, B, C, D:</p> <p><input checked="" type="checkbox"/> A. The host country government provides the following support for in-service training in the country (check ONE):</p> <p><input type="checkbox"/> Host country government implements no (0%) HIV/AIDS related in-service training</p> <p><input checked="" type="checkbox"/> Host country government implements minimal (approx. 1-9%) HIV/AIDS related in-service training</p> <p><input type="checkbox"/> Host country government implements some (approx. 10-49%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements most (approx. 50-89%) HIV/AIDS in-service training</p> <p><input type="checkbox"/> Host country government implements all or almost all (approx. 90%+) HIV/AIDS in-service training</p> <p><input type="checkbox"/> B. The host country government has a national plan for institutionalizing (establishing capacity within local institutions to deliver) donor-supported in-service training in HIV/AIDS</p> <p><input checked="" type="checkbox"/> C. The host country government requires continuing professional development, a form of in-service training, for re-licensure for key clinicians</p> <p><input type="checkbox"/> D. The host country government maintains a database to track training for HIV/AIDS, and allocates training based on need (e.g. focusing on high burden</p>	<p>7.5 Score: 0.42</p>	<p>Appendix 3: Comprehensive Data Tables - Table 5: Available HIV/AIDS Funding (Resource Mapping data in US\$) (FY 2013/14 – FY 2017/18)</p>	<p>1. Most of the training is implemented by implementing partners. 2. Continuing professional development is required.</p>

<p>7.6 HR Data Collection and Use: Does the country systematically collect health workforce data, such as through a Human Resource Information Systems (HRIS), for HIV/AIDS services and/or health workforce planning and management?</p>	<p><input type="radio"/> A. There is no HRIS in country and data on the health workforce is not collected systematically for planning and management</p> <p><input type="radio"/> B. There is no HRIS in country, but some data is collected for planning and management</p> <p><input type="checkbox"/> Registration and re-licensure data for key professionals is collected and used for planning and management</p> <p><input type="checkbox"/> MOH health worker employee data (number, cadre, and location of employment) is collected and used</p> <p><input type="checkbox"/> Routine assessments are conducted regarding health worker staffing at health facility and/or community sites</p> <p><input checked="" type="radio"/> C. There is an HRIS (an interoperable system that captures at least regulatory and deployment data on health workers) in country:</p> <p><input checked="" type="checkbox"/> The HRIS is primarily financed and managed by host country institutions</p> <p><input type="checkbox"/> There is a national strategy or approach to interoperability for HRIS</p> <p><input checked="" type="checkbox"/> The government produces HR data from the system at least annually</p> <p><input type="checkbox"/> Host country institutions use HR data from the system for planning and management (e.g. health worker deployment)</p>	<p>7.6 Score: 1.00</p>	<p>Health Sector strategic Development plan</p>	<p>HRIS system is in place, introduced with technical support of HERA. The system is financed and operated by the government. Data is not interoperable and is rarely shared from the system, and is not always used.</p>
<p align="center">Human Resources for Health Score</p>		<p align="center">5.75</p>		
<p>8. Commodity Security and Supply Chain: The National HIV/AIDS response ensures a secure, reliable and adequate supply and distribution of quality products, including drugs, lab and medical supplies, health items, and equipment required for effective and efficient HIV/AIDS prevention, diagnosis and treatment. Host country efficiently manages product selection, forecasting and supply planning, procurement, warehousing and inventory management, transportation, dispensing and waste management reducing costs while maintaining quality.</p>			<p align="center">Data Source</p>	<p align="center">Notes/Comments</p>
<p>8.1 ARV Domestic Financing: What is the estimated percentage of ARV procurement funded by domestic sources? (Domestic sources includes public sector and private sector but excludes donor and out-of-pocket funds)</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not known.</p> <p><input type="radio"/> B. No (0%) funding from domestic sources</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) funding from domestic sources</p> <p><input type="radio"/> D. Some (approx. 10-49%) funded from domestic sources</p> <p><input checked="" type="radio"/> E. Most (approx. 50 – 89%) funded from domestic sources</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) funded from domestic sources</p>	<p>8.1 Score: 0.63</p>	<p>HIV counterpart financing report</p>	
<p>8.2 Test Kit Domestic Financing: What is the estimated percentage of HIV Rapid Test Kit procurement funded by domestic sources? (Domestic sources includes public sector and private sector but excludes donor and out-of-pocket funds)</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not known</p> <p><input type="radio"/> B. No (0%) funding from domestic sources</p> <p><input checked="" type="radio"/> C. Minimal (approx. 1-9%) funding from domestic sources</p> <p><input type="radio"/> D. Some (approx. 10-49%) funded from domestic sources</p> <p><input type="radio"/> E. Most (approx. 50-89%) funded from domestic sources</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) funded from domestic sources</p>	<p>8.2 Score: 0.21</p>	<p>Financial gap analysis for the Global Fund</p>	<p>Majority of funding for test kits is from Global Fund and PEPFAR</p>

<p>8.3 Condom Domestic Financing: What is the estimated percentage of condom procurement funded by domestic (not donor) sources? <i>Note:</i> The denominator should be the supply of free or subsidized condoms provided to public or private sector health facilities or community based programs.</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not known</p> <p><input type="radio"/> B. No (0%) funding from domestic sources</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) funding from domestic sources</p> <p><input checked="" type="radio"/> D. Some (approx. 10-49%) funded from domestic sources</p> <p><input type="radio"/> E. Most (approx. 50-89%) funded from domestic sources</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) funded from domestic sources</p>	<p>8.3 Score: 0.42</p>	<p>HIV counterpart financing report</p>	<p>Biomedical prevention is primarily funded by PEPFAR, with additional support from Global Fund.</p>
<p>8.4 Supply Chain Plan: Does the country have an agreed-upon national supply chain plan that guides investments in the supply chain?</p>	<p><input type="radio"/> A. There is no plan or thoroughly annually reviewed supply chain standard operating procedure (SOP).</p> <p><input checked="" type="radio"/> B. There is a plan/SOP that includes the following components (check all that apply):</p> <p><input checked="" type="checkbox"/> Human resources</p> <p><input type="checkbox"/> Training</p> <p><input checked="" type="checkbox"/> Warehousing</p> <p><input checked="" type="checkbox"/> Distribution</p> <p><input type="checkbox"/> Reverse Logistics</p> <p><input checked="" type="checkbox"/> Waste management</p> <p><input checked="" type="checkbox"/> Information system</p> <p><input checked="" type="checkbox"/> Procurement</p> <p><input checked="" type="checkbox"/> Forecasting</p> <p><input checked="" type="checkbox"/> Supply planning and supervision</p> <p><input checked="" type="checkbox"/> Site supervision</p>	<p>8.4 Score: 1.82</p>	<p>National Supply Chain Strategy (need to review to verify which of these is included in this document)</p>	<p>This is implemented both by MOH and NDSO.</p>
<p>8.5 Supply Chain Plan Financing: What is the estimated percentage of financing for the supply chain plan that is provided by domestic sources (i.e. excluding donor funds)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. This information is not available.</p> <p><input type="radio"/> B. No (0%) funding from domestic sources.</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) funding from domestic sources.</p> <p><input checked="" type="radio"/> D. Some (approx. 10-49%) funding from domestic sources.</p> <p><input type="radio"/> E. Most (approx. 50-89%) funding from domestic sources.</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) funding from domestic sources.</p>	<p>8.5 Score: 0.42</p>	<p>Need to verify, this is an estimate.</p>	<p>Global Fund funded the establishment of the SCMU.</p>

<p>8.6 Stock: Does the host country government manage processes and systems that ensure appropriate ARV stock levels?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> The group making re-supply decisions for ARVs, have timely visibility into the ARV stock on hand at facilities <input checked="" type="checkbox"/> Facilities are stocked with ARVs according to plan (above the minimum and below the maximum stock level) 90% of the time <input checked="" type="checkbox"/> MOH or other host government personnel make re-supply decisions with minimal external assistance: <ul style="list-style-type: none"> <input type="checkbox"/> Decision makers are not seconded or implementing partner staff <input checked="" type="checkbox"/> Supply chain data are maintained within the Ministry of Health and not solely stored by donor-funded projects <input type="checkbox"/> Team that conducts analysis of facility data is at least 50% host government 	<p>8.6 Score: 1.73</p>	<p>MOH, AJR 2014, NDSO monthly stock status report, December, 2014</p>	<p>Stock is reported on monthly basis, compiled into national report, which can be accessed. Data from facilities goes to NDSO, which manages the resupply process effectively. Resupply decisions are made by MOH/NDSO staff, based on expected demand. Data is maintained within MOH. Analysis of facility data is conducted by MOH staff. However, the system is largely paper-based and MOH would like to move to an electronic system.</p>
<p>8.7 Assessment: Was an overall score of above 80% achieved on the SCMS National Supply Chain Assessment or top quartile for an equivalent assessment conducted within the last three years?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<ul style="list-style-type: none"> <input type="radio"/> A. A comprehensive assessment has not been done <input checked="" type="radio"/> B. A comprehensive assessment has been done but the score was lower than 80% (for NSCA) or in the bottom three quartiles for the global average of other equivalent assessments <input type="radio"/> C. A comprehensive assessment has been done and the score was higher than 80% (for NSCA) or in the top quartile for the assessment 	<p>8.7 Score: 1.11</p>	<p>Comprehensive assessment report.</p>	<p>Assessment was done in 2013, with a score of 79%. There is also a rapid assessment underway.</p>
<p>Commodity Security and Supply Chain Score: 6.32</p>				
<p>9. Quality Management: Host country has institutionalized quality management systems, plans, workforce capacities and other key inputs to ensure that modern quality improvement methodologies are applied to managing and providing HIV/AIDS services</p>			<p>Data Source</p>	<p>Notes/Comments</p>
<p>9.1 Existence of a Quality Management (QM) System: Does the host country government support appropriate QM structures to support continuous quality improvement (QI) at national, sub-national and site levels?</p>	<ul style="list-style-type: none"> <input type="radio"/> A. The host country government does not have structures or resources to support site-level continuous quality improvement <input checked="" type="radio"/> B. The host country government: <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Has structures with dedicated focal points or leaders (e.g., committee, focal person, working groups, teams) at the national level, sub-national level and in a majority of sites where HIV/AIDS care and services are offered that are supporting site-level continuous quality improvement <input checked="" type="checkbox"/> Has a budget line item for the QM program <input type="checkbox"/> Supports a knowledge management platform (e.g., web site) and/or peer learning opportunities available to site QI participants to gain insights from other sites and interventions 	<p>9.1 Score: 1.33</p>	<p>National Strategic Plan on Quality Management.</p>	

<p>9.2 Quality Management/Quality Improvement (QM/QI) Plan: Is there a current (updated within the last 2 years) QM/QI plan? (The plan may be HIV program-specific or include HIV program-specific elements in a national health sector QM/QI plan.)</p>	<p><input type="radio"/> A. There is no HIV/AIDS-related QM/QI strategy</p> <p><input checked="" type="radio"/> B. There is a QM/QI strategy that includes HIV/AIDS, but it is not current (updated within the last 2 years)</p> <p><input type="radio"/> C. There is a current QM/QI strategy that includes HIV/AIDS program specific elements</p> <p><input type="radio"/> D. There is a current HIV/AIDS program specific QM/QI strategy</p>	<p>9.2 Score: 0.67</p>		<p>There is a draft strategy from 2012, not yet approved.</p>
<p>9.3 Performance Data Collection and Use for Improvement: Are HIV program performance measurement data systematically collected and analyzed to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting?</p>	<p><input type="radio"/> A. HIV program performance measurement data are not used to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting.</p> <p><input checked="" type="radio"/> B. HIV program performance measurement data are used to identify areas of patient care and services that can be improved through national decision making, policy, or priority setting (check all that apply):</p> <p><input checked="" type="checkbox"/> The national quality structure has a clinical data collection system from which local performance measurement data on prioritized measures are being collected, aggregated nationally, and analyzed for local and national improvement</p> <p><input checked="" type="checkbox"/> There is a system for sharing data at the national, SNU, and local level, with evidence that data is used to identify quality gaps and initiate QI activities</p> <p><input type="checkbox"/> There is documentation of results of QI activities and demonstration of national HIV program improvement</p>	<p>9.3 Score: 1.33</p>		<p>Data is shared at the PHC meetings. System is effectively collecting data on these issues.</p>
<p>9.4 Health worker capacity for QM/QI: Does the host country government ensure that the health workforce has capacities to apply modern quality improvement methods to HIV/AIDS care and services?</p>	<p><input type="radio"/> A. There is no training or recognition offered to build health workforce competency in QI.</p> <p><input checked="" type="radio"/> B. There is health workforce competency-building in QI, including:</p> <p><input type="checkbox"/> Pre-service institutions incorporate modern quality improvement methods in curricula</p> <p><input checked="" type="checkbox"/> National in-service training (IST) curricula integrate quality improvement training for members of the health workforce (including managers) who provide or support HIV/AIDS services</p>	<p>9.4 Score: 1.00</p>	<p>Slide package from training.</p>	<p>In-service training is currently being rolled out. Sites have their own QI initiatives as a result of training.</p>

<p>9.5 Existence of QI Implementation: Does the host country government QM system use proven systematic approaches for QI?</p>	<p>The national-level QM structure:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Provides oversight to ensure continuous quality improvement in HIV/AIDS care and services <input type="checkbox"/> Regularly convenes meetings that includes health services consumers <input checked="" type="checkbox"/> Routinely reviews national, sub-national and clinical outcome data to identify and prioritize areas for improvement <p>Sub-national QM structures:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Provide coordination and support to ensure continuous quality improvement in HIV/AIDS care and services <input type="checkbox"/> Regularly convene meetings that includes health services consumers <input checked="" type="checkbox"/> Routinely review national, sub-national and clinical outcome data to identify and prioritize areas for improvement <p>Site-level QM structures:</p> <ul style="list-style-type: none"> <input checked="" type="checkbox"/> Undertake continuous quality improvement in HIV/AIDS care and services to identify and prioritize areas for improvement 	<p>9.5 Score: 1.14</p>		<p>National level provides oversight, with a team of 5 focusing on quality. At the subnational level, data is reviewed</p> <p>General customer satisfaction surveys are done as part of the AJR process, but do not focus on HIV.</p> <p>QI processes are observed at site level.</p>
Quality Management Score:		5.48		
<p>10. Laboratory: The host country ensures adequate funds, policies, and regulations to ensure laboratory capacity (workforce, equipment, reagents, quality) matches the services required for PLHIV.</p>			Data Source	Notes/Comments
<p>10.1 Strategic Plan: Does the host country have a national laboratory strategic plan?</p>	<ul style="list-style-type: none"> <input type="radio"/> A. There is no national laboratory strategic plan <input type="radio"/> B. National laboratory strategic plan is under development <input type="radio"/> C. National laboratory strategic plan has been developed, but not approved <input type="radio"/> D. National laboratory strategic plan has been developed and approved <input checked="" type="radio"/> E. National laboratory plan has been developed, approved, and costed 	<p>10.1 Score: 1.67</p>	<p>National laboratory strategic plan</p>	<p>Costing is nearly finalized.</p>
<p>10.2 Regulations to Monitor Quality of Laboratories and Point of Care Testing (POCT) Sites: To what extent does the host country have regulations in place to monitor the quality of its laboratories and POCT sites? (if exact or approximate percentage known, please note in Comments column)</p>	<ul style="list-style-type: none"> <input type="radio"/> A. Regulations do not exist to monitor minimum quality of laboratories in the country. <input type="radio"/> B. Regulations exist, but are not implemented (0% of laboratories and POCT sites regulated). <input type="radio"/> C. Regulations exist, but are minimally implemented (approx. 1-9% of laboratories and POCT sites regulated). <input checked="" type="radio"/> D. Regulations exist, but are partially implemented (approx. 10-49% of laboratories and POCT sites regulated). <input type="radio"/> E. Regulations exist and are mostly implemented (approx. 50-89% of laboratories and POCT sites regulated). <input type="radio"/> F. Regulations exist and are fully or almost fully implemented (approx. 90%+ of laboratories and POCT sites regulated). 	<p>10.2 Score: 0.83</p>	<p>Labs implementation guidelines POC implementation guidelines</p>	<p>Labs are closely regulated and supported, but Point of Care sites are facing quality challenges and are not well regulated. Rapid HIV testing and PIMA machines.</p>

<p>10.3 Capacity of Laboratory Workforce: Does the host country have an adequate number of qualified laboratory personnel (human resources [HR]) in the public sector, to sustain key functions to meet the needs of PLHIV for diagnosis, monitoring treatment and viral load suppression?</p>	<p><input checked="" type="radio"/> A. There are not adequate qualified laboratory personnel to achieve sustained epidemic control</p> <p><input type="radio"/> B. There are adequate qualified laboratory personnel to perform the following key functions:</p> <ul style="list-style-type: none"> <input type="checkbox"/> HIV diagnosis in laboratories and point-of-care settings <input type="checkbox"/> TB diagnosis in laboratories and point-of-care settings <input type="checkbox"/> CD4 testing in laboratories and point-of-care settings <input type="checkbox"/> Viral load testing in laboratories and point-of-care settings <input type="checkbox"/> Early Infant Diagnosis in laboratories <input type="checkbox"/> Malaria infections in laboratories and point-of-care settings <input type="checkbox"/> Microbiology in laboratories and point-of-care settings <input type="checkbox"/> Blood banking in laboratories and point-of-care settings <input type="checkbox"/> Opportunistic infections including Cryptococcal antigen in laboratories and point-of-care settings 	<p>10.3 Score: 0.00</p>		<p>NHTC is producing graduates who are trained, but they are not being absorbed to the system at an adequate rate. Therefore, the personnel in the health sector are not adequate. One example: Increasing personnel is part of the national VL strategic plan in order to meet demand.</p>
<p>10.4 Viral Load Infrastructure: Does the host country have sufficient infrastructure to test for viral load to reach sustained epidemic control?</p>	<p><input type="radio"/> A. There is not sufficient infrastructure to test for viral load.</p> <p><input checked="" type="radio"/> B. There is sufficient infrastructure to test for viral load, including:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Sufficient viral load instruments and reagents <input type="checkbox"/> Appropriate maintenance agreements for instruments <input type="checkbox"/> Adequate specimen transport system and timely return of results 	<p>10.4 Score: 0.00</p>	<p>National Strategy and Implementation Plan for Scaling Up HIV Viral Load Testing 2015/16 – 2017/18</p>	<p>VL strategic plan shows that there is adequate capacity and now moving forward. The required machines are already in the procurement pipeline.</p>
<p>10.5 Domestic Funds for Laboratories: To what extent are laboratory services financed by domestic public or private resources (i.e. excluding external donor funding)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. No (0%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> B. Minimal (approx. 1-9%) laboratory services are financed by domestic resources.</p> <p><input checked="" type="radio"/> C. Some (approx. 10-49%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> D. Most (approx. 50-89%) laboratory services are financed by domestic resources.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) laboratory services are financed by domestic resources.</p>	<p>10.5 Score: 1.67</p>	<p>Resource Mapping - Labs</p>	<p>GoL provides 28% in FY 2014, 34% in FY 2014/15 and 37% of Labs funding through FY2015/16.</p>
Laboratory Score:		4.17		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN B

Domain C. Strategic Investments, Efficiency, and Sustainable Financing

What Success Looks Like: Host country government is aware of the financial resources required to effectively and efficiently meet its national HIV/AIDS prevention, care and treatment targets. HCG actively seeks, solicits and or generates the necessary financial resources, ensures sufficient resource commitments, and uses data to strategically allocate funding and maximize investments.

	Data Source	Notes/Comments
<p>11. Domestic Resource Mobilization: The partner country budgets for its HIV/AIDS response and makes adequate resource commitments and expenditures to achieve national HIV/AIDS goals for epidemic control in line with its financial ability.</p>		
<p>11.1 Domestic Budget: To what extent does the national budget explicitly account for the national HIV/AIDS response?</p>	<p> <input type="radio"/> A. There is no explicit funding for HIV/AIDS in the national budget. <input checked="" type="radio"/> B. There is explicit HIV/AIDS funding within the national budget. <input type="checkbox"/> The HIV/AIDS budget is program-based across ministries <input type="checkbox"/> The budget includes or references indicators of progress toward national HIV/AIDS strategy goals <input type="checkbox"/> The budget includes specific HIV/AIDS service delivery targets <input type="checkbox"/> National budget reflects all sources of funding for HIV, including from external donors </p>	<p>11.1 Score: 1.11</p> <p>MOF, Budget Statement 2014/2015</p>
<p>11.2 Annual Targets: Did the most recent budget as executed achieve stated annual HIV/AIDS goals? (if exact or approximate percentage known, please note in Comments column)</p>	<p> <input type="radio"/> A. There are no HIV/AIDS goals/targets articulated in the national budget <input type="radio"/> B. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, but none (0%) were attained. <input checked="" type="radio"/> C. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, but very few (approx. 1-9%) were attained. <input type="radio"/> D. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and some (approx. 10-49%) were reached. <input type="radio"/> E. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and most (approx. 50-89%) were reached. <input type="radio"/> F. There are annual HIV/AIDS goals/targets articulated in the most recent national budget, and all or almost all (approx. 90%+) were reached. </p>	<p>11.2 Score: 0.56</p> <p>AJR 2014/15</p> <p>Annual Joint Review 14/15</p>

<p>11.3 Budget Execution: For the previous three years, what was the average execution rate for budgeted domestic HIV/AIDS resources (i.e. excluding any donor funds) at both the national and subnational level?</p> <p>(If subnational data does not exist or is not available, answer the question for the national level. Note level covered in the comments column)</p>	<p><input type="radio"/> A. Information is not available</p> <p><input type="radio"/> B. There is no national HIV/AIDS budget, or the execution rate was 0%.</p> <p><input type="radio"/> C. 1-9%</p> <p><input type="radio"/> D. 10-49%</p> <p><input checked="" type="radio"/> E. 50-89%</p> <p><input type="radio"/> F. 90% or greater</p>	<p>11.3 Score: 1.67</p>	<p>AJR 14/15</p>	<p>Annual Joint Review 14/15</p> <p>This is information that can be pulled from IFMIS by the MOH health financing department. They should be able to pull from the system how much of funding allocated to the HIV/AIDS program was utilized in the last financial year</p>
<p>11.4 PLACEHOLDER for future indicator measuring country's financial ability to pay for its HIV response (will not be included in SID for COP 16)</p>				
<p>11.5 Domestic Spending: What percent of the annual national HIV response is financed with domestic public and domestic private sector HIV funding (excluding out-of-pocket and donor resources)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. None (0%) is financed with domestic funding.</p> <p><input type="radio"/> B. Very little (approx. 1-9%) is financed with domestic funding.</p> <p><input checked="" type="radio"/> C. Some (approx. 10-49%) is financed with domestic funding.</p> <p><input type="radio"/> D. Most (approx. 50-89%) is financed with domestic funding.</p> <p><input type="radio"/> E. All or almost all (approx. 90%+) is financed with domestic funding.</p>	<p>11.6 Score: 1.67</p>	<p>MOH Resource Mapping round 2.</p>	<p>Resource Mapping however does not have private sector data</p>
<p align="right">Domestic Resource Mobilization Score:</p>		<p align="right">5.00</p>		

12. Technical and Allocative Efficiencies: The host country analyzes and uses relevant HIV/AIDS epidemiological, health, health workforce, and economic data to inform HIV/AIDS investment decisions. For maximizing impact, data are used to choose which high impact program services and interventions are to be implemented, where resources should be allocated, and what populations demonstrate the highest need and should be targeted (i.e. the right thing at the right place and at the right time). Unit costs are tracked and steps are taken to improve HIV/AIDS outcomes within the available resource envelope (or achieves comparable outcomes with fewer resources).			
		Data Source	Notes/Comments
<p>12.1 Resource Allocation Process: Does the partner country government utilize a recognized data-driven model to inform the allocation of domestic (i.e. non-donor) public HIV resources?</p> <p>(note: full score achieved by selecting one checkbox)</p>	<p><input checked="" type="radio"/> A. The host country government does not use one of the mechanisms listed below to inform the allocation of their resources.</p> <p><input type="radio"/> B. The host country government does use the following mechanisms to inform the allocation of their resources (check all that apply):</p> <p><input type="checkbox"/> Optima</p> <p><input type="checkbox"/> Spectrum (including EPP and Goals)</p> <p><input type="checkbox"/> AIDS Epidemic Model (AEM)</p> <p><input type="checkbox"/> Modes of Transmission (MOT) Model</p> <p><input type="checkbox"/> Other recognized process or model (specify in notes column)</p>	<p>12.1 Score: 0.00</p>	<p>MOH, National Strategic Plan for HIV/AIDS 2012/13 - 2015/16; mOH, National Operation Plan for HIV/AIDS 2013/14</p>
<p>12.2 High Impact Interventions: What percentage of site-level point of service HIV domestic public sector resources (excluding any donor funds) are being allocated to the following set of interventions: provision of ART, VMMC, PMTCT, HTC, condoms, and targeted prevention for key and priority populations?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Information not available</p> <p><input type="radio"/> B. No (0%) site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> C. Minimal (approx. 1-9%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> D. Some (approx. 10-49%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input checked="" type="radio"/> E. Most (approx. 50-89%) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p> <p><input type="radio"/> F. All or almost all (approx. 90%+) of site-level, point-of-service domestic HIV resources are allocated to the listed set of interventions.</p>	<p>12.2 Score: 1.07</p>	<p>Will require follow up. This information can probably be provided by the Resource Mapping round 2</p>

<p>12.3 Geographic Allocation: Of central government HIV-specific resources (excluding any donor funds) allocated to geographic subunits in the most recent year available, what percentage is being allocated in the highest burden geographic areas (i.e. districts that cumulatively account for 80% of PLHIV)?</p> <p>(if exact or approximate percentage known, please note in Comments column)</p>	<p><input type="radio"/> A. Information not available.</p> <p><input type="radio"/> B. No resources (0%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> C. Minimal resources (approx. 1-9%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> D. Some resources (approx. 10-49%) are targeting the highest burden geographic areas.</p> <p><input checked="" type="radio"/> E. Most resources (approx. 50-89%) are targeting the highest burden geographic areas.</p> <p><input type="radio"/> F. All or almost all resources (approx. 90%+) are targeting the highest burden geographic areas.</p>	<p>12.3 Score: 1.07</p>		<p>Needs MOH finance department or Planning and Statistics Department</p>
<p>12.4 Data-Driven Reprogramming: Do host country government policies/systems allow for reprogramming domestic investments based on new or updated program data during the government funding cycle?</p>	<p><input type="radio"/> A. There is no system for funding cycle reprogramming</p> <p><input checked="" type="radio"/> B. There is a policy/system that allows for funding cycle reprogramming, but it is seldom used.</p> <p><input type="radio"/> C. There is a system that allows for funding cycle reprogramming and reprogramming is done as per the policy but not based on data</p> <p><input type="radio"/> D. There is a policy/system that allows for funding cycle reprogramming and reprogramming is done as per the policy and is based on data</p>	<p>Q3 Score: 0.48</p>	<p>HIV/AIDS NSP 2014 - 2018</p>	<p>Mid term reviews that are conducted of the HIV/AIDS NSP</p>
<p>12.5 Unit Costs: Does the host country government use recent expenditure data or cost analysis (i.e. data from within the last three years) to estimate unit costs of HIV/AIDS services for budgeting or planning purposes?</p> <p>(note: full score can be achieved without checking all disaggregate boxes).</p>	<p><input type="radio"/> A. The host country government does not use recent expenditure data or cost analysis to estimate unit costs</p> <p><input checked="" type="radio"/> B. The host country government uses recent expenditure data or cost analysis to estimate unit costs for (check all that apply):</p> <p><input checked="" type="checkbox"/> HIV Testing</p> <p><input checked="" type="checkbox"/> Care and Support</p> <p><input checked="" type="checkbox"/> ART</p> <p><input type="checkbox"/> PMTCT</p> <p><input type="checkbox"/> VMMC</p> <p><input type="checkbox"/> OVC Service Package</p> <p><input checked="" type="checkbox"/> Key population Interventions</p>	<p>12.5 Score: 1.14</p>	<p>2015 Planning and Budgetting round submission. HIV/AIDS NSP costing report</p>	<p>Unit costs were based on recent expenditure as per tenders etc,</p>

<p>12.6 Improving Efficiency: Has the partner country achieved any of the following efficiency improvements through actions taken within the last three years?</p>	<p>Check all that apply:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Improved operations or interventions based on the findings of cost-effectiveness or efficiency studies <input type="checkbox"/> Reduced overhead costs by streamlining management <input checked="" type="checkbox"/> Lowered unit costs by reducing fragmentation, i.e. pooled procurement, resource pooling, etc. <input type="checkbox"/> Improved procurement competition <input type="checkbox"/> Integrated HIV/AIDS into national or subnational insurance schemes (private or public -- need not be within last three years) <input checked="" type="checkbox"/> Integrated HIV into primary care services with linkages to specialist care (need not be within last three years) <input checked="" type="checkbox"/> Integrated TB and HIV services, including ART initiation in TB treatment settings and TB screening and treatment in HIV care settings (need not be within last three years) <input checked="" type="checkbox"/> Integrated HIV and MCH services, including ART initiated and maintained in eligible pregnant and postpartum women and in infants at maternal and child health care settings (need not be within last three years) <input type="checkbox"/> Developed and implemented other new and more efficient models of HIV service delivery (specify in comments) 	<p>12.6 Score: 0.63</p>	<p>MOH, NSP for HIV/AIDS 2012/13 - 2015/2016 Mid-Term Review and Revision, 2013</p>	<p>Mother and baby packs (not cheaper but more efficient)</p>
<p>12.7 ARV Benchmark prices: How do the costs of ARVs (most common first line regimen) purchased in the previous year by the partner government using domestic resources compare to international benchmark prices for that year?</p> <p>(Use the "factory cost" of purchased commodities, excluding transport costs, distribution costs, etc.)</p>	<ul style="list-style-type: none"> <input type="radio"/> A. Partner government did not pay for any ARVs using domestic resources in the previous year. <input type="radio"/> B. Average price paid for ARVs by the partner government in the previous year was more than 50% greater than the international benchmark price for that regimen. <input type="radio"/> C. Average price paid for ARVs by the partner government in the previous year was 10-50% greater than the international benchmark price for that regimen. <input checked="" type="radio"/> D. Average price paid for ARVs by the partner government in the previous year was 1-10% greater than the international benchmark price for that regimen. <input type="radio"/> E. Average price paid for ARVs by the partner government in the previous year was below or equal to the international benchmark price for that regimen. 	<p>12.7 Score: 1.07</p>	<p>http://apps.who.int/hiv/amds/price/hdd/Default.aspx ; CHAI price ceiling on ARVs</p>	
<p>Technical and Allocative Efficiencies Score:</p>		<p>5.47</p>		

THIS CONCLUDES THE SET OF QUESTIONS ON DOMAIN C

Domain D: Strategic Information

What Success Looks Like: Using local and national systems, the host country government collects, analyzes and makes available timely, comprehensive, and quality HIV/AIDS data (including epidemiological, economic/financial, and performance data) that can be used to inform policy, program and funding decisions.

13. Epidemiological and Health data: Host Country Government routinely collects, analyzes and makes available data on the HIV/AIDS epidemic and its effects on health outcomes. HIV/AIDS epidemiological and health data include size estimates of key populations, PLHIV, HIV incidence, HIV prevalence, viral load and AIDS-related mortality rates.		Data Source	Notes/Comments
<p>13.1 Who Leads General Population Surveys & Surveillance: To what extent does the host country government lead and manage planning and implementation of the HIV/AIDS portfolio of general population epidemiological surveys and/or surveillance activities (population-based household surveys, case reporting/clinical surveillance, drug resistance surveillance, etc.)?</p>	<ul style="list-style-type: none"> <input type="radio"/> A. No HIV/AIDS general population surveys or surveillance activities have been conducted within the past 5 years <input type="radio"/> B. Surveys & surveillance activities are primarily planned and implemented by external agencies, organizations or institutions <input checked="" type="radio"/> C. Surveys & surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies <input type="radio"/> D. Surveys & surveillance activities are planned and implemented by the host country government/other domestic institution, with some technical assistance from external agencies <input type="radio"/> E. Surveys & surveillance activities are planned and implemented by the host country government/other domestic institution, with minimal or no technical assistance from external agencies 	<p>13.1 Score: 0.48</p>	<p>DHS, 2014</p>
<p>13.2 Who Leads Key Population Surveys & Surveillance: To what extent does the host country government lead & manage planning and implementation of the HIV/AIDS portfolio of key population epidemiological surveys and/or behavioral surveillance activities (IBBS, size estimation studies, etc.)?</p>	<ul style="list-style-type: none"> <input type="radio"/> A. No HIV/AIDS key population surveys or surveillance activities have been conducted within the past 5 years <input type="radio"/> B. Surveys & surveillance activities are primarily planned and implemented by external agencies, organizations or institutions <input type="radio"/> C. Surveys & surveillance activities are planned and implemented by the host country government/other domestic institution, with substantial technical assistance from external agencies <input checked="" type="radio"/> D.
